Wholesale Electrical Supplies

Traffic Appliances

Lighting Fixtures

Copyrighted 1950 by The Jaqua Company, Grand Rapids 2, Michigan

General Information

In compiling this Catalog, we have endeavored to make it a complete and up-to-date sales reference book of electrical supplies, illustrating and describing material for which there is an active demand. Special catalogs, bulletins and prices can be furnished upon request, covering supplies not fully described, or shown in this catalog.

LIST PRICES

The list prices in this catalog are not guaranteed but agree with latest correct list prices at time of issue. They are not offered as quotations, and are subject to market changes without notice. All local, state or federal taxes of any nature must be added to the prices quoted unless they are already included.

TERMS

To parties of approved credit, net thirty days, subject to standard cash discounts. Unless your standing is known to us or you have a rating with the Commercial Agencies, we recommend that you accompany your first order with references to avoid delay in looking up your credit. C.O.D. orders must be accompanied by a remittance sufficient to pay express or freight charges both ways to insure us against loss should shipment be refused.

ORDERS

When ordering always use manufacturer's name and catalog numbers, and give name of article. Orders should be kept separate from all other correspondence if included in the body of a letter, both the order and the reply to the letter may be delayed.

ROUTING SHIPMENTS

Customers should send shipping instructions with all orders; but if this is not done, we will use our own judgment in selecting route.

LOSS AND DAMAGE IN TRANSIT

We do not hold ourselves responsible for any loss or damage sustained in transit, and claims of such character should be made promptly against carrier; but if we are notified of such claims, we will gladly lend our assistance to secure adjustment. We employ experienced packers and cannot be held responsible for breakage that occurs after we have obtained good order receipt from transportation companies.

SHORTAGE

All shipments are double checked, to prevent errors and shortages. Claims for shortages must be made to us promptly.

REELS

Reels are always charged; credit, however, will be allowed for full amount when returned to the factory in good order, by freight, within one year from date of invoice. Always remit for reels at time invoice covering wire is paid. When ready to return reels, write us for shipping instructions. We promptly remit for reels as soon as received and checked at original shipping point.

RETURNING GOODS

No goods should be returned for credit or exchange without first obtaining permission. We stand ready at all times to rectify any mistake that we make, and without the least cost to our customers, but, under no circumstances, should goods be returned without first consulting us for shipping instructions. We will not receive goods returned without our authorization.

NATIONAL ELECTRIC ELECTRICAL METALLIC TUBING

XDUCT JR.—ELECTRO GALVANIZED FINISH
Easy Fishing—Permanent Protection

XDUCT Jr. is a light-wall conduit, rust-proofed and acid-proofed through exacting control in the electro-galvanizing process. The inside is then further protected by a complete covering of clear enamel that will not crack or break down.

TUBING

Size, In.	Diameter, Inches		Feet Per Bundle	Approx. Wt. Per M Ft.

For Use with Electrical Metallic Tubing (Thin-Wall Conduit)

ADAPTERS

Adapter

Type "C" Rectangular Threaded Unilet with No-Thread Adapter for Electrical Metallic Tubing

Any Appleton Threaded Unilets or similar fittings made by other manufacturers will take Electrical Metallic Tubing with the use of this Adapter screwed into the hub of any 1/2 to 2-inch Threaded type Fittings and grips the conduit securely. This Adapter practically makes a no-thread fitting out of any Threaded Conduit fitting.

ADAPTERS FOR USE WITH STANDARD NO-THREAD UNILETS

Showing Adapter which replaces Regular Contacting Sleeve in No-Thread Unilets.

Designed for use in hubs of 1/2 to 2-inch Rectangular and other types of No-Thread Unilets for Heavy-Wall Conduit. The contacting Sleeve regularly furnished with the No-Thread Unilets must be removed and this Electrical Metallic Tubing Adapter inserted. Knurled nut is then screwed down and Electrical Metallic Tubing held firmly.

BRIEGEL METHOD TOOLS

For Use with Electrical Metallic Tubing

B-M INDENTER No. 606

A small light tool for installing the $\frac{1}{2}$ -inch fittings only. Two squeezes on the handles, and the fitting is securely fastened to the Electrical Metallic Tubing.

Price, No. 606 Indenter.....each \$2.95

B-M INDENTER No. 600

By means of interchangeable jaws this Indenter can be used with $\frac{1}{2}$, $\frac{3}{4}$ or 1-inch fittings.

Cat. No.	Description	Price
600	Indenter only.....each	\$4.35
6000	$\frac{1}{2}$ -inch Indenter Jaws.....per pair	2.95
6001	$\frac{3}{4}$ -inch Indenter Jaws.....per pair	2.95
6002	1-inch Indenter Jaws.....per pair	2.95
6003	Indenter Points for Nos. B-M 605, 6000, 6001, and 6002 Indenter Jaws.....per doz.	.75

B-M TUBE HOLDER No. 1000

For $\frac{1}{2}$ to 1-inch sizes inclusive. This simple tube holder enables user to easily hold the Electrical Metallic Tubing in one hand while cutting and burring the tube. Will not distort tube, or damage the outside finish of the tube.

Price, No. 1000 Tube Holder.....each \$2.10

B-M TUBE CUTTER No. 100

It is only necessary to compress the handles once to apply uniform pressure on the cutting wheel. The tube is cut perfectly square with no burr on outside and very little burr on the inside. A reamer is attached to remove the burr from the inside of the tube. Cuts $\frac{1}{2}$ -inch tube in 10 turns. For $\frac{1}{2}$ -inch to 1-inch sizes inclusive.

Price, No. 100 Tube-Cutter.....each \$6.05
Cutter Wheel only for B-M Cutter Tool..... 1.40

NATIONAL ELECTRIC RIGID STEEL CONDUIT

SHERARDUCT—SHERARDIZED

Full Weight—Threaded

Sherarduct differs from other types of zinc-coated conduit in its superior protection against rust. In Sherardizing, the pipe is placed in iron retorts, surrounded by finely-divided zinc and tightly sealed. The retorts are rolled slowly through a furnace where they are maintained at a temperature of about 800° F. for four to five hours. The zinc coating thus obtained is not merely a covering, it is alloyed with the steel, inside, outside and on the threads. Sherardizing is further protected by a coating of clear enamel, applied over the zinc. This resists acids or similar fumes, which zinc alone will not withstand. On account of the heat to which it is subjected in Sherardizing, Sherarduct is exceptionally easy to bend without flaking or cracking.

APPLETON CONDUIT FITTINGS

Cadmium Finish

CONDUIT MALE ENLARGERS

These enlargers, when screwed into the hub of any conduit fitting having $\frac{1}{2}$, $\frac{3}{4}$ or 1-inch female hubs respectively, will enlarge the hub to the next size, namely, $\frac{3}{4}$, 1 and 1 $\frac{1}{4}$ inches according to the number selected.

APPLETON GROUND FITTINGS

For Grounding Service Wire and Conduit System

Cadmium Finish

TYPE LGC ADJUSTABLE GROUND FITTING

For Large Size Water Pipes

The deck on these large size clamps has a heavy brass washer and by placing the ground wire under the lug it makes a positive bond. Adapted for No. 8, 6, or 4 B&S bare or insulated copper wire.

Cat. No.	Conduit Ground Inches	Size Grounding	Carton	Std. Pkg.	Wt. Lbs. Std. Pkg.

APPLETON GROUND FITTINGS

For Grounding Service Wire and Conduit System

Cadmium Finish

TYPE GCH FITTING FOR RIGID CONDUIT

With Brass Washer

This fitting is equipped with flat washer. Rigid clamp jaws hold securely to water pipe.

Cat. No.	Conduit Ground Inches	Size Water Pipe	Ground Rod	Car-ton	Std. Pkg.	Wt. Lbs. Std. Pkg.
GF-9402	1/2	1/2, 3/4, 1"	1"	5	25	10

TYPE "GR" BONDING METER RING

Designed for grounding the meter box to a driven or artificial ground, when a water pipe or other grounding electrode is not available in the building. The meter ring is placed between the watertight connector and the meter box, after which the ground wire is placed through either the vertical or horizontal hole and the screw is then tightened. This makes a good tight connection and a positive bond — no soldering required.

NATIONAL ELECTRIC FLEXSTEEL LIGHT-WALL FLEXIBLE-STEEL CONDUIT

Conduit is of Bondhook construction, which enables it to be fished most readily — the convolutions act as roller-bearings with less than one-half the friction surface.

A.B.C. ARMORED CABLE

This cable is made of soft, heavily-tinned, solid or stranded copper conductors, individually insulated with rubber and covered with a moisture-resisting and flame-retarding saturated braid. Individual conductors finished in different colors for identification. Multiple conductors are twisted and covered overall with a tough overlapping saturated Kraft paper, which furnishes valuable protection between the insulated wires and steel armor.

The flexible, steel armor overall is formed of heavily-zinc-coated steel grip, interlocked construction. The method of interlocking permits greater flexibility and creates continuous metal-to-metal grounding contact throughout the entire length of the cable.

A new low resistance, flat, grounding strip in contact with the inside of the armor gives two paths to ground for sizes Nos. 14 and 12 wire.

RED FIBRE ANTI-SHORT BUSHINGS

For use with A.B.C. Armored Bushed Cable. Each coil of A.B.C. cable has attached a bag containing sufficient "Anti-Short" Bushings for average requirements. Extra "Anti-Shorts" are sold separately.

NATIONAL ELECTRIC BOX CONNECTORS

EZ-HINGED-STRAP STYLE

For Armored Cable, Lampcord, and Flexible Conduit. The standard connector of the electrical industry. EZ-Strap is wide, strong, and clamps cable more securely and strongly without contortion of cable. This point is particularly advantageous in use with Flexible Steel Conduit. Rustproofed Finish.

APPLETON STA-TITE PIPE HANGERS

For Use With Rigid Conduit (Heavy-Wall)
and Threadless Thin-Wall Conduit

Type PHS with Single Conduit Parallel
with Structural Shape

Sta-Tite Pipe Hangers embody many improvements over other types. The Type PHS permits running the conduit parallel with beam, cross-wise, or any horizontal angle. This is also true of the Type PHD. These Hangers are all designed to accommodate $\frac{1}{2}$, $\frac{3}{4}$ and 1-inch Rigid Conduit (Heavy-Wall) or $\frac{1}{2}$, $\frac{3}{4}$, 1, $1\frac{1}{4}$ and $1\frac{1}{2}$ -inch Threadless Thin-Wall Conduit.

TYPE PHS—FOR SINGLE LINE CONDUIT

Run Parallel or at Right Angles

For $\frac{1}{2}$ and $\frac{3}{4}$ -Inch Rigid Conduit (Heavy-Wall); also $\frac{1}{2}$, $\frac{3}{4}$, and 1-Inch Threadless Thin-Wall Conduit

SILL PLATES FOR SERVICE ENTRANCE CABLE

Appleton Sill Plates provide metallic protection to the Service Entrance Cable at the most hazardous point, that is, where it enters the house. Does away with unsightly bends and makes a more finished and safer installation.

Can be furnished with DuxSeal Weatherproof Compound which is compressed around the cable and fills up the hole when the plate is screwed down. This eliminates the crowding and inconvenience of drilling a hole through the wall, slanting it to the side and up to prevent water from entering the building.

By using DuxSeal Compound the hole can be drilled in a downward position and a longer sweep bend in the cable is made possible. Appleton Sill Plates are made of aluminum and are furnished with two hot-dipped galvanized screws.

HOFFMAN SWITCH-O-LITE

Approved by Underwriters' Laboratories, Inc.

Model No. 540

Consists of a single-pole, single-throw, magnetically operated latch-type relay, fuse holder, and terminal board, all housed in a cast aluminum enclosure, machined and gasketed to provide a completely weatherproof container rated at 115 volts, 60 cycle A.C., 10 ampere, non-inductive, with an operating coil suitable for continuous duty.

Connection outlets have been provided on both top and bottom of Switch-O-Lite's weatherproof, cast aluminum relay box. This permits installation by the most convenient method — either with

conduit or flexible cable. Only one wire required from Switch-O-Lite Control Box to switch locations.

Model No.	Description	Price Each
540	Switch-O-Lite	\$12.60
60	Momentary Contact Switch	.75
48	Cylindrical Switch (fits 1/2-inch aperture on Switch-O-Lite)	1.00

HOFFMAN JUNCTION BOXES

Cast Aluminum—100 Ampere Capacity

Specially designed Junction Boxes for use with underground cable. For service entrance, building entrance, and building to building wiring. No solder, splicing, tape or special connectors necessary.

All junction box cases are made of corrosion resisting cast aluminum and are furnished with weather-tight gasketed cast aluminum covers. Hubs are of solid cast aluminum integral with the case and are taper pipe-tapped for conduit of the sizes listed below. Each bus bar is machined from a single piece of solid copper and provides a means for making connections which is neat, secure, and convenient. The "hot" bus bars are supported by insulating panel bars of Micarta or approved ceramic material and are of ample strength and proportion. The neutral bus bar is grounded to the box.

Bus Bars:

A-50—Each bus bar accommodates two No. 2 and two No. 6 or a larger number of smaller wires.

A-70 and A-72—Each bus bar accommodates two No. 2 and two No. 6 or a larger number of smaller wires.

A-90—Each bus bar accommodates two No. 2, or four No. 6, or a larger number of smaller wires.

No. A-70

KEES TRANSFORMER CABINETS

FOR TWO TRANSFORMERS

For Indoor Primary Metering High Capacity,
Low Voltage Loads

16 gauge galvanized steel cabinet for indoor installation. Door hinged on long side. Edges of door overlap on all sides. Hasp and staple. Holes in back for wall mounting. Can be mounted in any position.

Knockouts for 2- and 2½-inch conduit. Two in each long side, one in each short side, also two 1-inch knockouts in each of four sides. Regular finish aluminum enamel. Size 20x32x10 inches deep. Bar for attaching transformers. Four U bolts. Shipping weight, 50 pounds.

Price, No. 92 Transformer Cabinet.....each **\$21.00**

KEES METER TEST BLOCK

60 or 100 Ampere, 220 Volt

Simple, compact, low in price. Easily connected and manipulated. Screw-driver is the only tool required to make the test.

Connections are solderless; a saddle-clamp of unique design eliminates soldering and special meter leads. No loose parts. All current carrying surfaces are completely accessible for inspection. Sequence of connection: Line on left, load on right.

Base, porcelain. Other parts copper, except clamp screws, which are steel, cadmium plated. Size, 5½ inches wide, 2 inches high, 2 inches front to back. Weight 2½ pounds.

Price, No. 7775 Meter Test Block.....each **\$2.50**

MADISON SWITCH AND OUTLET BOX SUPPORTS

NO. 104 BOX SUPPORTING EAR

Can be attached to any outlet box of any diameter or depth and provide an outside supporting ear for the box. Ideal for installation in brick wall, fire places, bath rooms, kitchen sinks, etc.

MOGUL STYLE CONDUIT FITTINGS

Type MLB Fittings are intended for use on 4 1/2, 5 and 6-inch threaded conduit where it is necessary to have a right-angle bend. Each fitting comes equipped with cast metal cover and gasket, making it weather-proof.

Size Inches	Cat. No.	Price Each
4 1/2	MLB-11	\$70.00
5	MLB-12	80.00
6	MLB-13	150.00

The design of these fittings makes them suitable for use with two million circular mil cable or smaller.

KILLARK EXPLOSION-PROOF CONDUIT FITTINGS
FOR HAZARDOUS PLACES

Listed as Standard for Class I, Group D Locations
Class I, Group C Locations; Class II, Group G Locations

Type GRD has a Screw Cover. Furnished with Threaded Internal Hubs or Union Hubs
Body and Cover Without Hubs — \$2.00 list

(Hubs Extended for Illustration Purposes Only)

The sketches to the left show the locations at which the various sized hubs can be placed. Each order for this series of fittings should clearly indicate by letters, at what position the conduit hubs should be located, and also what size and kind of hubs are wanted. The symbol for the various sizes and kinds of hubs will be found in the schedule below.
Note: Where only one hub is required on a side, it will be located in the center, unless otherwise specified.

THREADED INTERNAL HUBS AND UNION HUBS FOR TYPE GRD
Sizes In Which Hubs Can Be Furnished

Locations			Union Hubs		Threaded Internal Hubs	
A-B-C-D-E-F-G-H			1/2-3/4-1 Inch		1/2-3/4-1-1 1/4 Inch	
K-L-M-N			1/2-3/4-1-1 1/4 Inch		1/2-3/4-1-1 1/4 Inch	
O-P-Q-R-S-T-U-V-W-X-Y-Z					1/2-3/4 Inch	
AA-BA			1/2-3/4-1 Inch		1/2-3/4-1-1 1/4-1 1/2-2 Inch	
CA			1/2-3/4-1-1 1/4-1 1/2-2 Inch		1/2-3/4-1-1 1/4-1 1/2-2 Inch	
DA-EA-FA-GA			1/2-3/4-1 Inch		1/2-3/4-1 Inch	

Threaded Hubs			Union Hubs		
Symbol No.	Size, Inches	List, Each	Symbol No.	Size, Inches	List, Each
1	1/2	\$1.20	11	1/2	\$2.00
2	3/4	1.30	12	3/4	2.00
3	1	1.50	13	1	2.40
4	1 1/4	1.80	14	1 1/4	3.50
5	1 1/2	2.30	15	1 1/2	6.00
6	2	3.00	16	2	8.00

For example: If you wish a fitting with a 1 1/4" Upper Union Hub and 2 Lower 3/4" Threaded Hubs it would be called Type GRD with K-14 and FE-2 Hubs, price: \$2.00 plus \$1.75, plus \$1.30 or a total of \$5.05.

KILLARK EXPLOSION-PROOF FITTINGS FOR HAZARDOUS PLACES

Listed as Standard for Class I, Group D Locations
Class I, Group C Locations; Class II
Group G Locations

TYPE GRS SCREW COVER FITTINGS

Universal type of explosion-proof fitting with seven standard 3/4-inch hubs. Unused hubs are shut off with close-up plugs. A hub in the back can also be furnished. A union connector can be inserted in any hub to take 1/2-inch or 3/4-inch conduit.

Cat. No.	Hubs, Size	Wt. Lbs. Each	Price Each
GRS	(7)—3/4 inch	1 1/2	\$5.80
GRSA	(8)—3/4" One Hub in Back	1 1/2	5.80

TYPE GESMU SCREW COVER FITTING

Roomy junction box with 1-inch center union hub. Upper hubs threaded, union hubs on lower side.

Threaded Hubs—A-B-C-D-H-3/4"

only.

Union Hubs — E-G-1/2" or 3/4"; F-1" only.

Furnished with four close-up plugs.

Back Hub "H"

Cat. No.	Hubs, Size	Wt. Lbs. Each	Price Each
GESMU	Threaded Hubs (5)—1/4" (2)—1/2" or 3/4" (1)—1"	5	\$7.90

Type GEST

SERIES GES (5-inch Diameter)

A round explosion-proof fitting 5 inches in diameter. Furnished with threaded screw cover.

Made of brass. 1-inch union hubs in any or all four directions.

Cat. No.	Size	Price Each
GESC-1	1/2	\$6.20

SERIES GEC — (3 3/4-INCH DIAMETER)

GECME

Round explosion-proof fittings, 3 3/4 inches in diameter. Made with a threaded screw cover. Number of union hubs up to three pointed downward and up to two pointed upward. Hubs are equipped with rings for either 1/2-inch or 3/4-inch conduit. Rings are interchangeable, so that by removing a 1/2-inch ring and substituting a 3/4-inch ring, union hubs can be changed from 1/2-inch to 3/4-inch and vice versa. These fittings have threaded brass covers.

ESH SERIES EXPLOSION-PROOF SEALED HOSPITAL SWITCH UNILET

(Patent Pending)

CLASS I, GROUPS C AND D

Type "ESHS" Single-gang
Explosion-proof Sealed
Hospital Switch Unilet

Designed for use in hospital operating rooms. These sealed switches are made in accordance with requirements for hazardous locations. The switching device is sealed with wire leads furnished for connection purposes. The splices are made in a Unilet body making the complete assembly an explosion-proof unit without the use of Sealing Unilets.

TYPE ESHS SINGLE-GANG

Unilet bodies have one ½-inch conduit hub on each of four sides. One hub is open and the other three have close-up plugs. S-P., 10 A. 125 V.; 5 A. 250 V. D-P., 10 A. 250 V.

ESH SERIES EXPLOSION-PROOF SEALED HOSPITAL RECEPTACLE AND PLUG

(Patent Pending)

CLASS I, GROUPS C AND D

Type "ESHR" Explosion-proof
Sealed Hospital Receptacle
(sectional view)

Designed for use in hospital rooms. Made in accordance with requirements for hazardous locations. All wire leads are sealed and connections made in Unilet body furnished. Adjustments for surface mounting is provided through means of an adjustable sleeve in Unilet.

The receptacle member is a sealed unit with an inter-locking switch whereby the plug may be inserted or withdrawn only when switch is in "off" position. Likewise, the switch handle cannot be moved to the "on" position until plug is seated and in electrical contact with the receptacle. This device being a sealed Explosion-proof unit, does not require the use of additional Sealing Unilets.

TYPE ESHR

Unilet body is furnished with two openings on one side and one opening on each of three sides for ½-inch rigid conduit (heavy-wall). Four of the openings have close-up plugs.

Rating: 2-wire, 3-pole, 10 Amp. 125 volt, ½ H.P. 115 volt.

"DTQ" SERIES DUST-TIGHT DEAD-END CIRCUIT BREAKING PLUGS AND RECEPTACLES

FOR USE IN HAZARDOUS LOCATIONS

Class II, Group G

With Lift
Cover Housing

Made in two styles. Style 1 is for use in ordinary installations where the plug sleeve and the receptacle housing may serve as a safety circuit. Provision is made for connecting the safety circuit to the plug sleeve.

Style 2 has an extra pole for grounding and is for use in places where excessive corrosion exists. Under such or similar conditions the Style 1 would not be safe.

Consequently, the safety circuit of Style 2 is positive through the use of the extra pole. The latter is made longer so that contact between the plug and receptacle is made first and broken last on this safety circuit. On both Style 1 and Style 2, the safety circuit contact in the plug is bonded to the plug sleeve, and in the receptacle, to the housing or Unilet.

TYPE DTQEE		STYLE 1 Grounded Through Shell		STYLE 2 Grounded Through Shell & Extra Pole

APPLETON EXTENSION CABLE CONNECTORS

TYPE BRC EXTENSION CABLE CONNECTORS

For Flexible Cable

Electric power for portable electrical apparatus is generally supplied from a plug receptacle source of current. In the case of small devices, the usual method is to attach a portable cord or cable permanently to the portable device and at the other end, the cable may terminate in a suitable plug to be inserted in a receptacle.

Where portable apparatus taking large current is used, the portable cable becomes large and depending upon the length of cable used, this usually becomes very difficult and almost impossible to handle. This difficulty may be overcome by making up the cable in several suitable lengths, using the Type "BRC" Connector at one end and a plug at the other end.

As each cable requires both a plug and a receptacle, the connectors are listed complete as shown in illustration.

Furnished with gland nuts, rubber bushings and cord grips with cast aluminum handle.

20 Amp., 125 V. D.C.—30 Amp., 230 V. A.C.

EVDT DUST-TIGHT HAND LAMP

For Class II, Group G Locations

Especially constructed for use in dust-laden, hazardous locations. In the design of this lamp, particular care was taken to protect the insulating characteristics of type S rubber covered cord from heat concentration. This point and other requirements of the Underwriters' Laboratories for Class II, Group G locations have been strictly observed throughout.

Relamping is probably the outstanding feature of this lamp. Bulbs are quickly and easily renewed by merely turning out the handle unit which carries the entire socket-lamp assembly. Designed to take up to and including 40-watt lamps.

APPLETON SPECIAL "REA" CONDUIT FITTINGS

FOR RURAL ELECTRIFICATION WIRING (Weathertight)

Appleton Special "REA" Conduit Fittings (Weatherproof) have been designed expressly to meet the needs for inexpensive, well-made Lighting Fixtures, Wall Receptacles and Switches (all weathertight) for use in R.E.A. wiring.

For lighting basements, woodsheds, garages, poultry houses, cow-stables, milk houses, shops, pumphouses and numerous other places about the modern, up-to-the-minute farm buildings and yards.

LIGHTWEIGHT LIGHTING FIXTURES**TYPE "RVA"**

With Globe, No Guard

Hub at top tapped for 1/2-inch Rigid Conduit (heavy-wall).

Cat. No.	Size Inch	Watts	Wt. Lbs. Each
CF-REA1	1/2	100	3

TYPE "ROB"

With Globe, No Guard

With 4-inch square plate for 4-inch Square or 3 1/4 and 4-inch Octagonal Outlet Boxes.

Cat. No.	Style Plate	Watts	Wt. Lbs. Each
CF-REA2	4" Sq.	100	3

TYPE "RBVA"

L-M FIBRE CONDUIT

L-M Type I Fibre Conduit is especially designed for permanent underground installation with concrete encasement.

This conduit is composed of cellulose wood fibres impregnated with ever-lasting tar pitch. It is highly resistant to water, corrosion, moisture and is chemically inert providing true and lasting cable protection.

The bore of L-M fibre conduit is perfectly smooth to prevent all possibility of injury to cable sheath. The joints and fittings are accurately machined making the entire installation waterproof.

All lengths and fittings are uniform in construction.

L-M Fibre Conduit is light in weight with high tensile strength permitting easy handling and rapid installation with a minimum of breakage.

L-M offers a complete line of equipment for fibre conduit installation. Complete details and specifications sent upon request.

L-M COMPLETE UNDERGROUND INSTALLATION EQUIPMENT

Due to the limited space, the listing and specifications of L-M Fibre Conduit is necessarily condensed. However, the L-M line of underground equipment covers material for a complete underground installation.

Details and specifications of L-M Underground Construction specialties will be furnished on request.

NATIONAL ELECTRIC

CONDUIT SYSTEMS

SHERARDUCT—Full weight, threaded, rigid steel conduit fortified against rust and corrosion by the "Sheardizing" process for life-time protection.

NEPCODUCT—The steel underfloor duct system that provides convenience outlets at the floor surface. For power, lighting, telephone and signal service in any type of floor construction.

XDUCT JUNIOR—Electrical Metallic Tubing. Electro-galvanized, then further protected inside by a smooth, lustrous coating of clear, durable enamel.

FLEXSTEEL—Galvanized, flexible-steel conduit. Continuous runs from outlet to outlet reduce installation costs. Provides an economical "pull-in pull-out," grounded systems.

BUS SYSTEMS

LO-LOSS FEEDER BUS

Highest transmission efficiency due to low voltage drop with all types of load. Recommended for long feeder runs.

STANDARD FEEDER BUS TYPE "A" HOUSING

For normal runs between transformer bank and switch-gear equipment. Housings for both indoor and outdoor installations.

I.P.I. "PLUG-IN" BUS

For branch runs from feeder bus. Plug-in openings, staggered on 15-inch centers on two sides, permit insertion of devices every 7½ inches.

FOR ALL SYSTEMS

NE insulated building wires and cables, connectors, boxes and accessories to meet the requirements of any wiring job.

WIRING SYSTEMS

**Engineered to
Fit the Job**

WIRED SYSTEMS

NON-METALLIC SHEATHED CABLES

CANVAS BACK LOOMWIRE—A new, small diameter cable for dry locations — normal requirements. Each conductor carries full insulation to terminal screw. Has a saturated, fire-retardant, moisture resistant, cotton-braided sheath.

NE-o-PRENE LOOMWIRE—The first Neoprene-sheathed Loomwire to be listed by U/L. For damp locations, stable, farm buildings — where rot, fungus, moisture, ammonia-laden air and drastic weather conditions are destructive to other approved wiring.

A.B.C. ARMORED BUSHED CABLE—Complete, ready-to-use grounded wiring system. Sizes 14 and 12 have low-resistance grounding strip. Furnished with "Dilec Safecote" insulated wires.

PLUG-IN STRIP—"Constant Service" 2-Wire and "Switch-controlled" 3-wire multi-outlet assemblies. Outlets every 18" or 6". For residential or commercial use.

3-Wire PLUG-IN STRIP provides wall-switch control for lamps, plus constant service for clocks, radios, electric blankets and appliances. Each receptacle — a choice of two services.

RACEWAY SYSTEMS

XTENSIONDUCT—For extending circuits along walls and ceilings. Made with the "lay-in" feature. No wire fishing necessary. Attach the base, lay-in the wires, snap on the capping.

METAL MOLDING—For main lighting distribution and multiple branch circuits — also has the "lay-in" principle.

4x4 WIREWA—A hinged-lid steel wireway for feeders, branch circuits, control and signal wiring up to 600 volts. Speeds power re-wiring. Eliminates exposed wiring hazards.

FLORDUCT—For across-the-floor service. Bump-proof, mop-proof, trip-proof — another NE raceway with the "lay-in" principle.

SURFACEDUCT—A 2-piece, all-purpose industrial "lay-in" raceway for every type of service up to 60 amp. Accommodates all manufacturers' approved devices.

Everything in wiring points to NE

Two-Gang Switch and Receptacle Box Adapter

4⅞x5x¾ inches deep, with eight double twistouts.

Cat. No.	Unit Pkg.	Std. Pkg.	Wt., Lbs., Std. Pkg.
*442	1	10	7

*Can be furnished up to 6-gang.

NATIONAL ELECTRIC METAL MOLDING AND FITTINGS

333 METAL MOLDING CANOPY BASES

4 3/4-Inch Split Canopy Base Plate and Closed Cover

Combination 1/2-inch conduit KO and drop-cord eyelet. Six double twistouts.

Cat. No.	Unit Pkg.	Std. Pkg.	Wt.,Lbs., Std.Pkg.
361	5	20	35

4 3/4-Inch Split Canopy Base Plate and Cover

Two pairs 8-32 tapped holes on 3 1/4-inch and 4-inch centers for standard outlet box covers or devices. Six double twistouts.

Cat. No.	Unit Pkg.	Std. Pkg.	Wt.,Lbs., Std.Pkg.
362	5	50	30

6 1/2-Inch Split Canopy Base Plate and Cover

Two pairs 8-32 tapped holes on 3 1/4-inch and 4-inch centers for standard outlet box covers or devices. Six double twistouts.

Cat. No.	Unit Pkg.	Std. Pkg.	Wt.,Lbs., Std.Pkg.
367	5	20	23

4 3/4-Inch Canopy Base Plate and Cover

Two pairs 8-32 tapped holes on 3 1/4-inch and 4-inch centers. For standard outlet box covers or devices. Five 1/2-inch conduit KOs in plate. Six double twistouts.

Cat. No.	Unit Pkg.	Std. Pkg.	Wt.,Lbs., Std.Pkg.
365	5	50	36

Canopy Base Plate and Cover

Same as 365 but with 3/8-inch male fixture stud on plate.

Cat. No.	Unit Pkg.	Std. Pkg.	Wt.,Lbs., Std.Pkg.
365-A	5	50	37

6 1/2-Inch Canopy Base Plate and Cover

Two pairs 8-32 tapped holes on 3 1/4-inch and 4-inch centers for standard outlet box covers, and devices. Five 1/2-inch KOs. Six double twistouts.

Cat. No.	Unit Pkg.	Std. Pkg.	Wt.,Lbs., Std.Pkg.
366	5	20	25

4-Inch Blank Cover

With combination 1/2-inch conduit KO and drop-cord eyelet. For use with 362, 365, 365-A, 366, 367.

Cat. No.	Unit Pkg.	Std. Pkg.	Wt.,Lbs., Std.Pkg.
365-X	5	50	10

NATIONAL ELECTRIC METAL MOLDING AND FITTINGS

333 METAL MOLDING AUXILIARY DEVICES

Terminal Block

For 348-X Drop-Cord Rosette.

Cat. No.	Unit Pkg.	Std. Pkg.	Wt.,Lbs., Std.Pkg.
340-X	5	20	6

2 1/2-Inch Fixture Rosette

With terminal block; combination bushing for 1/8- and 3/8-inch pipe; push-fit base. Four double twistouts.

Cat. No.	Unit Pkg.	Std. Pkg.	Wt.,Lbs., Std.Pkg.
430	5	20	16

3-Inch Keyless Receptacle

Threaded for Uno shadeholder. 660-watt; push-fit base; four double twistouts.

Cat. No.	Unit Pkg.	Std. Pkg.	Wt.,Lbs., Std.Pkg.
356-X	5	50	22

3-Inch T-Slot Receptacle

660-watt. Push-fit base; four double twistouts.

Cat. No.	Unit Pkg.	Std. Pkg.	Wt.,Lbs., Std.Pkg.
360-X	5	50	24

2 1/2-Inch Receptacle Base

With terminal block for fluted shell sockets and devices; push-fit base, four double twistouts.

Cat. No.	Unit Pkg.	Std. Pkg.	Wt.,Lbs., Std.Pkg.
400	5	50	16

3-Inch Receptacle Base

With terminal block for fluted shell sockets and devices. Push-fit base, four double twistouts.

Cat. No.	Unit Pkg.	Std. Pkg.	Wt.,Lbs., Std.Pkg.
400-X	5	50	21

NATIONAL ELECTRIC XTENSIONDUCT

111 XTENSIONDUCT

Neutral Gray finish—two-piece—base and capping. Packed 20 lengths, 5 ft. long in sealed corrugated container.

Capacity, Single Conductor: Type R or RH—2 No. 12; 3 No. 14. Type T or TW and RU—3 No. 12; 3 No. 14. Annunciator, 10; Telephone Twisted Pair, 4.

Listed and approved by Underwriters' Laboratories, Inc.

Cat. No.	Unit Pkg.	Std. Pkg.	Wt., Lbs., Std. Pkg.
111	100 feet	1000 feet	160

XTENSIONDUCT FITTINGS

Coupling

For connecting base. Capping should overlap joint. (If coupling is not used the capping of Xtensionduct must overlap the joint in base to provide electrical continuity).

Cat. No.	Unit Pkg.	Std. Pkg.	Wt., Lbs., Std. Pkg.
144	10	50	1

External Elbow Cap

For use at outside corners. 90 degrees.

Cat. No.	Unit Pkg.	Std. Pkg.	Wt., Lbs., Std. Pkg.
137	5	50	1½

Internal Elbow Cap

For use at outside corners. 90 degrees.

Cat. No.	Unit Pkg.	Std. Pkg.	Wt., Lbs., Std. Pkg.
138	5	50	1½

Flat Elbow

For use at left or right bends in Xtensionduct, 90 degrees. Supplied with base.

Cat. No.	Unit Pkg.	Std. Pkg.	Wt., Lbs., Std. Pkg.
136	5	50	2

Baseboard Offset Elbow

For runs from face to top of baseboard. Supplied with base.

Cat. No.	Unit Pkg.	Std. Pkg.	Wt., Lbs., Std. Pkg.
176	5	20	2

Cutting and Notching Gauge

Miter gauge which assures close and neat-fitting joints and corners.

Cat. No.	Unit Pkg.	Std. Pkg.	Wt., Lbs., Std. Pkg.
122	1	1	1¼

NATIONAL ELECTRIC XTENSIONDUCT FITTINGS

XTENSIONDUCT FITTINGS

Low-Potential Fiber Bushing

Used where Xtensionduct is used without fittings for covering bell or signal wire.

Cat. No.	Unit Pkg.	Std. Pkg.	Wt., Lbs., Std. Pkg.
100	10	100	1

Adapter

Connects Xtensionduct to No. 333 metal molding fittings.

Cat. No.	Unit Pkg.	Std. Pkg.	Wt., Lbs., Std. Pkg.
113	10	50	3

Box-Extension Adapter

To accommodate extensions from outlets requiring other than standard convenience receptacles. This fitting may be used with any standard wiring device including P & S Despard Line.

Cat. No.	Unit Pkg.	Std. Pkg.	Wt., Lbs., Std. Pkg.
139	1	20	5

Box-Extension Device

To accommodate extensions from existing outlets. Includes plate and T-slot receptacle.

Cat. No.	Unit Pkg.	Std. Pkg.	Wt., Lbs., Std. Pkg.
141	1	20	10

Duplex Receptacle with Parallel Slots

Consists of parallel slot duplex receptacle and steel housing for surface-mounting. Four twistouts for Molding or Xtensionduct.

Cat. No.	Unit Pkg.	Std. Pkg.	Wt., Lbs., Std. Pkg.
350	1	20	9

Duplex Receptacle with T-Slots

Consists of T-slot duplex receptacle and steel housing for surface-mounting. Four twistouts for molding or Xtensionduct.

Cat. No.	Unit Pkg.	Std. Pkg.	Wt., Lbs., Std. Pkg.
350-T	1	20	9

Single-Pole Toggle Switch

Consists of toggle-switch and steel housing for surface-mounting. Four twistouts for Molding or Xtensionduct.

Cat. No.	Unit Pkg.	Std. Pkg.	Wt., Lbs., Std. Pkg.
351	1	20	8

NATIONAL ELECTRIC FLORDUCT

Florduct consists of two pieces, base and capping so formed as to "snap" together—the capping snapping over the base. The capping is a ramp-like plate offering the minimum of obstruction. Florduct makes practical surface floor wiring across aisles and will stand the abuse of hand-trucks and office traffic.

Neutral gray finish.

Approved by Underwriters' Laboratories, Inc.

NATIONAL ELECTRIC 4-BY-4 WIREWA
Patent Applied For

544-W1

544-W5

544-C

(★) Standard Coupling is included on all items marked (★)

544-W2

★4X4 WIREWA

Flangeless, streamlined, steel, rigid wireway, having spring-latched hinged cover, completely accessible, for housing electrical conductors. Knock-out clusters for ½-, ¾-, 1-, 1¼- and 1½-inch conduit, alternated with ½- and ¾-inch clusters are provided on 4½-inch centers in the back and sides for extensions. The interior of Wirewa is smooth and clean to facilitate the insertion of conductors. Standard finish is baked Black Enamel.

Cat. No.	Length	Wt., Lbs.
★544-W5	5 Ft. Long with Coupling	18
★544-W2	2 Ft. Long with Coupling	8½
★544-W1	1 Ft. Long with Coupling	5
544-C	Standard Clamp-type Coupling	

★4X4 3-INCH CONDUIT END-FITTINGS

Conduit end-fittings are threaded castings designed for rigid conduit connection to Wirewa cutout cabinets or pull-boxes. All surfaces are smooth to facilitate insertion of conductors. (Cat. No. 544-EC should be ordered where conduits smaller

than 3 inches are brought directly into Wirewa ends).

Cat. No.	Description	Wt., Lbs.
★544-C30M	With Coupling, male threads	2

4X4 PIECE-OUT COUPLING AND COLLAR

It sometimes is necessary to cut off a standard section of Wirewa to meet construction conditions. This fitting is used to join the cut off section with the adjoining section. No drilling or

other work required. Setscrews provide grounding continuity as they grip cut off section of Wirewa.

Cat. No.	Description	Wt., Lbs.
544-PC	Coupling and Collar	1¼

(★) Standard coupling is included on all items marked (★).

Also available in galvanized 4X4 Wirewa and fittings, and in 4X4 Wirewa without knockouts.

Cat. No.	Description	Wt., Lbs.
544-A	Coupling and Adapter	¾

4X4 BOX CONNECTOR COUPLING AND ADAPTER

This fitting is for use in connecting Wirewa runs to panel-board cabinets, pull-boxes, terminating in end-plates. Bolts and nuts are furnished for fastening in place.

★4X4 NIPPLES

These fittings are short lengths of Wirewa for insertion between standard sections to meet dimensional requirements where a 1-foot section or Slip-Fitting cannot be used.

544-N3

544-N6

Cat. No.	Length	Wt., Lbs.
★544-N3	3 Inches Long with Coupling	1¾
★544-N6	6 Inches Long with Coupling	2½

4X4 ½-INCH NIPPLE COUPLING

Coupling and nipple combined for use to meet slight dimensional requirements where longer Nipples or Slip-Fittings cannot be used.

Cat. No.	Description	Wt., Lbs.
544-NC	½" Nipple and Coupling Complete	¾

NATIONAL ELECTRIC 4-BY-4 WIREWA

★4X4 SLIP-FITTING

Adjustable fitting for conveniently joining sections together at distances of from 10 to 16 inches where standard lengths cannot be used. It also is adapted to take up the irregular lengths required to extend to panelboard cabinets or pull-boxes. Setscrews

lock the sliding portions in position and also provide grounding continuity.

Cat. No.	Description	Wt., Lbs.
★544-SF	10-Inch Min. to 16-Inch Max. with Coupling	6¼

★4X4 90° PULL-BOX ELBOWS

Three-purpose fitting providing a 90° elbow, a spring-latched, hinged-cover, roomy pull-box for pulling and splicing conductors and knockout clusters in back and sides for branch extensions.

Cat. No.	Description	Wt., Lbs.
★544-PL9	With Coupling	5½

★4X4 ELBOWS

★544-L90

★544-L45

★544-L22½

For making changes in directions such as bends of varying radii and for offsets of most any angle.

Cat. No.	Degrees	Wt., Lbs.
★544-L90	90° with Coupling.....	4½
★544-L45	45° with Coupling.....	2½
★544-L22½	22½° with Coupling.....	2

(★) Standard coupling is included on all items marked (★).

Also available in galvanized 4X4 Wirewa and fittings, and in 4X4 Wirewa without knockouts.

★4X4 X PULL-BOX

Junction box with Wirewa extension provisions in four directions. Has knockout cluster in back and is provided with slide bolt, two-section hinged cover.

Cat. No.	Description	Wt., Lbs.
★544-XB	With Coupling	9½

★4X4 TEE PULL-BOX

Combination fitting for straight-through wiring or future extension, right-angle change in direction, pull-box with knockout clusters in top and one side and having hinged-cover with spring-latch.

Cat. No.	Description	Wt., Lbs.
★544-TB	With Coupling	7¼

★4X4-INCH SQUARE JUNCTION BOX

Has knockout clusters in four sides, two sides are removable for accessibility. May be used in cramped locations and where larger ell and T-pull-boxes are not necessary.

Cat. No.	Description	Wt., Lbs.
★544-B4	With Coupling	2½

NATIONAL ELECTRIC 4-BY-4 WIREWA

4X4 PULL-BOX

Cat. No.
544-B7

Size, Inches
7 $\frac{1}{8}$ x 7 $\frac{1}{8}$

Wt., Lbs.
4

The 544-B7 Pull-Box is designed for use where more space is required than 4-inch-square junction box provides for longer bending radii in conductors and for pulling and splicing conductors. (Cat. No. 544-EP End-Plates should be ordered and installed over all unused openings.)

4X4 PULL-BOX

Cat. No.
544-B12

Size, Inches
12 $\frac{3}{4}$ x 12 $\frac{3}{4}$

Wt., Lbs.
9 $\frac{1}{2}$

The 544-B12 Pull-Box is designed for use in multiple runs of Wirewa and where wiring conditions require more space than afforded by smaller fittings.

★4X4 ADAPTER

Cat. No.
★544-A25

Description
With Coupling

Wt., Lbs.
 $\frac{3}{4}$

This fitting is for connecting to cabinets, pull-boxes, etc., that are not wide enough to accommodate the 4-inch fittings. Bolts and nuts are provided for fastening the Adapter in place. Openings must be provided in the cabinets, etc., for inserting conductors and bolts.

★4X4 END-CLOSER

Cat. No.
★544-EC

Description
With Coupling

Wt., Lbs.
1 $\frac{1}{4}$

This fitting has a knockout cluster and provides a means of branching off with conduit, etc., or dead-ending a Wirewa run.

(★) Standard coupling is included on all items marked (★).

Also available in galvanized 4X4 Wirewa and fittings, and in 4X4 Wirewa without knockouts.

4X4 END-PLATE

Cat. No.
544-EP

Description
End-Plate

Wt., Lbs.
 $\frac{1}{4}$

This fitting is a flat plate provided with a knockout cluster and is for use in blanking all unused openings in junction boxes. Bolts and nuts are provided with this fitting.

4X4 HANGER—DROP TYPE

Fitting designed primarily for use in suspending Wirewa from the ceiling or roof and permits the cover to be opened in any position. No additional bolts required to fasten hanger to Wirewa.

Cat. No.
544-H

Size, Inches
3 x 4 $\frac{1}{4}$

Wt., Lbs.
 $\frac{1}{4}$

4X4 HANGER EXTENSION

Cat. No.
544-HE

Length, Inches
4 $\frac{3}{4}$

Wt., Lbs.
 $\frac{1}{4}$

Factory-made extensions are available for extending length of hanger in any desired adjustment in $\frac{1}{2}$ -inch steps.

4X4 HANGER—BRACKET TYPE

Designed for side-wall mounting with openings corresponding to the bolt holes in the base of the coupling. This fitting also

Cat. No.
544-HB

Size, Inches
2 $\frac{1}{2}$ High x 8 $\frac{1}{2}$

Wt., Lbs.
 $\frac{3}{4}$

is adapted for ceiling mounting with cover to the sides or bottom. Flathead bolts and nuts are provided with this fitting.

4X4 STANDARD COUPLING

Cat. No.
544-C

Description
Standard Coupling

Wt., Lbs.
 $\frac{3}{4}$

This clamp-type coupling, supplied with each fitting indicated is universal in its use. It not only joins adjacent sections of Wirewa together by means of its specially designed interlocking depressions but also securely clamps them in place, using only two husky, easily-handled bolts. Hangers can be attached to coupling after assembly. Holes are provided in the base of the coupling for fastening to any flat surface using bolts or screws. The coupling clamps around the Wirewa with the cover in any position. Specially-designed extrusions and setscrews establish positive grounding continuity.

NATIONAL ELECTRIC NEPCODUCT

STANDARD SYSTEM OF CONVENIENCE
OUTLETS IN THE FLOOR

For lighting and power, telephone and signal services to desks and free standing equipment.

Nepcoduct is a steel underfloor raceway system providing complete mechanical security and electrical

bonding as required by the National Electrical Code. One size raceway for both high and low potential wiring eliminates multiplicity of fittings. Nepcoduct is installed in all types of conventional floor construction. Junction boxes are provided for one, two and three duct systems.

Nepcoduct is installed when floor is laid and the outlets remain beneath the surface until needed. When electrical connections are wanted the outlets can be quickly opened and service fittings installed.

Service fittings are made of durable brushed brass or aluminum satin finish. Cover plates are used where service is discontinued.

Nepcoduct is furnished in 10 ft. lengths with outlets spaced every 24 inches. Outlets are processed in a manner to make fishing and wire pulling extremely easy. The outlets are screw-threaded for positively engaging Service Fittings and providing a continuous electrical ground.

Finished in either Black Enamel or Galvanized rust-proof finish.

Blank Duct

OUTLETS FLUSH WITH FINISHED FLOOR

SIDE ELEVATION OF SADDLE

Showing low position of adjustable saddle

The No. 7005 series with cross-section $1\frac{3}{4} \times 2\frac{3}{8}$ inches is furnished in ten-foot lengths. The third digit of catalog numbers (which are subject to change) indicates the number of outlets per ten-foot lengths.

Nepcoduct is rectangular in cross-section with corners rounded or filleted to minimize the tendency of the floor cracking when it is embedded in the concrete floors. The accepted depth of duct below the finished floor is $1\frac{1}{4}$ inches. Shape of entire system, including ducts, boxes, elbows, and top of duct outlets, must be given, and also give the full maximum inside area.

Cat. No.	No. Outlets Per 10 Feet	Outlet Dia., In.	Duct Size, Inches	Wt., Lbs., Per 100 Ft.

7725	For Large Nepcoduct

Duct Size, Inches	Wt., Ozs., Each
$1\frac{3}{4} \times 2\frac{3}{8}$	12

SADDLE SUPPORTS

The Saddle Support is a two-piece assembly which harmonizes with progressive methods of installation, wherein the "layout crew" establishes all measurements and lines of duct by installing the base.

The base also serves as an indicator to all tradesmen, warning against interference, which is a very important item in costs. It can be installed as early in the building schedule as desired and withstands abuses of normal construction operations.

Cat. No.	Description	Duct Size, Inches	Wt., Lbs., Each
7405A to 7405B	Single duct	$1\frac{3}{4} \times 2\frac{3}{8}$	3/4
7455A to 7455D	For 2 ducts complete	$1\frac{3}{4} \times 2\frac{3}{8}$	1 1/2
7455-5A to 7455-5D	For 3 ducts.....	$1\frac{3}{4} \times 2\frac{3}{8}$	2

NEPCODUCT SIMPLIFIED UNDERFLOOR WIRING SYSTEM

ELBOWS AND OFFSETS

No. 7215
90° Floor Elbow

No. 7325
Cross-Under Offset

No. 7235 90° Vertical
Wall Elbow Short Radius

Nepcoduct Elbows and Offsets are formed from sections of duct, assuring unobstructed and smooth raceways without reducing the cross-sectional area. Black-Enameled or Sherardized.

Elbows and offsets shown and listed meet the usual run of building conditions.

Two 45° floor elbows coupled together in reverse directions form an ideal offset; the insertion of a section of duct between the elbows increases the distance of the offset. Long-radius wall elbows may be cut in two, and one section reversed for vertical offsets.

Cross-under offsets allow other ducts or conduits to cross within the floor thickness. The amount of offset is 1½ inches with offset width of 10 inches, which will accommodate two large and one small duct with standard ¾-inch spacing to cross. Overall length is 21 inches.

Elbows

Cat. No.	Radius, In.	Angle, Degrees	Duct Size, Inches	Wt. Lbs., Each
7235	3½	90	1½x2½	2½

7772	Reducer	1¼ to ½	5
7773	Reducer	1¼ to ¾	4
7774	Reducer	1¼ to 1	3

NEPCODUCT SIMPLIFIED UNDERFLOOR WIRING SYSTEM

ADAPTERS—DUCT TO CONDUIT

No. 7735
Duct to Conduit

No. 7765
Duct to Conduit
Male End

Conduit connections to some junction boxes require conduit adapters although most boxes are amply provided with conduit engagements. Conduit extending from the end of the duct often is required, and a complete line of adapters is listed to meet all requirements.

With the exception of Nos. 7762 and 7762-F, all conduit engagements are 1¼-inch size. When smaller conduits are to be used, conduit reducers Nos. 7772, 7773 or 7774 are necessary.

All conduit engagements in adapters are of the threadless type employing tangent bearing set-screws.

Adapters are malleable-iron casting.

Cat. No.	Description	Duct Size, Inches	Wt., Lbs., Each
7765-F	Female to 1—1¼" cond.	1½x2½	2½
7735	L. P. Male to 2—1¼" conduit	1½x2½	1½

NEPCODUCT SIMPLIFIED UNDERFLOOR WIRING SYSTEM JUNCTION BOXES

No. 7535-55

No. 7525-5

No. 7515

Nepcoduct Junction Boxes are two-piece castings with cross-overs incorporated with completely separated high- and low-potential compartments. In the Underfloorduct, as in any other wiring system, it is essential that the two be kept separate, which guards against any mischance.

Junction boxes may be brought to correct floor level conditions by the use of adjusting screws for leveling and rough height adjustment. Adjustable brass tops form a finer adjustment for height to meet newly finished floor elevations such as linoleum, cork or rubber.

Ducts are secured to the boxes by tangent bearing setscrews, assuring positive mechanical and electrical contact.

Cat. No.	Description	Duct Size, Inches	Wt. Lbs., Each
7515	Single compartment with single duct and four conduit openings	1 3/8 x 2 7/8	8
*7525-5	Two compartment, double duct	1 3/8 x 2 7/8	21
*7535-55	Three compartment, triple duct	3-1 3/8 x 2 7/8	43

*Partitions in multiple duct boxes can be omitted on special order.

APPLETON RSH SERIES MALLEABLE UNILETS

For Use as Junction Body with Heavy Cables

The Type RSHX Unilet has been designed to serve as a junction body for heavy cables and the Type RSHC Unilet with solid sides may also be used as an enclosure for single and double-pole fused cutouts of the following rating, viz., 61-400 amp., 250-volt and 61-200 amp., 600-volt.

APPLETON RS MALLEABLE UNILETS FOR JUNCTION WORK

Type RS Unilet
Complete with Hub Plates

This series of Unilets has been designed to meet certain requirements where it is necessary to tap a conduit system after the installation has been completed.

The RS series of Unilets with removable hub plates and cover makes it possible to run additional conduit from the system where a Unilet of this series has been installed in the line. It is necessary only to remove the blank plates and substitute plates with the desired size or number of hubs according to requirements. It is then possible to draw in the circuits and tap on to original lines without interruption of service.

Gaskets are provided for the top cover as well as blank plates and hub plates to make the Unilet watertight. Cap screws and gaskets are furnished with the Unilet body and not with the cover or hub plates.

COLUMBIA SCREW COVER PULL BOXES

These pull boxes can be supplied in any thickness of steel, and in every size required. Due to the use of large conduits, it is often necessary to use a heavier gauge of steel than is called for by the code.

Cabinets are furnished with standard knockouts. If special knockouts are required, a \$1.75 labor charge for each additional size change will be made regardless of the quantity of boxes ordered.

If boxes are wanted without knockouts, please mention it. Boxes without knockouts take list price less discount.

Prices are for boxes finished in black enamel. For galvanized finish, add 10 per cent. Sizes not listed at proportionate prices.

Special pull boxes of any design, size and specification adapted to any requirement, are made to your order.

NO. 16 GAUGE STEEL—STANDARD

NOTE: The list prices of sizes which are omitted in this list must be made of heavier gauge steel to conform with the National Electric Code.

STEEL CITY ADJUSTABLE GANG FLOOR OUTLETS—ORIGINAL FULLMAN TYPE

These watertight rectangular gang floor boxes are for supplying a variety of services such as electric lights, fans, telephones, etc.—they appear neater than several individual outlets.

Like the Steel City Adjustable Round Floor boxes, their chief advantage lies in the ease with which the adjustable top can be set level with the finished floor line. Installed in concrete floors with the least amount of time and labor, and in addition, effect savings in conduit and wire.

No. 441 Adjustable Floor Outlet with No. 466 Nozzle

No. 442 Adjustable Floor Outlet with Two No. 466 Nozzles

No. 443 Adjustable Outlet with one No. 458 and Two No. 459 Cover Plates

COMPLETE STEEL CITY GANG FLOOR OUTLETS

Receptacles optional and cost extra. Any standard receptacle fits Steel City Original Fullman Floor Outlets, Adjustable Type.

Single-Gang

Cat. No.	Description	Approx. Wt. Lbs. Each

PARTS

Box Bodies

Made of gray iron; electro-galvanized or sherardized.

Lugs are provided on each adjusting frame for mounting receptacles, etc.

End sections have three holes tapped for ½-inch conduit; intermediate sections have two holes tapped for ½-inch conduit. Sections can be tapped for ¾ and 1-inch conduit with room for bushings or for 1¼-inch conduit without room for bushings.

Extra deep bodies can be furnished at additional cost, to take conduit up to 1½ inches with room for bushings. Sketches should be furnished showing size and location of conduit holes if special tapping is desired.

STEEL CITY ADJUSTABLE FLOOR OUTLETS

RECTANGULAR BOX — FULLMAN SCREW ADJUSTMENT TYPE

6542

Two-gang floor outlet similar to No. 442. Has four adjusting screws, one in each corner. Minimum height of box is $3\frac{1}{2}$ inches; maximum height 4 inches with $\frac{1}{8}$ inch of the adjusting frame still seated in the ring of box body. Can be tapped for 1-inch conduit with room for bushing or for $1\frac{1}{4}$ -inch conduit without bushing.

Cat. No.	Description	Wt. Lbs. Each
6542	Overall dims. $5\frac{1}{2}$ " wide, 7" long	12 $\frac{1}{2}$

STEEL CITY WATER-TIGHT JUNCTION BOXES

HEAVY WALL CAST IRON AND BRASS

Boxes may be tapped on four sides, $\frac{1}{2}$ or $\frac{3}{4}$ -inch with room for bushing. Drilling or drilling and tapping at extra charge. Boxes furnished complete with covers and gaskets as listed. Covers furnished plain or drilled and tapped with holes plugged, if desired.

Illustration shows round head screws. Can be furnished with flat head and counter sunk holes.

Floor Box Nozzles can be used in cover plates of these boxes. Standard finish, black enamel; galvanized or sherardized, extra.

NATIONAL ELECTRIC "PLUG-IN" STRIP TYPE CF-2 CONSTANT SERVICE

CF2-606-18

CF2-603-6—CF2-606-6

TYPE CF-3 SWITCH-CONTROLLED

CF3-606-18

One Receptacle—Two Services

With National Electric's newly developed type CF-3 switch-controlled "Plug-In" Strip you now have your choice of electrical service . . . switch control at wall switches or constant current . . . all in one receptacle.

National Electric 3-wire type CF-3 "Plug-In" Strip is the most versatile pre-wired Multi-Outlet Assembly on the market today. Truly designed for Modern Living . . . it provides a S-P-R-E-A-D of electrical outlets, every 18" around the room, to meet the demands of Adequate Wiring. Plus . . . dual service features in every outlet receptacle. Top and middle slots give switch control for lamps and other lighting arrangements. Bottom and middle receptacle slots provide constant current to clocks, radios and other appliances.

400% More Outlets—Cost No More Than Ordinary Wiring

Type CF-2, 2 wire constant service, and type CF-3, dual service, "Plug-In" Strip features Cut-In-The-Field installation and Crimp-on method of connection . . . for faster . . . safer . . . easier installations. Capping is locked-on in the factory and is tamper proof. Once installed, "Plug-In" Strip is a trouble free life time system. No screws or solder points to break loose. "Plug-In" Strip's baked enamel neutral satin gray finish may be repainted to blend with any interior wall surface.

National Electric "Plug-In" Strip comes in 6-ft. lengths with outlets every 18 inches. To meet the demand for outlets on close spacing for commercial and light manufacturing use or for over the kitchen food preparation areas type CF-2 "Plug-In" Strip units are available in 3-ft. and 6-ft. lengths with outlets on 6-inch spacings.

Easy, Simple Installation Means More Wiring Jobs

"Plug-In" Strip affords electricians and contractors an excellent opportunity to increase their wiring profits in new home construction, office and store rewiring as well as the modernization market in presently inadequately wired homes.

"Plug-In" Strip is wired with No. 12 AWG wire for 15 ampere, 125 volt or 10 ampere, 250 volt service. Furnished with 4 mounting clips and straps to facilitate either baseboard or chair rail height mounting.

Listed and approved by the Underwriters' Laboratories, Inc., the Canadian Standards Association, and complies with the regulations of the National Electrical Code.

NATIONAL ELECTRIC "PLUG-IN" STRIP

NE-600-1

NE-600-2

Crimp Connector (right)—Especially processed tinned copper barrel Connector that crimps into a solid conductor mass and allows no corrosion. Has No. 12 copper conductivity. Furnished with all "Plug-In" Strip fittings.

Insulator Tube (left)—Transparent vinylite tubing with high dielectric properties. The tube is heavy in stock to withstand abuse. It fits the point of connection snugly and remains securely in place. Furnished with all barrel Connectors.

NE-600 CRIMPING TOOL

NE Connector Tool. The approved tool for crimping a connector barrel to the "Plug-In" Strip conductors. This tool makes possible a complete and solid connection in less than ¼ the time of ordinary screw connection methods.

Has wire cutter and stripper for No. 12 and No. 14 solid wire.

CF-2 "PLUG-IN" STRIP FITTINGS

CF2-607 MOUNTING CLIP

Clips which fasten to the back of "Plug-in" Strip for mounting on top of baseboard. Clips furnished with every length of "Plug-in" Strip.

Cat. No.	Unit Pkg.	Std. Pkg.
CF2-607	50	100

CF2-645 MOUNTING STRAP

For use when mounting "Plug-in" Strip on the surface. Mounting Straps furnished with every length of "Plug-in" Strip.

NATIONAL ELECTRIC "PLUG-IN" STRIP 90 DEGREE AND STRAIGHT END JUNCTION BOX

CF2-617-L

CF2-617-R

For use as surface mounted feed — particularly for light commercial installations. ½-inch conduit knockouts on end and rear for connection of any type wiring. Furnished with Crimp Connectors and Insulator Tubes.

Cat. No.	Length Inches	Unit Pkg.	Std. Pkg.	Wt. Lbs. Per 100
CF2-617-L	6¾	5	20	25
CF2-617-R	6¾	5	20	25

CF2-629 DEVICE AND OUTLET BOX COVER

For use as cover plate on Device and Outlet Box feed installations. Furnished with two splicing jumpers and Insulator Tubes.

Tube ready for crimp - on connection. Overall length, 12 inches.

Cat. No.	Unit Pkg.	Std. Pkg.	Wt. Lbs. Std. Pkg.
CF2-629	5	20	10

CF2-636 FLAT ELBOW

Two-piece capping elbow — over base. Each capping leg of elbow acts as a coupling cover to adjoining length of "Plug-in" Strip. With Crimp Connectors and Insulator Tubes.

Cat. No.	Unit Pkg.	Std. Pkg.	Wt. Lbs. Std. Pkg.
CF2-636	5	20	7

CF2-637 EXTERIOR ELBOW

Two-piece capping Elbow — over base. Each capping leg of elbow acts as a coupling cover to adjoining length of "Plug-in" Strip. Furnished with 2 Crimp Connectors and Insulator Tubes. Overall length of elbow legs—5 inches.

Cat. No.	Unit Pkg.	Std. Pkg.	Wt. Lbs. Std. Pkg.
CF2-637	5	20	6½

CF2-638 INTERIOR ELBOW

Two-piece capping elbow — over base. Each capping leg of elbow acts as a coupling cover to adjoining length of "Plug-in" Strip. Furnished with Crimp Connectors and Insulator Tubes. Overall length of elbow legs, 5¼ inches.

Cat. No.	Unit Pkg.	Std. Pkg.	Wt. Lbs. Std. Pkg.
CF2-638	5	20	7½

CF2-644 COUPLING

Covers open ends of adjoining lengths of "Plug-in" Strip. Furnished with Crimp Connectors and Insulator Tubes.

Tubes — for connecting adjoining sections of "Plug-in" Strip.

Cat. No.	Length Inches	Unit Pkg.	Std. Pkg.	Wt. Lbs. Std. Pkg.
CF2-644	5	5	20	2½

NATIONAL ELECTRIC "PLUG-IN" STRIP CF2-680 END BLANK AND WIRE NUTS

Covers cut-back opening at termination of "Plug-in" Strip runs. Furnished with two wire nuts for insulating conductor ends.

Cat. No.	Length Inches	Unit Pkg.	Std. Pkg.	Wt. Lbs. Std. Pkg.
CF2-680	2½	5	20	1¼

CF2-623 CUTTING GAUGE

For use in cutting back "Plug-in" Strip and capping to desired measurements. "Cut in the field" principle of installation.

Cat. No.	Unit Pkg.	Std. Pkg.	Wt. Lbs. Std. Pkg.
CF2-623	1	1	1

NATIONAL ELECTRIC "LOPO-TRIM"

Lopo-Trim Features the "No Fishing Principle"
Just Tuck the Wires In.

Neutral Satin Gray Finish

Lopo-Trim is a hollow steel quarter round raceway used to carry low potential wires such as telephone, inter-communication or television antenna leads on top of the baseboard.

Lopo-Trim has a neutral satin gray finish, matching "Plug-in" Strip, and harmonizes with all tones used in interior decoration. It can be quickly repainted to match baseboard, floor or walls.

Lopo-Trim fits neatly on top of any standard baseboard or on top of National Electric "Plug-in" Strip and held in place by projecting steel prongs. It is easily lifted to provide change of telephone placement or addition of wires.

Approved by telephone companies, Lopo-Trim can now be versatily installed —

As a baseboard trim,

As a toe-plate where wall or baseboard meet,

As a low potential wiring raceway or chair-rail moulding,

As a quarter round trim above or beneath (or both) installations of National Electric "Plug-in" Strip.

Low potential wiring can be brought out of Lopo-Trim anywhere. Merely drill a hole through the rounded surface—insert a standard grommet and bring wires out. The 6-foot sections of Lopo-Trim match perfectly for continuous installation. Sections are cut to fit and corners mitered identically like wood quarter round.

Cat. No.	Lengths Feet	Standard Package	Wt. Lbs. Std. Pkg.
LT-606	5' 8"	18-5' 8" Lengths	20

NATIONAL ELECTRIC "PLUG-IN" STRIP

TYPE CF-3 "PLUG-IN" STRIP

Features Simplicity of Fittings

Installation of 3-Wire Switch Control "Plug-in" Strip is exactly the same as two-wire Strip . . . only one more conductor is crimped.

CF3-618 CENTER FEED JUNCTION BOX

For connecting circuit wires to 3-wire "Plug-in" Strip. Furnished with 3 splicing jumpers and Insulator Tubes ready for crimp-on connection. $\frac{1}{2}$ -inch conduit knockout in base. Overall length 11 inches.

CF3-616 END FEED JUNCTION BOX

Reversible End Feed Junction Box accommodates circuit feed-ins on any end of 3-wire "Plug-in" Strip runs. Has $\frac{1}{2}$ -inch conduit knockout in base. Furnished with 3 Crimp Connectors and Insulator Tubes for crimp-on connection. Overall length $8\frac{1}{2}$ inches.

CF3-644 COUPLING CAPPING

Covers open end of adjoining lengths of "Plug-in" Strip. Furnished with Crimp Connectors and Insulator Tubes. Overall length 5 inches.

CF3-680 END BLANK AND WIRE NUTS

To cover cut-back opening at termination of "Plug-in" Strip runs. Furnished with three Wire Nuts for insulating conductor ends. Overall length $2\frac{1}{2}$ inches.

NATIONAL ELECTRIC "PLUG-IN" STRIP

3-WIRE "PLUG-IN" STRIP ELBOWS

CF3-637 EXTERIOR ELBOW

Elbow is one-piece capping over base. Capping leg of Elbow acts as Coupling Cover to adjoining length of "Plug-in" Strip. Elbows are furnished with three copper jumpers and Insulator Tubes ready for crimp-on connection. Overall length of each leg—5 inches.

CF3-638 INTERIOR ELBOW

Elbow is two-piece capping over base. Capping leg of Elbow acts as Coupling Cover to adjoining length of "Plug-in" Strip. Elbow is furnished with three copper jumpers and Insulator Tubes ready for crimp-on connection. Overall length of each leg—5 inches.

CF3-623 CUTTING GAUGE

For use in cutting back 3-wire "Plug-in" Strip and capping to desired measurements. See illustrated catalog No. 554 for "cut-in-the-field" principle of installation.

TRUMBULL FLEX-A-POWER**LVD (Low Voltage Drop) Flex-A-Power**

This modern feeder busway is available with current ratings of from 600 to 4000 amperes, in two-, three-, or four-pole construction, and is suitable for 600-volt service. Low voltage drop characteristics are the result of close bar spacings and interlaced construction which keep reactance to a minimum. Although LVD is generally used as a service entrance or as a high capacity feeder, it is ideally suited to many other applications, such as risers and resistance welder feeders.

Standard LVD section with edgewise bent bus bars. These standard joints are easily bolted together.

LVD enclosures have specially designed vents for efficient air flow. Insulating material which encloses each conductor individually, is mechanically strong, moisture resistant, and has a high factor of heat transmission.

A complete line of standard fittings is available, including end boxes, cable tap boxes, elbows, T's, offsets, etc.

Cable Tap Box

Bolted bus bar joint and cover. Copper bars are edgewise bent with an offset at end of each section to facilitate the alignment of conductors.

Typical Installation of LVD Flex-A-Power

Cross section showing standard hanger.

TRUMBULL LVD FLEX-A POWER

4000	(Eight) 1/4 x 2	(Four) 1/4 x 2	121.00	143.00

† Also available in 2 and 4 pole and multi-circuit arrangements

1. Standard ten-foot lengths and standard fittings should be used wherever possible.
2. Two hangers and necessary joint hardware are included with each section of busway.
3. For weather-resistant type and corrosion-resistant construction refer to

nearest district office

4. When an LVD run is estimated, if field measurements indicate a fraction of a foot, the next higher even foot should be figured.
5. Branch protective devices consisting of either fusible adapter switches, Type AT circuit breakers, or air circuit breakers, are available. Additional information on request.

(1) Price on Elbows and "T" Connections includes labor of forming only; no footage included.

(2) Price for Cable Tap Boxes includes labor of forming, material and lugs. Capacity of Cable Tap Boxes is determined by the number of lugs and type of wire used.

All standard Size I Cable Tap Boxes are provided with two S1250½A lugs per pole and one S1250½A lug per neutral. Alternate lug arrange-

Size II Cable Tap Boxes furnished with lugs as follows:

LVD Ampere Rating	Lugs per Pole	Lugs per Neutral	Lug Size
600	2	1	S1250½A
800	2	1	S1251½A
1000	3	2	S1250½A
1350	3	2	S1251½A
1600	4	2	S1251½A
2000	5	3	S1251½A
2500, 3000, 4000	6	3	S1251½A

ments can be furnished as specified, not to exceed two per pole and one per neutral in sizes S1248½A to S1250½A inclusive.

Alternate lug arrangements can be furnished with a maximum of six per pole and three per neutral in sizes S1248½A through S1251½A. When desired number of lugs exceeds the quantity indicated in the above table, refer to district office for prices.

- (3) List price includes material and labor of forming.
- (4) Flange connections and Ebony End Closures: List price includes material and labor of forming. Bus bar extensions and cutouts in switchboards or similar equipment NOT included.
- (5) Transformer tap openings: List price includes opening in side of housing and ebony plate with necessary labor and material. Bus bar extensions NOT included.
- (6) Copper bus bar extensions: List price per foot includes material and labor of forming for straight and formed extensions.

TRUMBULL FLEX-A-POWER

Type FVK

Standard 10-ft. lengths

This plug-in busway is available in current ratings from 225 to 1000 amperes. The two- and three-pole designs are suitable for 600-volt service. The three-phase, four-wire design is listed for 120/208-volt service but it can be obtained for 277/480-volt service in current ratings from 225 to 600 amperes. Convenient power outlets are provided on 12" centers along the housing. Power takeoffs are made by means of Flex-A-Plugs which contain fusible switches or enclosed circuit breakers. Since these devices are easily installed or relocated as desired, FVK generally feeds power to a number of individual loads at various points along the run. Thus, because FVK is so convenient, it is often considered to be a panelboard running the length of the plant.

TRUMBULL FLEX-A-POWER

LTG Flex-A-Power

This unusually rugged, plug-in or trolley busway is rated 50 amperes. It is available in two-, three-, or four-pole construction, and is rated 250 volts. When employed as a plug-in busway, it is generally used to supply lighting, combined power and lighting, or small power loads. As a trolley busway it is used to feed portable tools, cutting machines, small cranes, etc. Because of its many applications, it is the most versatile member of the Flex-A-Power family.

TRUMBULL FLEX-A-POWER TK Flex-A-Power

This 100* ampere heavy duty trolley busway is available in two or three pole construction and is suitable for 575-volt service. It is generally used for large cranes or portable tools, although it can be used wherever a mobile power take off is required.

10-foot length showing housing construction and bus bars

Method of installing or removing a trolley collector

Trolley Collector

Trolley-closur Radii

TROLLEY-CLOSUR was developed to provide industry with a safer, better standardized system for supplying power to portable electrically driven tools, hoists, cranes, drills, screw drivers, cutting machines, special high-frequency, high-speed tools. This System is used extensively as a feeder in crane-ways, supplying power to the crane bridge. It also is employed on the bridge to provide power take-off for the transverse travel motor of the hoist and to feed the motor hoist.

Radius sections permit Trolley-Closur to be used paralleling mono-rail systems providing mobile power to electric hoists.

The current flowing in the bus bars is collected by trolleys which serve and directly connect to portable or movable electrical devices. Standard Trolley Collectors are designed to take-off 30 amperes maximum.

Standard Trolley-Closur is not intended for outside use.

*200- and 400-ampere ratings available on request.

*The dimensions for Type RW Conductors.

NATIONAL ELECTRIC WIRES

FIXTURE WIRE

Types RF and RHF — 300-Volt

In size 18 Underwriters' Laboratories approve both 1/64- and 1/32-inch insulation but in size 16 only 1/32-inch insulation is approved.

National Electric "Dilec" fibrous covering is supplied in this type of Fixture Wire, resulting in wire with smaller overall diameter and a smoother finish. In the crowded spaces where Fixture Wire is used, the smaller diameter "Dilec" Wire is considerably easier to install than the conventional braided type.

TYPE TW—FOR WET LOCATIONS

600 Volts—60° C. (140° F.)

Listed by the Underwriters' Laboratories, Inc.

Type TW wire is the moisture-resistant grade of Type T wire, which the Underwriters' Laboratories have approved for wet locations in place of Lead Encased Cable. Type TW wire has all of the desirable features of Type T wire and in addition its insulation has extremely low moisture absorption rate.

Note: This same type cable is available in the circular mil (CM) sizes for open wiring only.

NATIONAL ELECTRIC NON-METALLIC SHEATHED CABLE

"CANVAS-BACK" LOOMWIRE

For Dry Locations—Normal Requirements
New Smaller Over-all Diameter

National Electric Loomwire has moisture-resistant and flame-retardant insulated conductors. The twisted paper cord wrap is specially treated for low moisture absorption, and the outer braid is also moisture-resistant and flame-retardant with a slick finish for ease of installation.

NON-CORROSIVE PLASTIC STRAPS

Fire Protection — especially Barns. Long life installation for all types, open wires, cables, cords. No Cutting Edges. Thick, pliable—edges rounded. Far safer if sway or vibration. No rusting or corroding under wet or acid conditions, as with Livestock. Complies with REA Farmstead Wiring requirements for non-corrosive strap in all wet, acid and corrosive locations to fasten Neoprene jacketed wires. No. 12 x 1 inch Copper Slating nail recommended.

Two Styles: accommodate all sizes, types standard cable and wire—Neoprene, Romex, telephone, radio, control wires, cords, barn wiring, entrance cables, etc.

Unusual strength by test, slightly flexible.

NATIONAL ELECTRIC BUILDING CABLE

"DILEC" SAFECOTE RUBBER INSULATED
LEAD COVERED BUILDING-TYPE CABLE

600 VOLTS

The suffixes L, DL, and ML are added to designate single, two (duplex) and three (multiple) conductor Lead-Covered Cables respectively. One, two and three conductor cables, for example, bear the respective Type designation RL, RDL and RML. Moisture Resistant Grade Type RW rubber is not used in Lead-Covered Cables because in the Fibrous-Covered form Type RW wire can be substituted for Lead-Covered Cable for use in "wet locations."

A properly applied lead sheath is completely moisture-proof and is highly resistant to most forms of corrosion. The lead sheath on National Electric Cables is applied over the cable in a hydraulic press at a pressure of approximately 50,000 pounds per square inch and at a temperature of approximately 300° F., at which temperature the lead is in a semi-plastic state. Various features of the process insure the formation of an oxide-free sheath without flow-lines and laminations.

NATIONAL ELECTRIC CABLES SERVICE-ENTRANCE CABLE

Type "SE"—Style "U"

Approved for Circuits not Over 208 Volts to Ground

Type SE, Style U Service-Entrance Cable is substantially identical in construction with Style A Cable, except that the steel strip over the neutral conductor is omitted. Style U Cable is approved for installation in the same manner as Style A Cable and, by reason of its lighter weight, is suitable for installation in a continuous length from the pole to the service equipment as a combination Service Drop and Service Entrance Cable. The 1947 National Electrical Code permits the use of this cable as well as Style A Cable in interior wiring systems for range and domestic water-heater circuits provided the voltage to ground is not over 150 volts.

Conductors—Tinned copper conductors—No. 12 and No. 10 solid, No. 8 and larger stranded. Insulation — Performance grade rubber insulation — N.E.C. thickness for 600 volts.

Conductor Covering — Moisture - resistant and flame-retardant Safecote finished "Dilec" fibrous covering with complete identification in Safecote marking. Conductors black and red in three-conductor assemblies.

Concentric Conductor—The insulated conductor assembly is covered with a layer of black Kraft paper tape over which is applied the concentric uninsulated conductor in the form of small, tinned, copper wires.

Safecote Marking—On the exterior of the cable is the continuous Safecote marking which provides at 2-foot intervals the number and size of conductors, the type designation, and a measuring marker.

†All diameters listed conform with N.E.M.A. and I.P.C.E.A. Standards and are subject to a tolerance of plus or minus .030". Standard Service Cable fittings are designed for use with National Service Cables.

Lengths of 500 feet or more can be supplied on reels, on special order.

SERVICE ENTRANCE CABLES LAYTEX* INSULATED—NEOPRENE JACKETED

Laytex* Insulated-Neoprene Jacketed Service Entrance Cables have either one or two insulated conductors over which is laid a concentric uninsulated conductor protected by a Neoprene sheath. All conductors are stranded and coated.

The inner conductor (s) is insulated with natural rubber latex. Directly over the insulation a rubber filled tape is applied. In three conductor cables this tape is red on one insulated conductor, and black on the other. In two conductor cables the tape on the inner conductor is black. The uninsulated conductor, consisting of coated copper wires, is concentrically wrapped around the inner conductor assembly. The size and number of wires of the neutral are such that their maximum effective resistance is not greater than that of the nominal Awg. size specified. Overall a neoprene jacket is applied. All diameters listed are subject to a tolerance of .030 x .040 inch, plus or minus.

Two Conductor (one insulated, one uninsulated)

Insulated Conductor Size, Awg.	Bare Concentric Conduc- tor Size, Awg.	Laytex* Insulation Thickness Inches	Neoprene Jacket Wall	Approx. O.D. Inches	Approx. Net Wt. Per M'
8	8	.025	4/64	.45	163

8	8	.025	4/64	.46x.69	266
6	8	.025	4/64	.51x.78	320
6	6	.025	4/64	.52x.69	401

Standard reel length, 500 feet.

The insulation is the same as used in Laytex* RUW Building Wire. This insulation provides the most remarkable moisture resistant qualities of any insulation on the market today. Underwriters' Laboratories, Inc., conducted severe tests to determine RUW insulation resistance in wet locations at high temperatures. Laytex* RUW was immersed in water at 50° C. (122° F.) for twenty-four consecutive weeks — nearly half a year. Instead of the resistance curve declining week by week as in R and RW insulations, it climbed steadily. After twenty-four weeks immersion, the resistance exceeded 2,400 megohms per 1000 feet. This surpasses by 1,000 megohms the requirements for the same type of insulation after only twelve hours immersion at room temperatures.

*Reg. U.S. Pat. Off.

U.S. THERMOSTAT CABLE THERMOPLASTIC TYPE—SOLID STRAND

Construction consists of two to five thermoplastic annunciator wires twisted together with a thermoplastic jacket over all.

Standard package—500' coils.

4/0	427/23	5/64	2.37	150	5760	500

*Not all sizes in the various degrees of flexibility shown are regularly carried in stock, and to permit economical manufacture, orders should cover minimum quantities of 250 feet.

††A tolerance of plus 8% or minus 5% is permitted by I.P.C.E.A. and N.E.M.A. Specifications.

**These current ratings are based on an ambient temperature of 40° C. (104° F.).

‡For approximate net weights of cables normally shipped on reels, deduct 15% from the shipping weights.

†Type G is of the same construction except for the addition of grounding conductors.

Since "Indestructo" Cables for service above 600 volts are generally used where service conditions are severe and where cable failure may result in loss of life and extensive property damage, it is recommended that the various types of cables be limited to the following maximum circuit voltages:

Type W Cables	2500 volts
Type G Cables	4500 volts
Type SH Cables	7000 volts

Where maximum safety is desired, Type SH-D cables with grounding conductors are recommended for circuit voltages over 2000.

NATIONAL ELECTRIC OIL-RESISTING "INDESTRUCTO" CORDS

WITH NEOPRENE JACKET

Cured in Continuous Lead Mold

WITH NEOPRENE JACKET

Used in oil or grease conditions that would be harmful to a rubber jacket, National Electric Special Oil-Resisting "Indestructo" Cords are not affected. The Neoprene (synthetic rubber) material used in the jacket of this special type of cord is highly resistant to the action of oil derivatives which quickly deteriorate compounds made of natural rubber. The designations for this cord are Type SJO for "medium duty" cord and Type SO for "heavy-duty" cord.

Color-coding of conductors, insulation colors: black and white, black, white, and green; black, white, green, and red; for 2, 3 or 4-conductor cords.

TYPE POSJ MID-RIP CORD

Parallel all-rubber cord in which the insulation of the conductors is integral with the rubber jacket. Nearly invisible slits in the jacket permit easy separation of the two insulated conductors without the use of tools for the purpose of making connections. Conductors are extra-flexible, bunch stranded soft annealed copper, covered by colored separators, and imbedded in a 40 per cent tough rubber compound.

Size A.W.G.	Con- struction	Thick- ness Inches	Current Carry- ing Cap. Amps.	Approx. Overall Diam. Inches	Approx. Net Wt. Lb. Per 1000 Ft.	Approx. Gross Wt. Lb. Per 1000 Ft.

16	65/#34	2/64	7	.315x.185	43	52

TYPE C TWISTED PAIR FLEXIBLE LAMP CORD

For pendant use in dry places where not subject to hard usage.

Made in either Rayon, Glos or cotton finish. Flexibility is assured by the use of a number of very fine, soft, copper wires in each of the two conductors. Each strand is covered with a close wrap of strong cotton as a protection against any chemical action, and is then insulated with a seamless resilient good grade rubber compound.

Size A.W.G.	Con- struction	Insulation Thickness, Inches	Approx. Overall Diam. Inches	Approx. Net Wt. Lb. Per 1000 Ft.	Approx. Gross Wt. Lb. Per 1000 Ft.

12	65/#30	3/64	.446	77	80

FLEXIBLE CORDS

STYLE HPD HEATER CORD

For use in connection with all types of portable heating equipment and appliances. The two copper conductors consist of a number of fine, soft copper wires to give flexibility, each conductor being covered with a close wrap of strong cotton to protect it from any chemical action of the rubber insulation. The individual conductors are insulated with seamless, code rubber compound. Each conductor is then served with asbestos. The two conductors are then twisted, and strong cotton of either blue gray or black color is braided over them.

NATIONAL ELECTRIC STOVE WIRE

TYPE AA—ALL-ASBESTOS

Listed by Underwriters' Laboratories, Inc.

Solid copper conductor. Felted asbestos. Asbestos braid. (White flame-and-heat resisting impregnation.)

For use in wiring stoves, ranges, hot-plates and other heating appliances. Suitable for operating temperatures as high as 200° C. (392° F.) in definitely dry places.

Solid Conductor—300 Volts
NEMA Standard No. 39-54 Table 14

TWISTED PAIR INTERIOR WIRE

Soft tinned copper conductors, rubber insulated, braided and twisted. Standard colors are olive green or oak tan. May also be furnished in single or three conductor.

Size	Diam. Over Rubber, Inches	Approx. Wt. Lbs. Per 1000 Ft.	Standard Length On Coil
22	.056	24	500'
19	.094	48	500'
18	.109	59	500'

FLAME PROOF JUMPER WIRE

Soft tinned copper conductors, rubber insulated, braided and twisted. One conductor white cotton, one conductor red cotton, saturated with flame proof compound.

Size	Diam. Over Rubber, Inches	Approx. Wt. Lbs. Per 1000 Ft.	Standard Length On Coil
22	.056	21	500'
20	.085	25	500'
19	.094	42	500'

COPPER CLAD TELEPHONE WIRE

Copper clad rubber insulated, twisted pair drop wire has very largely replaced the use of No. 14 copper drop wire, having approximately the same breaking strength as the latter, and having ample conductivity for telephone requirements. It costs less, is smaller and weighs less than copper wire, and its life is longer.

Size B&S	Diam. Over Rubber, In.	Wt. Lb. 1000 Ft.
17	$\frac{7}{8}$	40

Single conductors are one-half the price of twisted pair. Triple conductors are one and one-half times the price of twisted pair. Four conductors are twice the price of twisted pair. No deductions will be made for lighter insulation.

THERMOSTAT CONTROL CABLE

BRAIDED—ARMORED

Thermostat cable is made of annunciator wires color coded, cabled and has an outer braid of brown cotton, waxed finish. Unless otherwise specified the three conductor is made with one each red, white and blue wires; four conductor red, white, blue and red and white; five conductor red, white, blue, red and white and blue and white. The armored is of the same construction as the braided, but has a protective covering of soft steel.

Both are regularly furnished in coils of approximately 250, 500 or 1000 feet. Braided No. 18-3 conductor may be had on 500 foot spools without extra charge.

U.S. WEATHERPROOF WIRES AND CABLES

BRAID COVERED

Type U.R.C. Weatherproof has solid or stranded conductors of soft, medium hard or hard drawn copper, covered with two or three closely woven braids thoroughly saturated with a black weatherproof compound and finished with a high melting point blown asphalt and a mica finish.

This wire meets U.R.C. Specifications. Weatherproof wire is also available with hard drawn aluminum conductors.

WEATHERPROOF ANNUNCIATOR WIRE

No. 18 solid, single braid. Insulated with one cotton braid thoroughly saturated with weather-proof compound. Put up in 5-pound coils. Weight 8 pounds per 1000 feet.

Prices upon application.

TELEPHONE CABLES

TYPE B BRAIDED CABLES

For all indoor work provided that runs do not occur in places where excessive dampness or mechanical injury is likely to be encountered. All wires are served with one winding of silk and one of cotton. The wires are cabled up and impregnated with moisture resisting compound.

AMERTEL TELEPHONE AND TELEGRAPH WIRE

AmerTel Extra Best Best (E.B.B.) stands highest in conductivity. Weight per mile ohm, 4700 to 5000 pounds. Used by telegraph companies.

AmerTel Best Best (B.B.) is superior to the E.B.B. in tensile strength and equal in galvanizing, but of lower electrical value. Weight per mile ohm, 5600 to 6000 pounds. Used largely by telephone companies.

AmerTel Steel, designed for short-line telephone service, where a measure of conductivity can be exchanged for high tensile strength. Weight per mile ohm, 6500 to 7000 pounds.

Size B.W.G.	Diam. In.	—Appr. Wt Lbs.—		Approx. Breaking Strain in Lbs.—

AMERTEL TELEPHONE AND TELEGRAPH WIRE

AMERTEL-85 GRADE TELEPHONE AND TELEGRAPH WIRE

For years, communication engineers have made insistent demands for a galvanized telephone and telegraph wire combining greater tensile strength and lower resistance.

AmerTel-85 is the outstanding answer to these demands—the culmination of intensive research. It is the telephone and telegraph wire which offers:

1—A minimum tensile strength approximately 90 percent greater than that of "E.B.B." grade—65 percent greater than that of "E.B." grade—55 percent greater than that of "Steel" grade.

2—An effective resistance of voice-frequencies, with currents of normal magnitude for these frequencies, substantially equal to that of the best grade of iron wire.

3—Superior galvanizing which assures controlled bonding of zinc with the metal base.

AmerTel-85 represents an outstanding contribution to increased economy and efficiency in building and maintaining overhead communication lines.

Size B.W.G.	Diam. In.	Approx. Wt. Lbs. Per Mile	Coll Lgth. Mile	Min. Break- ing Load (Lbs.)	Max. Resis- tance Ohms Per Mile
9	.148	314	1/2	1462	18.47
10	.134	258	1/2	1199	22.48
12	.109	170	1/2	793	34.12
14	.083	99	1/2	460	58.59

Furnished in continuous lengths without splices or joints.

Note: Use the designation AmerTel-85 Grade in specifying this material. Galvanized steel compression-type sleeves are recommended for splicing AmerTel-85 Telephone and Telegraph Wire.

AMERTEL-135 GRADE TELEPHONE AND TELEGRAPH WIRE

AmerTel-135 offers the ultimate in the combination of tensile strength and transmission qualities. Here is a conductor which combines tensile strength of approximately 2½ times that of standard "B.B." Wire with telephone transmission qualities superior to the older grade.

The combination of extra-strength and superior conductivity in a wire with a heavy galvanized coating makes AmerTel-135 grade the ideal conductor for rural and short toll lines. Spans of lengths heretofore out of consideration become not only possible but practical—350 feet in heavy loading districts—450 feet in medium loading districts—500 feet in light loading districts. The extra strength means a greater safety factor for withstanding heavier ice and wind loads with resultant savings in maintenance costs.

Size B.W.G.	Diam. In.	—Appr. Wt. Lbs.— Per Mile	Per Coll Lgth.	Max. Lgth. Min. Break- ing Load (Lbs.)
12	0.109	170	150	4970 1213

Note: Use the designation AmerTel-135 grade in specifying this material. Galvanized steel compression-type sleeves are recommended for splicing AmerTel-135 grade line wire.

†Order by Carton Number. For larger sizes, see page 10.

†Order by Carton Number. For larger sizes of Hylugs and Hylinks, information on request.

HYTOOL, Catalog No. Y14MV

A popular hand tool for installing Hydent connectors on conductor sizes, No. 22 to 8.

HYTOOL, Catalog No. MY29

A self-contained hand tool for installing Hydent connectors on conductor sizes No. 8 to 250 Mcm. No removable dies are required.

HYPRESS, Catalog No. Y34A

A fully insulated, hand-operated hydraulic tool for installing Hydent connectors on conductors No. 6 to 500 Mcm, with proper dies.

**HYLUG CONNECTOR KIT
No. 10**

Contains 325 assorted Hylugs and Hylinks for conductors No. 20 through No. 10, packed in useful plastic jars, and one Hytool Y14MV for installing all of these sizes.

BURNDY ELECTRICAL CONNECTORS

QIKLUG—TYPE QA-B

A heavy duty terminal for rapid termination of wires and cables. The Qiklug accommodates a range of cable sizes, and is supplied with one, two or more holes in the terminal tongue. Also furnished with tongues and drilling to order.

Cat. No.	Cable Size	No. Holes in Contact Pad	Shpg. Wt. Lbs. Per 100

Shown above are several of the many variations of the Burndy Qiklug — terminals designed for multiple cable accommodation, unusual angles, long cable drops and other requirements. When ordering specify tongue dimensions and drilling.

BURNDY ELECTRICAL CONNECTORS

SERVIT—TYPE KS

Type KS
For Copper Cable or WireType KSO
With Nut Retainer

Type KS designed for making service connections quickly and surely. Units for accommodating wire sizes up to and including 500 Mcm. are made of forged Durium, a high-copper alloy, which eliminates danger of corrosion and insures good contact between conductors. Each size of Servit is designed to accommodate at least two conductors of maximum diameter, but it will close down on a single maximum conductor or its equivalent.

Type KSO with nut retainer is identical in construction and materials to the Servit with the exception of the nut retainer device which prevents the nut-pressure bar assembly from dropping free when the connector is disassembled.

VERSITAP—TYPE QPX

All-purpose connector for use as a Tee, Link, Cross or Parallel Clamp. Takes wide range of cables; installed with a wrench. Ten sizes accommodate from No. 10 solid wire to 1000 Mcm cables.

Made of high strength, high conductivity copper alloy, the Versitap consolidates the functions of a number of conductor types into one low priced device.

MATTHEWS NUTYPE SOLDERLESS WIRE CONNECTORS

SOLDERLESS—FOR ELECTRICAL WIRE CONNECTIONS

Nutype Wire Connectors are widely used by power companies and others for their many outstanding features. Nos. 10-NU through 0-NU have bolts and clamping jaws cold forged from same material as the copper conductors, hence no loose connections due to different coefficients of expansion. They assure maximum conductivity and will not indent, nick or damage the conductors.

Nutype connectors do away with soldering and permit the use of hard drawn copper wire instead of soft drawn. The copper content is 99%, therefore they are highly corrosion resistant and will not season crack. They provide other advantages such as lower cost — save time — promote safety — no radio interference — continuous service from the same connector — no sharp edges to nick wire and gloves.

Cat. No.	Material	Maximum Rated Gauge of Copper Wires	Std. Pkg.	*Net Price Per 100
NUTYPE CONNECTORS				
For Copper to Copper Connections—Without Nut Retainers				
10-NU	99% Copper	10 Sol. or Str.	100	\$13.38

*Above prices apply for standard package to 2500 connectors. For larger quantities, prices on request.

**Available in 3 wire capacity.

‡Silicon Bronze Slotted-bolt connectors 00-NU, 0000-NU, 350-NU, 750-NU and 1000-NU can be furnished but Matthews Uniclamp Connectors are recommended not only because they will cost much less but also because they will give much better and safer connections on stranded conductors.

All sizes may be assorted in not less than standard packages to obtain quantity prices.

MATTHEWS CONNECTORS

MATTHEWS UNICLAMP CONNECTORS

Made for use on copper or aluminum wires from 6 solid to 1000 MCM inclusive. They will connect two wires of their rated size or one wire of their size with one or more smaller tap-off wires, down to 8 solid. They have many advantages over the larger sizes of connectors of the split bolt and other designs as they provide greater pressure between wires; hence, greater holding power; are less costly; are easier to install and the assembled design is such that parts cannot become separated.

For Copper to Copper Connections

Cat. No.	Max. Size Copper Wire	Std. Pkg.	*Net Price Per 100
642-UC	6 Solid to 2 Stranded.....	100	\$19.46
0-UC	1/0 Strand	25	54.16
00-UC	2/0 Strand	25	62.40

50-UC	500 MCM Strand	6	185.22
75-100-UC	750 to 1000 MCM Strand	1	370.45

Plated connectors available for Aluminum Conductors.

For copper to aluminum connections, plated connectors are equipped with spacer bars having bi-metal surfaces.

Ask for Bulletin 206-A giving complete information.

*Above prices apply for standard package quantities to 99. For larger quantities and connectors for aluminum connections and copper to aluminum connections, prices on request.

MATTHEWS SERVICE ENTRANCE CONNECTORS

Provide a sturdy, yet inexpensive means of joining two house service wires, or other similar end to end connectors, (not under tension) without use of solder. For use with either solid or stranded wires.

The body is one piece, hard drawn copper, amply strong. Slotted hexagon bolt head.

Cat. No.	Copper Wire Size	Std. Pkg.	Shpg. Wt. Lbs. Per 100	Net Price Per 100

BUCHANAN "pres-SURE" CONNECTORS for ELECTRICAL WIRING

Underwriters Approved

The Buchanan Splice Caps for "pigtail" splicing of electrical wires are now available in an improved open-end construction which considerably facilitates their installation and inspection.

These new open-end Splice Caps insure that wire insulation is always flush with the Splice Cap for maximum circuit protection and that wires are always inserted to the full depth of the Splice Cap for maximum joint efficiency.

Only two sizes of Splice Caps are required for all most frequently used combinations of two or more wires ranging all the way from two #18 to three #8. Quickly applied snap-on insulators of fixed insulation value eliminate necessity for taping of joints and insure against insulation breakdown in service.

BUCHANAN "pres-SURE" CONNECTORS for ELECTRICAL WIRING "pres-SURE-tools"

The C24 hand operated "pres-SURE-tool" which installs both 2004S and 2011S Splice Caps also installs manufacturer's Termend lugs on all wire sizes from No. 16 to No. 8. This tool features an exclusive four-way "pres-SURE-crimping" action which insures permanent connections of maximum electrical and mechanical efficiency and is equally effective on solid or stranded or on combinations of solid and stranded wires. Weighing just one pound, this tool is only 8 inches in overall length and is provided with easy-grip handles protected with vinyl tubing.

Illustrations, left to right, show how the uniform converging action of the 4 plungers in the Buchanan Tool draws connector and conductors together to form a solid permanent unit.

G & W POTHEADS

The design of G & W Potheads from both the electrical and mechanical standpoint is the result of many years' experience. Having such a variety of shapes and sizes we can furnish you with potheads for any special condition. Any special shape of pothead casting is adapted to standard cable entrances and porcelain. Simplicity and ease of installation are important features of these designs. We are always glad to supply you with detailed information on design or installation.

TYPE "T" CAPNUT TERMINAL

Definite Oil-Tight Construction
Interchangeable Style of Lugs

TYPE "ES" DISCONNECTING With Porcelain Caps Enclosing Connectors

TYPE "N" INDOOR ONLY Without Connectors

Other miscellaneous types are assembled from standard parts, for any voltage or ampere rating.

G & W POTHEADS

INSTRUCTIONS FOR ORDERING

Give following information:

1. Mfrs. Catalog No. if possible.
2. Number of Conductors.
3. Operating Voltage. (Alternating or Direct.)
5. Outside Diameter of Cable.
6. Shape of Pothead.
7. Outdoor or Indoor use.
8. Type of Connector.
9. Type of Cable Entrance.
10. Size of Conduit Coupling.
11. Diameter over Armor. (If Clamp is wanted.)

Items listed in heavy type are essential.
Give all information available.

Filling Compound is furnished as a separate item on orders.

Cable Entrances (Wiping Sleeve, Combination CR & SB or Plain Bushings) are included in price. Conduit and Couplings and Armor Clamps are priced extra.

G & W INSULATING COMPOUND

G & W Novoid Insulating Compound is an excellent grade of chemically inert material suitable for use in potheads, underground cable boxes and cable joints. When handled at the proper temperature a homogeneous dielectric filling with no voids will result.

ASPHALTIC BASE—

Novoid "A"—(Medium soft)—for usual installation of sealed potheads (capnut and disconnecting types).

Novoid "C" — (Medium hard) — For straight through type potheads having no definite seal. For hot climates and exposures. For cable boxes and splice boxes.

Ozite "B"—(Medium hard)—For general use, particularly recommended for cable joints because of its low power factor.

OIL INSOLUBLE—

Novoid "X" has all the properties of other Novoid compounds plus the added advantage of insolubility in mineral oils. It is recommended for use in potheads and cable joints when necessary to avoid troubles due to migration. It has a tendency to "stay-put" because it does not mix with cable oil.

G & W CABLE SPLICING KIT

G&W furnishes, usually from stock, unit packages of electric cable splicing material, "Splicing Kits," for all standard and special joints on rubber, varnished cambric and paper insulated (solid type) power and telephone cables.

Each item is supplied in the correct quantity for a properly designed joint.

Time and expense of securing various items from different sources is saved.

Accumulation of dead stock is avoided. No waste.

All materials are kept clean and ready for use.

Each Unit Splicing Kit is labeled for easy identification.

Give complete cable data on inquiries and orders.

KESTER SOLDER

KESTER SOLID WIRE SOLDER

Uniform in gauge and alloy. The same high quality in metals and fabrication found in Kester Flux-Core solders. Every spool carries positive alloy identification. 1 lb., 5 lb., 20 lb. spools and 50 lb. reels.

Price, per Pound.....Market

KESTER RADIO SOLDER

The handy size package of Plastic Rosin-Core solder in flat or ribbon type. Just the unit for the radio fan, amateur or serviceman's kit.

Each can contains a plentiful supply sufficient for considerable soldering and it costs the consumer but little.

Price, Display Carton of Ten CansMarket

KESTER SOLDERING PASTE

An improved soldering paste due to new manufacturing methods. More uniform. Every portion alike in fluxing strength. No failures with Kester, a perfect job every time. Carton of ten.

Price, 2-oz. Cans.....Market
Price, 1-lb. Cans.....Market

KESTER SOLDERING SALTS

The easiest and most economical way to make your own soldering acid. The addition of water results in a flux that is very efficient for general work. Excellent for use in the automotive shop and for factory work. Available in 5, 10, and 50 pound pails.

Price, per Pound.....Market

KESTER ALUMINUM SOLDER

Flux-Core

The only aluminum solder of the flux-core type — has its own necessary flux in the core. The "answer" to that long-existing demand for a practical solder of this kind.

Price, Display Carton of Ten Cans.....Market

KESTER SOLDER

KESTER ACID-CORE SOLDER

The "one Acid Filled Solder" that is the original Cored solder. Kester Acid-Core solder meets all general soldering requirements. Easy-to-use, saves time or labor, and always makes a perfect job that is lasting. Available in 1, 5, and 20 pound spools.

Price, per Pound.....Market

KESTER BAR SOLDER

Best of metals used. Definite alloy-marking. Easy flowing. Convenient-to-handle one pound bars.

Price, Bar Solder.....per Pound (Market)

KESTER PLASTIC ROSIN-CORE SOLDER

The most efficient solder for all electrical and radio work, automotive or otherwise. Eliminates all possibility of corrosion, resistance or leakage. "Plastic Rosin," a feature of Kester, enables the user to solder perfectly and with ease.

Available in 1, 5, and 20 pound spools.

Price, per Pound.....Market

KESTER METAL MENDER

The handy tool-kit package of Kester Acid-Core solder. There is a generous coil in every can. Kester Metal Mender has numerous uses everywhere. Saves its cost many times in making and repairing all sorts of metal objects.

Price, Display Carton of 10 CansMarket

KESTER "RESIN-FIVE" CORE SOLDER

Non - corrosive and non - conductive. The better solder for TV, all radio and electronic parts — everything electrical. For those jobs difficult to solder with conventional Rosin-Core solder. 1 and 5 pound spools.

Price per Pound.....Market

DUTCH BRAND TAPE DUTCH BRAND FRICTION TAPE

Dutch Brand Friction Tape is an "Extra Service" product. High grade, dependable, non-raveling with exceptional insulating qualities. Resists up to 2000 volts through one thickness, is strong, sticks tight, and lasts longer in any climate.

Size Rolls	Std. Pkg. Contains	Price Per Carton				Price Per Roll
		Less Than 5	5 to 9 Ctn. Lots	10 to 14 Ctn. Lots	15 or More Ctn. Lots

“SCOTCH” BRAND ELECTRICAL TAPE

“SCOTCH” No. 33 ELECTRICAL TAPE

With Plastic Backing

Listed Under Reexamination Service of Underwriters' Laboratories, Inc.

This tape has a stretchy, rubber-like plastic backing that enables it to do the work of two ordinary tapes. Goes on in one operation, instead of two, and does a better job. Its stretchability and resistance to oil and moisture equip it perfectly or a wide range of uses in electrical construction and repair. Its thinness gives it an important advantage in eliminating “over-stuffed” junction boxes.

This revolutionary Electrical Tape is backed with the same synthetic resin that is used on Type T synthetic insulated wire. It provides complete electrical and mechanical protection.

Scotch No. 33 Electrical Tape	Packing		Price Per Roll

“SCOTCH” No. 27 ELECTRICAL TAPE

With Glass Cloth Backing and Thermo Setting Adhesive

The glass cloth backing of No. 27 Electrical Tape is not harmed by high temperatures, resists flame, does not shrink, stretch or rot; has extremely high tensile strength — 150 pounds per inch of width. Curing of the thermosetting adhesive increases dielectric strength about 500 volts and harms none of the other electrical properties.

Packing: 1— $\frac{1}{2}$ -inch x 66 ft. roll per can, 12 cans per carton.

Price, No. 27 “Scotch” Electrical Tapeper roll \$1.67

“SCOTCH” BRAND ELECTRICAL TAPE

JOB SIZE SCOTCH No. 33 ELECTRICAL TAPE

Twelve “Job Size” twenty-foot rolls of Scotch No. 33 Electrical Tape in a strong, neat tube—each roll a convenient one day supply for an electrician with a steady schedule of wiring assignments. Electricians like the twenty-foot roll because it is easy to use and easy to carry. The neat compact tubes take up little storage room and give the tape perfect protection while in stock.

Packing: 12— $\frac{3}{4}$ -inch x 20 ft. roll per tube; 144 rolls (12 tubes) per carton.

Price, No. 33 “Scotch” Electrical Tape per Job Size Roll\$0.55

U.S. TAPES AND SPLICING COMPOUNDS

U.S. SECURITY FRICTION TAPE

High grade, black, moderately priced, electrical and all-purpose tape. Non-ravelling, strong, adhesive—will not dry out. Made from firmly and evenly woven sheeting, thoroughly impregnated with the rubber compound—thus avoiding pinholes.

Furnished $\frac{3}{4}$ -inch wide, boxed or in foil, in sizes Nos. 1, 2, 4 and 8. Nos. 1 and 2 furnished in attractive counter displays of 32 and 16 rolls respectively.

Prices on application.

U.S. HOLDTITE FRICTION TAPE

High quality, black friction tape for all electrical work. High dielectric strength makes it especially suitable for high voltage work.

Furnished $\frac{3}{4}$ -inch wide, boxed or in foil, in No. 4 rolls (33 ft.) and No. 8 rolls (67 ft.). Also No. 8 specification size rolls (82 $\frac{1}{2}$ feet) the A.S.T.M. standard roll.

Prices on application.

U.S. TAPES AND SPLICING COMPOUNDS

U.S. SECURITY RUBBER TAPE

A high grade splicing compound. Possesses necessary fusing quality to form permanent, water-proof joint without heat. U.S. Security is easy to handle and very satisfactory for most wiring jobs. Rubber compound contains no free sulphur which causes corrosion. Furnished $\frac{3}{4}$ -inch wide, in No. 4 (10 ft.) and No. 8 (21 ft.) rolls, boxed or in foil.

Prices on application.

U.S. HOLDTITE A.S.T.M. RUBBER TAPE

High grade splicing compound giving maximum protection for both high and low voltage.

Guaranteed yardage makes it possible to offer high grade material at no extra cost per foot of tape. Has high tensile strength, elongation, dielectric resistance. Easy to work with because of its fine tackiness and quick fusing ability.

Furnished $\frac{3}{4}$ -inch wide, No. 8 rolls, minimum footage 30 feet, boxed or in foil.

Prices on application.

USCO SPLICING COMPOUND

Highest quality splicing compound. High dielectric resistance makes it especially suitable for high voltage work where even the slightest leakage must be avoided. Developed primarily for most exacting jobs encountered by railroads, power, and communication companies. Only finest high grade rubber is used—insures a perfect and water-proof splice. High tensile gives added protection against mechanical abuse, making splice as durable as insulation on wire or cable. Fuses readily without heat.

Packed in attractive airtight tin container. Furnished $\frac{3}{4}$ -inch wide, No. 8 roll, minimum footage 30 feet.

Prices on application.

BRYANT GROUNDING DEVICES

GROUNDING TYPE CONVENIENCE OUTLETS 15 Amperes, 125 Volts

These 3-wire outlets have two current carrying contacts and one grounding contact built into the device. The grounding contact is electrically connected to the yoke and also to a terminal on the side of the outlet to which a grounding conductor may be connected.

In metallic system wiring, the grounding is made directly through the metal enclosure. For non-metallic systems, the grounding is completed through a third wire serving as a grounding conductor.

When desired these outlets can be used in the conventional manner to accommodate standard 2-pole parallel blade caps.

McGILL LEVOLIER SWITCHES

Approved by Underwriters' Laboratories, Inc.

LEVER OPERATED—SINGLE CIRCUIT**6 Amp. "T," 125 Volt—3 Amp., 250 Volt**

No. 41

Only $\frac{5}{8}$ inch thick the No. 41 is one of the smallest 6 amp. 250 volt pull switches made, yet has unusual capacity, dependability and long life. Single pole, double break mechanism, equipped with 6 ft. cord or plain lever control. Standard finishes: brass, dark bronze, and burnished nickel.

Widely adaptable for canopy or conduit box mounting for individual control of incandescent or fluorescent lighting, F.H.P. motors, etc.

Cat. No.	Stem, In. Diam.	Length	Carton	Std. Pkg.	Pkg. Wt.	Price Per 100
41	$\frac{7}{8}$	$\frac{1}{8}$	10	100	10	\$100.00

LEVER OPERATED—SINGLE CIRCUIT**6 Amp. "T," 125 Volt—3 Amp., 250 Volt**

Can be used on any chain fixture, old or new, and between any two links of chain. When installed in fixtures that have been previously hung it fits in place of one of the chain links without altering the length of the fixture or necessitating rewiring or splicing of lead wires.

The Levolver link switch consists of a standard Levolver pull switch, and Levolver link.

No. 41 Link

Cat. No.	Description	Carton	Std. Pkg.	Pkg. Wt.	Price Per 100
39	No. 41 with Mounting Link	10	100	13	\$100.00

LEVER OPERATED—TWO CIRCUIT**3 Amp., 125 Volt—1 Amp., 250 Volt**

No. 201

Designed to operate with three-light lamps. When installed in the canopy of a fixture using the three-light lamp, it operates as follows: First pull turns on smaller filament, second pull turns off small filament and turns on the larger filament, third pull turns both filaments on and fourth turns both off. Standard finishes, brass, dark bronze and burnished nickel. Size $\frac{7}{8}$ x 1 $\frac{1}{8}$ inches.

Cat. No.	Stem, In. Diam.	Length	Carton	Std. Pkg.	Pkg. Wt.	Price Per 100

SWITCH HOUSING PLASTIC OUTLET BOX COVER

With No. 1010 Switch

No. 109 outlet box cover provides a cover and switch assembly for ceiling or wall mounted outlet boxes. Provides an inconspicuous, well-designed housing to replace large, unsightly switches. Ideal to provide power-saving individual control of banks of lights up to 1250 watts. Housing is molded brown phenolic plastic with recess to accommodate No. 1010 Levolver switch. Molded with partial holes which can be punched out to fit 3- or 4-inch outlet boxes. No. 109-X is the same as above but without switch. May be used with other Levolver switches including Nos. 42, 202, 302 and 1020S.

McGILL LEVOLIER SWITCHES

Approved by Underwriters' Laboratories, Inc.

LEVOLIER SPECIAL USE SWITCHES

For Multiple Circuits

No. 400

The following are typical of the many Special Use Switches built by McGill for controlling all types of circuits. Others can be designed readily with the McGill method of assembling interchangeable component parts. Rated from 4 to 10 Amps. 250 volt, these switches are especially serviceable for ventilating fans, circulators and fractional horse power motors. Over-all sizes are small.

McGILL LEVOLIER SWITCHES

Approved by Underwriters' Laboratories, Inc.

LEVER OPERATED—SINGLE CIRCUIT

6 Amp. "T," 125 Volt—3 Amp., 250 Volt

No. 71

The No. 71 is the thinnest 6 Amp., 250 Volt "T" rated switch made — only 3/8 inch thick. Plastic cased with 6-inch wire leads, it is built with the famous Levolver mechanism for dependability and long life. Size 1 1/2 x 1 3/4 inches.

Ideal for small, and especially thin sectional fixture canopies.

Cat. No.	Stem, Inches Diam. Length	Car- ton	Std. Pkg.	Pkg. Wt.	Price Per 100
71	1 1/2 1 3/4	10	100	8	\$87.50

SINGLE CIRCUIT—TWO CIRCUIT—THREE WAY

6 Amp., 125 Volt—3 Amp., 250 Volt

Practical but small plastic cased toggle switches with wire leads or soldering lugs. Dust and vibration proof with single pole, double break mechanism. No. 25 is single circuit for individual control of lights in such applications as Pullman cars, busses, trailers, lamps, appliances, small tools, fractional horse power motors, etc. "T" rated. Size 1/2 x 1/2 x 1 inch.

No. 27 is three way for control of one or more lights from two points. No. 28 for controlling either of two circuits. No off position.

No. 25

Regular type. 100 watts, 110 volts. 14 to 18 flashers per minute. Overall length $2\frac{3}{4}$ inches. Extends lamp $1\frac{1}{4}$ inches from socket.

Underwriters Listed. Approved by CSA.

Cat. No.	Car-ton	Std. Pkg.	Wt. Lbs.	Price Per 100
475	25	250	18	\$30.00

No. 477 EAGLE WINKER

Slow type. 660 watts, 110-120 volts only. For use on A.C. only. 10 to 16 flashes per minute. With the On-Interval longer than the Off-Interval.

Cat. No.	Car-ton	Std. Pkg.	Wt. Lbs.	Price Per 100
477	25	25	3	\$70.00

EAGLE ELECTRICAL PRODUCTS SPRING-LOK APPLIANCE PLUG

Screwless iron plug — no screws or nuts to loosen. An ingenious spring locks this plug and gives spring action at 4 different points. Bulldog grip contacts.

Cat. No.	Car-ton	Std. Pkg.	Wt. Lbs.	Price Per 100
750	10	250	26	\$13.50

EAGLE BAKELITE PLUG

Though heat will eventually spread the clip, this spring tongue will always make the contact. Heat resisting bakelite.

Cat. No.	Car-ton	Std. Pkg.	Wt. Lbs.	Price Per 100
A-750	10	250	26	\$13.50

BAKELITE 3-LB MIDGET PLUG

The new small size plug to fit standard 3 lb. irons. Black bakelite.

Cat. No.	Car-ton	Std. Pkg.	Wt. Lbs.	Price Per 100
720	10	100	8 $\frac{1}{2}$	\$10.50

LUMINOUS PENDANTS

Grade "M" Undark luminous material used. No. 103 packed 12 on attractive counter display card. No. A-103 is mounted one on a display card.

Cat. No.	Standard Package	Wt. Lbs.	Price Per 100
103	12 cds.	6	\$208.00
A-103	100	2	16.00

BELDEN ELECTRICAL CORDS

TUG-PROOF HEATER CORDS

No. 1716 Heavy-Duty

7 Ft. Size 18—3000 cycle heater cord; Belden unbreakable Soft Rubber Plug and Belden 400 appliance plug. Heavy abrasion-proof cotton braid. Underwriters' Blue Flag Label.

Price, No. 1716 Heavy-Duty.....each \$1.10

No. 1731 De Luxe Heater Cord

7 Ft. Size 16 — 10,000 cycle "Long-Life" heavy Twine Braid Heater Cord; Belden Unbreakable Soft Rubber Plug and Belden 400 "Cordlife" Appliance Plug. Design and assembly have been so perfected that the plug can be sealed at the factory — for trouble free performance. Underwriters' Blue Flag Label.

Price, No. 1731 DeLuxe.....each \$1.60

No. 1717—For Roasters

6 Ft. Size 16 — 3,000 cycle heater cord; Belden Unbreakable Soft Rubber Plug; and riveted "Cordlife" Roaster Plug of the same construction as No. 400 Plug. Heavy abrasion-proof cotton braid. Underwriters' blue flag label.

Price, No. 1717 Heater Cord.....each \$1.30

No. 1737—For Heater Appliances

7 Ft. Size 18—3000 cycle Heater Cord; Belden Unbreakable Soft Rubber Plug. Heavy abrasion-proof cotton braid. No appliance plug; ends stripped and tinned; braid bound.

Underwriters' green flag label.

Price, No. 1737 Heater Cord.....each \$0.70

No. 1728 for Coffee Makers, Small Appliances

6 Ft. Size 18 — 3000 cycle heater cord; combination black glazed cotton and white rayon braid; Belden Unbreakable Soft Rubber Plug; and miniature appliance plug. Underwriters' blue flag label.

Price, No. 1728 Heater Cordeach \$1.10

No. 1701 Service Extension Cord

Both ends unbreakable rubber—safe for use on table tops. Various lengths of Belden 1760 all-rubber lamp cord with Belden Unbreakable Soft Rubber Attachment Plug and Belden Unbreakable Soft Rubber Service Block. Underwriters' blue flag label.

Cat. No.	Description	Price Each
1701	10 Ft., brown or ivory.....	\$1.40

BELDEN ELECTRICAL CORDS

FOR LAMPS, RADIOS, SMALL APPLIANCES

Size 18 type POSJ-64 all-rubber lamp cord with Belden Unbreakable Soft Rubber Plug; opposite end stripped and tinned. Underwriters' green flag label.

Cat. No.	Description	Price Each
1725	7½ Ft., brown.....	\$0.60
1735	12 Ft., brown.....	.70

FOR VACUUM CLEANERS AND WASHING MACHINES

Complete with Belden Unbreakable Soft Rubber Plug; opposite end stripped and tinned ready for easy attachment to electrical unit; Underwriters' green flag label.

Cat. No.	Description	Price Each
For Vacuum Cleaners		
1752	20 Ft. Size 18 type SV extra flexible portable cord	\$1.70
For Washing Machines		
1750	10 Ft. Size 16 type SJ extra flexible portable cord	1.35

ELECTRIC SHAVER CORDS

Six-foot extra flexible all-rubber cords with Belden Unbreakable Soft Rubber Plugs and Connectors. Underwriters' blue flag label.

Cat. No.	Description	Price Each
1770	For Schick and Knapp-Monarch.....	\$1.25
1771	For Remington Rand, Shavemaster, Roto Shaver, Nicholl-Velvet.....	1.25

BELDEN EXTENSION CORDS

No. 1702 Service Extension Cord

15 Ft. Size 18 with 2-way connector. Underwriters' blue flag label. In individual carton.

Price, No. 1702 Extension Cord.....each \$1.60

No. 1751 Extension Cord

25 Ft. Size 18. Both ends unbreakable rubber. Type SV extra flexible portable cord with Belden unbreakable soft rubber plug and molded-on rubber connector. Underwriters' blue flag label.

Price, No. 1751 Extension Cord.....each \$2.40

BELDEN ELECTRIC RANGE CORDS

Conductors are both clamped and soldered to the prongs inside the Belden molded-on rubber, 3-prong polarized plug. Conductor extends to tip of lugs, giving greater mechanical strength and superior electrical contact. Strain relief supplied.

Underwriters' Inspected under Re-examination Service. Each cord in a printed sleeve. Five to a carton.

Cat. No.	Description	Price Each
1707	38-inch Electric Range Cord. 2-#6 and 1-8# conductors. N.E.C. cord rating 56 amperes for ranges.....	\$3.65
1708	36-Inch Electric Range Cord. 2-#8 and 1-10# conductors. N.E.C. cord rating 43 amperes for ranges.....	3.15

BELDEN ELECTRICAL CORDS PORTABLE OUTLETS

Dangerous and unsightly temporary extensions have been eliminated by this neat, practical method of locating appliances wherever wanted about the room. Consists of various lengths of 1724 flat rubber sheathed strip with outlets at each end; Belden Soft Rubber Plug and 3 feet of POSJ-64 brown lamp cord at one end for quick attachment to wall outlet.

Cat. No.	Description	Price Each
1715	Portable Outlets with 15-ft. 4-in. Under-Rug Wire	\$3.15
1712	Portable Outlets with 12-ft. 4-in. Under-Rug Wire	2.95
1709	Portable Outlets with 9-ft. 4-in. Under-Rug Wire	2.65
1706	Portable Outlets with 6-ft. 4-in. Under-Rug Wire	2.40

No. 252 POSJ-64 CORD SET

Fifteen foot length of Brown #18-2 Conductor POSJ-64 Cord with a Brown Tab-22 Electrix Plug attached to one end and a Brown Fem-88 Female connector on the other end. Packed 25 to a carton. Shipping weight 12 lbs. per carton.

U.S. FLEXIBLE CORDS

No. 250 POSJ-64 CORD SET

Fifteen foot length of Brown #18-2 Conductor POSJ-64 Cord with a Brown Tab-22 Electrix Plug attached to one end and a Brown Tab-122 Service Block on the other end. Packed 25 to a carton. Shipping weight 13 lbs. per carton.

No. 246 POSJ-32 CORD SET

Fifteen foot length of Brown #18-2 Conductor POSJ-32 with a Brown Pep-33 Electrix Plug attached to one end and a Brown Tab-122 Service Block on the other end. Packed 25 to a carton. Shipping weight 16 lbs. per carton.

BUSS ONE-TIME FUSES

NON-RENEWABLE

Carry Underwriters' Laboratories Inspected label. But fuses cannot be judged by this label alone. It only shows they meet minimum requirements of safety.

Fuses can fail in many other ways. When one blows needlessly because of a badly soldered link—or because of heating from crooked terminals or caps—or from corrosion of link—the user pays the cost of a useless shutdown. Or when a fuse fails to blow quickly enough because of an inaccurate link, the user pays for the damage that results.

When such troubles from ordinary-run fuses kick back, the dealer pays in lost fuse orders and often loss of other business to boot.

The best guarantee of dependable protection for the user and insurance against loss of profits for the dealer is the BUSS Trade-Mark. It is KNOWN and recognized everywhere as standing for the highest quality in fuses.

BUSS One-Time fuses get the same engineering and care in manufacture as other products carrying the BUSS trade-mark—hence each and every BUSS One-Time fuse can be depended on to operate as intended.

BUSS SUPER-LAG RENEWABLE FUSES

N. E. C. Standard

3 to 60 Amperes

70 to 600 Amperes

Reduce to extent not possible with other renewable fuses, number of shutdowns caused by needless blows. Patent fuse-case and Super-Lag link make this possible. Save time and money and decrease out-of-service losses.

Costs often cut in half on new motor installations as Code (Paragraph 4346) in many cases permits smaller size fused safety switches, fuse panels or fuse blocks if Buss Super-Lag fuses are used.

Every Buss Super-Lag fuse carries inspection label of Underwriters' Laboratories.

BUSS SUPER-LAG RENEWAL FUSE LINKS

3 to 60 Amperes

70 to 600 Amperes

Super-Lag design gives BUSS Links a long time-lag that reduces number of blows on starting currents or other harmless overloads.

Give better protection because they permit fusing nearer to load.

Come in one piece in all sizes. This makes renewal handy and prevents poor contact developing while fuse is in use.

Packed in small quantity in sealed boxes for convenience and to prevent dust, moisture or oxidation from affecting them.

Interchangeable with all makes of standard fuse links.

BUSS Clear Window PLUG FUSES

Carry Underwriters' Laboratories inspected label.

Buss fuses have an extra large, clear window which makes it easy to see if fuse is blown.

Metal cap protects fuse against chipping that might cut fingers or weaken fuse. Buss fuses are shockproof — insulated with

porcelain and mica like high voltage power lines. They will always fit in holder as there is no solder lump on outside to cause trouble.

Packed 5 in a colorful carton that carries complete information on why fuses blow and what to do when they do blow.

Sym- bol	Amp.	Wt. Lbs. Per 1000	Price Each	Sym- bol	Amp.	Wt. Lbs. Per 1000	Price Each

**15 to 30 AMP. FUSETRON
dual-element Plug Fuses**

15 ampere Fusetron dual-element fuses provide safe protection. They won't blow on motor-starting current or any current which lasts only a short time, because of their thermal element, yet they protect on dangerous overloads or short-circuits.

20 and 25 amp. sizes for use on appliance circuits or mains give the same kind of protection against useless blows. Carry Underwriters' Laboratories inspected label. For voltages up to 125. Packed 4 in a colorful carton.

Amp.	Symbol	Price	Amp.	Symbol	Price
15	T15	\$0.10	25	T25	\$0.10
20	T20	.10	30	T30	.10

Packed 4 in a box.

BUSS -TYPE S- FUSTATS**15 TO 30 AMP.—FOR CIRCUIT PROTECTION**

Operates like Fusetron dual-element Plug Fuses
Non-tamperable (Type S) Base

The Fustat is Bussmann's dual element fuse with type "S" base. It has a fuse link and a thermal cutout. Makes safe protection remain safe. Stops loss of money on needless "blown-fuse" service calls. Stops use of pennies or slugs; practically impossible to bridge with tinfoil, wire or any other material. A 20, 25, or 30 ampere size will not fit in a 15-ampere receptacle or adapter. Can be used in Edison base receptacles by use of adapter. Adapters not included with Fustats, must be ordered separately. Listed by Underwriter's Laboratories as Type S fuses, in 15 to 30 amp. sizes. For circuit protection on voltages up to 125.

0 to 14 AMPERE BUSS FUSTATS

To Protect Against Burned-Out Motors and
Apparatus of Voltages up to 125

Fustat

Adapter

Protect motors against burnout from such things as dry bearings, overload, etc. Prevent costly repair bills.

For size to use, get ampere rating of motor or apparatus from name plate, and install a Fustat of a size nearest to that figure. Then if device is in danger of burnout, the Fustat will open. Also protects like a fuse against short-circuit.

Have non-tamperable base — which prevents anyone replacing them with a penny or readily bridging them — and prevents the use of sizes too large to protect.

Fustats fit all regular plug fuse holders through the use of an inexpensive adapter which locks in place.

Carry Underwriters' Laboratories Label and have the same degree of approval for motor-running protection as the most expensive devices made.

Packed 4 in a carton, carrying complete instructions.

FUSTAT			ADAPTER

**0 to 14 AMP. FUSETRON dual-element
PLUG FUSES**

Fusetron fuses, like Fustats, can be used to protect motors or apparatus against burnout. Have Edison base — hence insurance and inspection authorities and Underwriters' Laboratories do not recommend their use because all protection is lost if Fusetron or ordinary fuses of too large a size are used. Fustats, because of their non-tamperable feature, are recommended for this work.

4	T4	.20	-----	-----	-----

Packed 4 in a carton, weight 7.7 lbs. per 100.

FUSETRON dual-element FUSES 250 AND 600 VOLT

Made to fit ordinary fuse holders. A Fusetron dual-element fuse has a fuse link element to protect against short-circuits and a thermal cutout element to protect against overloads. It has tremendous time-lag and much less electrical resistance.

For all types of circuits or feeders (motor as well as lighting, etc.) they are highly desirable. Their long time-lag prevents useless shutdowns caused by ordinary fuses or breakers opening on motor starting currents or other harmless overloads. They will hold even if all motors on circuit start at one time — yet they protect against short-circuit with all the speed of a fuse.

Their lower resistance means that switches and panelboards will operate at a much cooler temperature than with other fuses. This prevents damage and wipes out needless blowing of fuses so often caused by excessive heating.

Fusetron dual-element fuses carry Underwriters' Laboratories label and are approved for both motor-running and circuit protection.

BUSS FUSE REDUCERS

Make it possible to use Fusetron or ordinary fuses of a size smaller than the fuse clips are intended to hold.

Fit in any panel or switch as reducers, take up no more space than would a fuse of a size to fit clips.

Poor contact troubles are entirely eliminated because these reducers provide clamp contact throughout.

Reducers fit any form of clip, either the spring type or clamp type.

Packed—one pair in a carton.

Volts	Amp. Rating	No.	Price per pair
250 Volt	60 to 30	263	\$0.60
250 Volt	100 to 30	213	1.15
250 Volt	100 to 60	216	.85

250 or 600 V.	200 to 100	2621	1.65
250 or 600 V.	400 to 200	2642	2.60

BUSS CLIP-CLAMPS

Insure Good Contact Between Clips and Fusetron or Ordinary Fuses

Prevent needless blowing of fuses by eliminating heating from poor contact that often causes fuses to blow.

Reduce needless destruction of fuse-cases by preventing poor contact from burning up the fibre tube and destroying the fuse.

Makes replacement of fuse-clips unnecessary. Generally permits even injured clips to be used with perfect satisfaction.

Built for hard service and to prevent corrosion, all steel parts are heavily cadmium plated.

† Twin Lugs per Pole.

"SN" (Solid Neutral) Switches have a neutral strap between two poles. For example: No. 72221, a 2-pole switch, by the addition of this neutral strap becomes No. 72321SN, a 3-pole solid neutral switch. Exception: 3, 4 and 5-pole solid neutral switches 800-ampere and above have regular 3, 4 and 5-pole bases.

"SWN" (Switching Neutral). When Switching Neutrals are required on enclosed switches, order the standard switch of the required number of poles and use a dummy fuse in the neutral.

TYPE D 30 AMPERE
FRONT OPERATED SWITCHES

Designed primarily for Service Entrance and for general purpose use.

Features: Locking provision — plenty of wiring room — insulated groundable neutral — removable interior — positive make and break — plenty of knockouts (12).

Cat. No.	Description	List Each
58211SN	2 Pole solid neutral (1 blade, 1 plug fuse) 125 volts.....	\$2.95
58311SN	3 pole solid neutral (2 blades, 2 plug fuses) 125/250 volts.....	3.85
58311SNT	3 pole solid neutral (2 blades, 2 plug fuses) 125/250 volts with meter twistout	3.85
58211	2 pole (2 blades, 2 plug fuses) 125/250 volts	3.50
58211T	2 pole (2 blades, 2 plug fuses) 125/250 volts with meter twistout	3.50
58221	2 pole (2 blades, 2 cartridge fuses) 250 volts.....	4.40
58321SN	3 pole solid neutral (2 blades, 2 cartridge fuses) 125/250 volts 230 volts AC.....	5.50

Box size: 4 1/2" wide x 6 1/8" long x 3 3/4" deep.

TRUMBULL WIRING GUTTERS

These gutters are used for enclosing distribution wires, and also for feeding a bank of meters. Across the top and bottom near back are concentric knockouts $\frac{1}{2}$, $\frac{3}{4}$, 1 and $1\frac{1}{4}$ inch. Gutters and fittings are finished to match switches, and are packed in corrugated cardboard cartons for shipment.

LISTINGS continued on next page.

*When ampere ratings are not shown, specify 15, 20, 25, 35 or 50 ampere single- or double-pole branch circuits desired for each catalog number ordered.

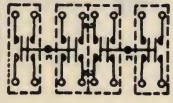

Notes: Individual single polarity unit blocks in these devices are limited to a maximum of 135 amperes.

Raintight enclosures—Box numbers which can be provided with raintight enclosures and List Price additions, furnished on request.

The use of handle bails, coupling outside single poles, makes possible more than 2 double poles on devices in Box 3 and more than 4 double poles on devices in Box No. 5.

Discount Schedule C-3

TRUMBULL WEATHERPROOF
LIGHTING PANEL

FOR GENERAL ELECTRIC OUTDOOR SPORTS
FIELD LIGHTING

Branches: 2 wire, single pole, plug fusing, (30 amp.). Fuses not included.

Weatherproof box, 10 gauge sheet steel. All boxes identical. Dimensions 19 $\frac{1}{2}$ inches high; 21 inches wide; 7 $\frac{1}{4}$ inches deep overall. Gasketed door. Brass hinges. Vault handle catch and lock. 2-inch knockout in bottom end. External mounting strap with stud for attachment to pole.

Single Phase—3 Wire

*List prices based on 15-ampere breakers. 10, 20, 30, 40 or 50-ampere breakers can be supplied at same price unless increased bus capacity is required. For increased mains, space only and special features, information on request.

Double-pole breakers: For each double-pole breaker (independent trip) that is substituted for two single-pole breakers, add \$1.50 to list.

Main breakers: 50 amperes—Type AT; 100 amperes—Type ATB; 200 amperes—Type AT.

†Box 5 1/4 inches deep.

Standard knockouts furnished on all lighting panelboard boxes unless otherwise specified on order. Special boxes furnished with blank ends unless knockout information accompanies order.

Lighting Panelboards furnished with DUAL PURPOSE FRONT; suitable for either flush or surface mounting. Where front must not overhang box edges, specify "must be SURFACE MOUNTING."

For general additions when other than standard features are required, information on request.

Standard knockouts furnished on all Lighting Panelboard Boxes unless otherwise specified on order.

†For box sizes, see a following page. Blank box ends will be furnished on all special panelboard boxes unless knockout information accompanies order.

Solderless Lugs standard in the mains.

Furnished with a dual purpose front which is suitable for either **Flush** or **Surface** mounting. Where front must not overhang box edges, specify "must be surface mounting."

TRUMBULL DISTRIBUTION PANELBOARDS

Converti-Fuse Panelboards

- Service—Single phase or DC—2 or 3 wire
Three phase, three or four wire
Maximum 250 V. DC—575 V. AC
- Mains—1200 ampere lugs or 400 ampere switch maximum.
- Branches—30 to 400 ampere, one, two or three pole.
- Maximum convertibility through interchangeable sections and fuse clips.
- Compact design.

METHOD OF DETERMINING BOX DIMENSIONS

1. Layout panel as shown in typical example on a following page. Note that circuits 100 ampere or less are arranged double branch.
2. Total "X" units of height (X=2 $\frac{3}{8}$ inches).
3. Select box size from table of standard boxes. Note box width and depth from sketch on following page.

Total X Height	Box Height Inches	CABINETS 22" WIDE X 6 $\frac{1}{4}$ " DEEP				CABINETS 26" WIDE X 7 $\frac{1}{4}$ " DEEP			
		Boxes		Fronts		Boxes		Fronts

TRUMBULL LIGHTING AND POWER

Distribution

Panelboards

Trumbull offers a complete line of Panelboards which fall into two general classifications — those designed for medium loads generally required by lighting systems, and those designed for heavy duty industrial power distribution.

types. Circuit breaker protection is available in the relatively inexpensive ABH and MH panels and also in the deluxe Convertible Circuit Breaker type, which provides each branch circuit with individual heavy duty automatic circuit breakers.

Type NTP, typical lighting panelboard

Panelboards for lighting systems range in type from the new and inexpensive NTPS, which is especially suited for use as a relatively light load distribution center, such as that required by the average home, to the higher priced NAB which embodies circuit breaker protection — considered the best kind of protection for heavy duty lighting systems. Other Trumbull Lighting Panelboards include the NTPR and the NTP, both of which are of the switch and fuse type designed for group and branch circuit control of lighting distribution for all commercial applications, such as lighting in modern factories, office buildings, hospitals and similar structures. Engineered to provide safe control, these panelboards are styled to harmonize with all types of modern interior designs.

Power distribution panelboards which can carry loads up to 1200 amperes, are manufactured in five

Converti-fuse, typical panelboard for power distribution

Converti-Fuse,[®] an extremely flexible and compact distribution panel, and Swing-Wa,[®] featuring an ingenious switching mechanism which is built into the cover of the unit, are two well known switch and fuse power distribution panelboards. Both give maximum protection and flexibility to main and branch circuits, making the addition of branch circuits after the original installation a relatively easy matter.

TRUMBULL SWITCHBOARDS

- Dead front
- Maximum 600 volts AC
- Easy installation—factory prefabricated

F.O.I. Switchboard

F.O.I. SWITCHBOARDS

are designed for flexibility, safety, low-maintenance cost and reliability. Used as heavy duty distribution centers for modern industry, they are assemblies of formed steel panels which contain F.O.I. (front operated interlocking) units. These units are fusible switches of heavy duty Type A parts and are rated from 30 to 1200 amperes, up to 600 volts AC or DC and in 2, 3 or 4 pole construction.

CIRCUIT BREAKER SWITCHBOARDS

are compactly designed for small space installation, yet their unit construction makes them easily adaptable for future expansion. Featuring automatic overload protection for heavy-duty industrial and commercial applications, these switchboards are composed of circuit breaker units which have both thermal and magnetic trips. They are rated from 15 to 600 amperes; up to 600 V. AC or 250 V. DC; and are available in 1, 2 and 3 pole construction.

Circuit Breaker Switchboard

Controlite

CONTROLITE

is a combined switchboard and dimmer bank that is used wherever control of lighting is desired — in such places as theatres, auditoriums, arenas, schools, lodges, night clubs, and stores. Because of controlite's complete internal wiring, installation is merely a matter of making connections to main lugs and branch circuit terminals. Main and branch circuits are protected by built-in over-current protective devices. Controlite is manufactured in three basic types: 1. using resistance dimmer plates; 2. using Autrastat (auto-transformer) dimmers; 3. Electronic type using saturable reactors. Any desired combination of control for both switching and dimming may be obtained; however, of the three types, only the electronic incorporates preset dimming.

Note: Complete price information for above products is available from your McLaughlin Sales Representative.

HEINEMANN "RE-CIRK-IT" CIRCUIT BREAKERS

HEINEMAN R.E.A.
SERVICE
EQUIPMENT

These Magnetic Circuit Breakers in outdoor type, corrosion-proofed steel enclosure, service as main disconnect and over-current protection for the electrified farm. This service equipment may be installed on the yard pole or on the farm building and meets R.E.A. as well as Underwriters' requirements.

CLARK CONTROLLER A.C. COMBINATION MAGNETIC STARTERS

Bulletin 6020

NON-REVERSING—WITH AIR-CIRCUIT BREAKER
ACROSS-THE-LINE

Size 1 Form MA Starter
in NEMA Type 1 Enclosure

Bulletin 6020 non-reversing combination across-the-line starters are designed to provide full voltage starting and overload protection for squirrel cage motors, and can be used as primary switches for wound rotor induction motors.

This type of starter consists of a contactor for making and breaking the power circuit to the motor, a circuit breaker for short circuit protection, and an overload device for removing the motor from the line in the event of a dangerous overload.

The Bulletin 6020 starter combines circuit breaker, contactor and overload device in a common enclosure.

NOTES

1. Price includes starter complete with normally open interlock, overload relays, and circuit breaker. Starter sizes 0 to 4 incl. use thermal type overloads. The thermal overload relays include 2 heaters.
2. Heater elements may be omitted at 60 cents list each or \$1.20 list per pair. Extra heaters may be purchased at 60 cents list each or \$1.20 list per pair.

The Circuit Breaker is the De-ion type high interrupting capacity air circuit breaker which provides short circuit protection. Double break silver-to-silver contacts.

Hinged armature magnet.

Eutectic alloy type thermal overload relays provide motor overload protection.

Molded arc shields are non-carbonizing.

Form wound operating coil.

De-ion type circuit breaker.

Starter assembly mounted on steel sub-panel.

Enclosures allow ample space for wiring.

CLARK A.C. MAGNETIC STARTERS—BULLETIN 6013

Non-Reversing Across-the-Line

SIZES 0, 1 and 2—TYPE DS

A twist with the fingers is all that is required to remove worn contacts and replace the new ones. The contact pressure springs are anchored in position so that they will not fly out of place when the contacts are removed. The contacts are so designed that they can be slipped into position in the holders without hardly a glance. Alignment is automatic.

Remove 2 Screws:
All Moving Parts
Lift Out.

As illustrated above, the entire moving assembly may be removed for major maintenance purposes by loosening two screws which are retained in position by special spring clips. All moving parts are then exposed for easy handling.

CLARK A.C. MAGNETIC STARTERS—BULLETIN 6080

PRIMARY RESISTOR TYPE FOR SQUIRREL CAGE MOTORS

Bulletin 6080 starters are designed to start A.C. squirrel cage motors by connecting the motors to the line through a resistor, thus reducing the voltage applied to the terminals of the motor. After a definite adjustable time, the resistor is short circuited, and full voltage is applied to the motor.

Ordering Instructions: Order as Follows: (Quantity)—Code No. () Bulletin 6080 Size (), () Point (non-reversing/reversing) Starter in NEMA Type () enclosure for () H.P., () Volt () Phase () Cycle motor. Full load current () Amperes.

NOTE: If additions or modifications are required, specify in full detail.

The illustration at left shows the Bulletin 6080 Starter, Size 4, front cover removed.

Button

Code No. A100-
54800A-1 Type DB
Three Element Push
Button

STANDARD DUTY—TYPES EE and DB

The Type EE and DB line of push buttons is offered for use on ordinary starter applications where the frequency of operation, contact requirements, or size of magnets controlled do not justify the use of the more expensive Bulletin 100 Type D Heavy Duty Stations.

These stations should not be used with contactors or starters larger than NEMA size 4, 150 ampere size.

*NOTES

- 1. List price includes assembled push button station complete with elements and name plates designated.
- 2. No modifications of these stations are available.
(a) If other arrangements are required, refer to the Heavy Duty Type D push button stations.

MINNEAPOLIS-HONEYWELL REGULATORS

SURFACE AQUASTAT*

Surface mounting limit controls with bi-metal sensing element and mercury switching means. No insertion element. Primary application is that of safety or high limit control (in conjunction with a room thermostat) on all types of hot water heating systems. The reverse acting LA409B is used as a low limit control on unit heater installations to prevent

fan operation when heater coils are at low temperature.

Convenient mounting bracket and pipe straps for rigid installation; may be mounted on vertical, horizontal or angled pipes. Control point adjustment by screwdriver slot through cover. Black Kristo Krak finish. Range: 100° to 200° F. Height 4 3/8 inches; width 3 inches; depth 2 1/8 inches. Centigrade scale markings equivalent to standard Fahrenheit range at \$1.30 list extra.

Type	Series	Circuit	Shpg. Wt. Lbs.	Price Each
LA409A	40	Opens	1	\$9.90
LA409B	40-10	Closes	1	9.90

*Trade Mark.

IMMERSION AQUASTAT*

Bi-metal actuated device, commonly used as high limit controls on hot water systems or as low limit controls in conjunction with summer-winter hot water installations. Mercury switch for circuit control. Features include visible scale, detachable well, internal wiring connections with ample spacing. Snap-on cover. Main scale adjustment screwdriver slot through cover. Differential adjustment internal.

(Case) Height 4 3/8 inches; width 3 inches; depth 2 1/8 inches; distance from mounting surface 2 3/4 inches. Range: (L444A) 80° to 240° F.

Price, Type L444A Immersion Aquastateach \$11.20

*Trade Mark.

TYPE M220 ELECTRIC JANITOR MOTOR

Designed for use in operating draft and check dampers on a furnace or boiler which is under thermostat control. It is a two position type induction motor with a Series 20 control circuit. Equipped with a built-in manual switch which provides for manual operation of draft damper when firing the furnace or boiler. Power consumption 10 watts.

Voltage and frequency, 115 volts, 50 or 60 cycle, standard. For other A.C. voltages and frequencies, add \$2.60 list extra. Power type plate or foot mounted transformer furnished. Zinc casting, natural finish. Height 4 1/2 inches; width (less motor arms) 3 3/8 inches; depth 4 1/4 inches.

Price, Type M220A Damper Motor.....each \$18.00

MINNEAPOLIS-HONEYWELL DAMPER REGULATOR SETS

ELECTRIC JANITORS

Control Systems Y100A, Y18A

These are inexpensive all electric control sets to position the dampers on domestic coal fired heating plants. They provide exceptionally accurate temperature control. The Standard Electric Janitor (illustrated) includes the T21 Heat Leveling Acratherm and the M220A Motor with basement switch. The Da-Nite Electric Janitor includes the T209 Da-Nite Acratherm. The Da-Nite Acratherm offers the advantages of lowered night temperatures with automatic return to the day time level. Tests have proved that lowered night temperatures effect definite fuel economy. All sets are supplied complete with fittings.

Type	Description	Wt. Lbs. Each	Price Each
Y100A	(T21A Acratherm, M220A Motor)	7 1/2	\$29.40
Y18A	(T209A Da-Nite Acratherm, M220A Motor)....	8 1/2	41.50

SPRING RETURN ELECTRIC JANITORS

Y101A Heat Leveling Janitor

Y204A Chronotherm Electric Janitor

An important feature of this package is that a powerful spring in the motor drives the damper to the checked position in case of power failure. This safety feature prevents overheating during current interruptions. The Y101A includes the T81 Heat Leveling Acratherm and the M87 Spring Return Motor which is equipped with a basement switch. The Y204A features the TM847A Chronotherm with the M87 Spring Return Motor. The necessary fittings are packed with each set.

Type	Description	Wt. Lbs. Each	Price Each
Y101A	(T81A Acratherm, M87A Motor)	7 3/4	\$34.30
Y204A	(TM847A Chronotherm, M87A Motor)	11 3/4	57.80

MINNEAPOLIS-HONEYWELL REGULATORS

TYPE TA42A THERMOSTAT

Type TA42A has been purposely designed for use where accurate and dependable control of line voltage, heavy duty devices are involved and is capable of handling directly large motor-driven units, industrial and commercial stoker fired heating plants, etc. On larger or polyphase motors it should be used in connection with magnetic starters. Where desired, it can be used in low-voltage circuits.

The horizontal design provides maximum air circulation and greatly reduces the effect of contact heat. The new M-H Con-Tac-Tor snap-switch provides the starting action. This is a non-magnetic switch, self-enclosed to protect it from dirt, dust, moisture and grime, and has been proved by exhaustive tests to be capable of years of dependable service. Another distinctive feature is the temperature setting knob which can be removed to lock the thermostat in order to prevent tampering. Models are also available with a "positive on" feature for cooling applications.

Type TA42A makes contact on temperature fall (Series 40). Range 42-75° F. and 56 to 84° F.

Finish: Silver bronze on grey sub-base. (Special finishes available at extra cost).

Dimensions: Height 2½ inches; depth 2½ inches; width 5 inches (including knob).

Price, Type TA42A Thermostat.....each **\$14.90**

TYPE T415 TEMPERATURE CONTROLLER

Temperature controllers are commonly used to control temperatures in ducts, tanks, boilers, etc. Pressure changes in the vapor filled capsule are transmitted through a flexible element to a bellows in the instrument, which in turn operates a mercury switch.

Capsule Fill: "Cross ambient" for ranges up to and including 65-140° F. "High temperature" fill for higher ranges.

Element: 5-ft. tubing standard, including capsule; 10-ft. at extra cost. Element Material: Copper capsule and tubing standard for all ranges.

Ranges: 0-70° F., 15-90° F., 60-100° F., 65-140° F., 75-200° F., 80-210° F., 105-200° F. Other ranges available, prices on request.

Extra charges for ranges or element lengths, other than specified above, will be supplied on request. Pressure fitting included with each controller.

Price, Type T415A Temperature Controller in above ranges, with 5-ft. elementeach **\$23.00**

MINNEAPOLIS-HONEYWELL REGULATORS

FURNACESTAT*—Mercury Switch Type

*Trade Mark

This device is a furnace fan controller which prevents circulation of cold air by permitting fan operation only when the air temperature in the bonnet is within scale settings. A simple manual adjustment provides fan operation (for cooling) during summer.

Bi-metal actuated type with mercury switch for control of the fan circuit. Swivel bracket mounting. Scale setting visible, adjustable by external screw. Differential setting by internal lever. Internal wiring connections. Black Kristo Krak finish. Dimensions: (Case) Height 4¾ inches; width 3 inches; depth 2½ inches. Special insertion lengths to 18 inches maximum at \$6.60 list extra.

Price, Type LA412A Furnacestat.....each **\$11.20**

M-H RELAYS

A complete line of simple and compactly designed relays is available for the requirements of various applications involving the control of line voltage loads from sensitive low voltage thermostats or controllers, or from line voltage controllers of limited capacity. Each is a complete self-contained unit. Relays equipped with Series 10 or Series 30 control circuits include a built-in transformer and are furnished for standard 115 or 230 volts, 50 or 60 cycle current. Relays for other commercial voltages or frequencies can be furnished at extra charge.

†Low Voltage; transformer not included.

MINNEAPOLIS-HONEYWELL REGULATORS

CHRONOTHERM*—ROOM THERMOSTATS

These Chronotherms are the latest in automatic thermostats. Day and night control points and clock settings can be made externally with internal temperature-lock settings. "Setback" and "pickup" time settings

are adjustable in any fractions of an hour, with a minimum of 6 hours setback. The slow rise cam allows a gradual increase in setting at morning pickup time which helps in reducing the "overshooting" tendency of some heating plants.

Available in Series 20 (TA247A), and Universal Series 10-80 (TM848A and TM850A). Range 50° to 80° F.

The TM848A Plug-in type is specifically designed for convenient replacement having a "plug-in" transformer, a universal heater element and snap-action three-wire switching contacts.

Silver bronze finish. Special finishes available at extra cost. Submit sample. Dimensions—Overall: height, 2½ inches; width, 5 inches; depth, 2½ inches.

Type	Series	Switch	Action on Temperature Fall	Price Each
TA247A	20	S.P.D.T.	Opens circuit	\$34.90
TM848A	10-80	3W Snap	Closes circuit	34.90
TM850A	10-80	3W Snap	Closes circuit	34.90

MANUAL THERMOSTATS

A bimetal actuated low voltage open contact thermostat for controlling relays, Protectorelays, gas valves, motors, etc. Available in Series 10 (Heat Anticipation), Series 20 (Heat Leveling), or Series 80 (Heat Leveling, snap action) for heating applications. Temperature setting by external dial at top. Silver bronze finish.

Range—55° to 85° F. (Equivalent range of 13° to 30° C. available at no extra cost.) Other ranges available. 35° to 65° F. or 45° to 75° F. at no extra cost on TM11A.

Type	Description	Wt. Lbs. Each	Price Each
TM11A	Heat Anticipation (Series 10)	½	\$11.40
T21A	Heat Leveling (Series 20)	½	11.40
TM81C	Snap Acting (Series 80)	½	11.40

DA-NITE ACRATHERM*

Incorporates all the features of the standard Acratherm plus these advantages: (1) An extra night dial, (2) a simple external knob for manual shutdown to any desired night setting, and (3) automatic morning pickup to day temperature level. Range—Day 55° to 85° F. Night 45° to 75° F. Differential, adjustable. Rating, low voltage A.C. only. Dimensions, height 5¾ inches, width 2¼ inches, depth 2½ inches.

Locking device for day and night dials add \$2.60 list extra. Centigrade range at no extra cost.

Type	Description	Wt. Lbs. Each	Price Each
T109A	Heat Accelerated (Series 10)	1¼	\$23.50
T209A	Heat Leveling (Series 20)	1¼	23.50

*Trade Mark.

MINNEAPOLIS-HONEYWELL REGULATORS

LIGHT DUTY LINE VOLTAGE THERMOSTAT

Magnetic snap-acting, bi-metal actuated room thermostats, suitable for either line or low voltage applications. Types available for either heating or cooling systems. May be used for direct control of small motors, unit heaters, coal blowers, etc. Temperature setting by external lever in bottom. Silver bronze finish. Height 5 inches; width 2 inches; depth 1½ inches. Range: T44A—44° to 76° F. or 54° to 86° F. Special range (T44A) 34° to 66° F. and 64° to 96° F. (or Centigrade equivalent) at \$5.30.

Special Features: (T44A only) Night shut-off at no extra cost. (T44A only) Centigrade scale equivalent to standard Fahrenheit range at no extra cost. Locking device (cover lock screw) at no extra cost. Blank Cover (less thermometer) at no extra cost.

Price, Type T44A Thermostat.....each \$12.20

TYPE T491B AIRSWITCH

Mercury Switch Type

The Airswitch is a heavy duty room type thermostat for controlling either cooling or heating equipment, such as unit heaters, refrigeration compressors or solenoid valves. It is widely used in greenhouse, garages, warehouses, cooler rooms, florist cabinets and similar applications. The non-corrosive bi-metal actuating element and mercury switch contacts make the Airswitch suitable for use under extreme conditions of temperature and humidity. A locking screw beneath the cover is provided to prevent tampering with the setting indicator.

Type T491B Airswitch (for heating) makes contact on temperature fall (Series 40). Aluminum bronze finish. Special finish at extra cost. Supplied in ranges 15-95° F. standard. Special ranges at extra cost, 40-120° F. and 60-140° F.

Dimensions: Height 5¼ inches; width 4 inches; depth 3 inches.

Price, Type T491B Airswitch.....each \$14.00

HEAVY DUTY LINE VOLTAGE THERMOSTAT

Mercury Switch Type

Heavy duty line or low voltage thermostats for control of heating or cooling systems. Capable of handling directly large motor driven unit heaters, coal blowers, cooling systems, etc. Provided with a bellows and a bellows actuated mercury switch. On large or polyphase motors, may be used in connection with magnetic starters.

Adjustment by external knob at side of case. Silver bronze finish. Height 5¾ inches; width 3¾ inches; depth 2¼ inches. Range: 40° to 80° F. or 60° to 100° F.

Price, Type T42A Thermostat.....each \$15.90

MINNEAPOLIS-HONEYWELL REGULATORS

TYPE S403 TIME-O-SWITCH (Attic Fan Timer)

The Type S403A is a line voltage timing device which was designed primarily to control the operation of attic fans, store lights, or other electrical equipment where the current supply is to be turned off after some predetermined interval of time has elapsed.

The timer may be set to close the circuit for any period of time from one half to eleven hours, merely by twisting the knob on the front of the timer until the desired time interval appears on the dial. A twist of the knob in the opposite direction will turn off the current supply at any time, should this become necessary.

Provision is also made to permit turning "on" the switch indefinitely. Merely depress the small lever on the side of the case and the switch will be placed in the "on" position until it is manually turned "off."

The important features of this device include the well known Con-Tac-Tor mercury switch and facility for mounting so that either concealed or exposed wiring may be used. This latter feature makes the timer easily adaptable for use on old or new installations.

The Time-O-Switch can be located at any point that is convenient for wiring, operation, etc. In general, locating the instrument about 5 feet above the floor will prove more satisfactory. The Controller must always be mounted in a vertical upright position with the top of the case horizontal.

Specifications

Type—

S403A Time-O-Switch—(line voltage timer) "closes" the circuit for an adjustable period of time (from ½ to 11 hours), manual "on" lever.

Electrical Rating—10 amps. at 110 volts, 5 amps. at 220 volts, 1 H.P. A.C., ¼ H.P. D.C. (110 or 220 volts) .

Rating In Amperes

	115 Volts		230 Volts	
	Running Current	Locked Rotor	Running Current	Locked Rotor
A.C.	7.4	44.4	5.1	30.6
D.C.	2.4	24.0	1.2	12.0

Finish—Silver-bronze.

Timing Limits—½ hour to 11 hours.

Dimensions—Height 5½ inches, width 3¾ inches, Depth 2½ inches.

Mounting Means—Standard switch box, or wall mounting. Knockout for Xtensionduct (wire mould).

When Ordering Specify—

1. Type Number.

Type	Description	*Shpg. Wt. Lbs.	Price Each
S403A	Time-o-Switch	3	\$11.80

*Single unit weight shown. Quantity shipment weights will be proportionately lower.

SANGAMO TIME SWITCHES

2-CIRCUIT TYPES LY AND WY (Supersedes KAY and VSWY)

Type LY

The synchronous Type L and carry-over Type W in two circuit construction. The "on" and "off" operations of each circuit are independent, (except when Omitting Device or Astronomic Dial is required). Equipped with 2 pairs of tripping levers.

Type	Description	A.C. Amp. Per Circuit	List Price*
LY-11	Two Circuit	35	\$32.50
WY-11	Two Circuit	35	\$52.50
LYZ or WYZ, Standard Astronomic Dial, add			
LYH or WYH, "On" Omitting Device, add			
LYF or WYF, "Off" Omitting Device, add			
LYO or WYO, Weatherproof-Windowless Case, add			
LYR or WYR, Extra Setting Levers, per pair			
LYG or WYG, Reverse Time Limits, No extra charge.			

*Standard Motors: Specify 120 or 240 volt, 60 cycle.

TYPE TC ELECTRICALLY-WOUND A.C. or D.C.

Built for extreme precision. Electrically-wound movement with full eleven-jeweled escapement. Main-spring reserve operates switch during current interruptions up to twenty hours. Particularly advantageous when controlled frequency is not available. ON and OFF operations can be set as close together as 15 minutes.

Type TC

Alternating Current

Form	Poles	Throw	A.C.—120 V.		A.C.—240 V.	
			Amp.	List	Amp.	List

TC-31	Triple	Single	10	106.00	5	106.00
TC-32	Triple	Double	10	124.00	5	124.00

Specify voltage and frequency. 6¾" wide, 13¾" high, 4¼" deep. Shipping weight, 20 pounds.

Type TCZ, Standard Astronomic Dial, add \$11.00. Type TCH, "ON" Omitting Device, add \$6.00. Type TCHE, Advance Time Device, add \$12.00. Type TCO, Weatherproof-Windowless Case, add \$15.00. Special Motor Voltages, other than listed, add \$5.00. Momentary Contacts (TC-12 only) ½ to 2 Seconds, add \$8.00. Momentary Contacts (TC-12 only) 4 to 5 or 8 to 10 Seconds, add \$14.00.

SANGAMO TIME SWITCHES

TYPE L—SYNCHRONOUS

Type L
(Supersedes KA)

TYPE W—SYNCHRONOUS CARRYOVER

Type W
(Supersedes VSW)

Sangamo Hysteresis, high-torque self-starting motor, slow speed 450 r.p.m. unaffected by extreme temperatures.

Pure silver contacts, conservatively rated 35 amperes on Types 11, 12, 21. Two pairs of setting levers, 90 minutes between "off" and "on," 30 minutes between "on" and "off." Reversible time limits if ordered. Gasket sealed, rain proof case.

Dimensions: 10¼ inches high, 5¼ inches wide, 4 inches deep overall. Shipping weight, approximately 7 lbs.

Type W, by combining synchronous timing with reserve spring clock operation, provides accurate timing during power shortages up to 10 hours and eliminates necessity of resetting of dial.

A new positive action thermal-blocking device releases the reserve timing movement during service interruptions. When power is restored, the synchronous motor resumes the timing operation and re-winds the spring of the clock movement. In all other respects, the specifications of Type L apply.

Type	Poles	Throw	AC Amperes Circuit	List Price

WG,	Reverse Time Limits, no extra charge.			

Standard Motors: Specify 120 or 240 volts, 60 cycle. Special motors: 25 or 50 cycle, add \$1.00; 24 volt, add \$1.00; 480 volt (60 cycle) add \$6.00.

ASTRONOMIC DIAL

When a Sangamo Time Switch is fitted with an Astronomic Dial it will automatically turn lights "on" at sunset and "off" at sunrise, compensating progressively day by day for the change in seasons. Or, this dial permits the "off" operation at any time between 9:30 p.m. and 2:15 a.m.

Ideal control for: outdoor advertising, street-, flood-, air beacon-, light house-, and yard-lighting.

Standard latitudes 30°, 35°, 40°, 42½° and 45° add \$11.00.

Special latitudes 20°, 27½°, 32½°, 37½°, 50° and 52° add \$15.00.

SANGAMO TIMERS

TYPES T AND TJ TIMERS—SYNCHRONOUS

Type T

Type TJ

Interval timer for control of attic fans, unit heaters, air conditioners and other appliances.

Sangamo synchronous, self-starting, slow speed 450 R.P.M. motor. Precision machined gears.

Types T-12H and TJ-12H timers provide an automatic OFF operation following a manually-set ON period of from 15 minutes to 12 hours. T-30M and TJ-30M have an ON period of from 1 to 30 minutes. Two mounting designs are available: Type T for switchbox or wall installation. TJ with plug-in cord and built-in receptacle for portable use. Both types to be operated in an upright position. Contacts are single pole single throw, normally open. T rated at 15 amperes AC; TJ rated at 10 amperes or 1/4 HP AC. Overall dimensions: height 5 3/8 inches, width 3 inches, depth 3 3/4 inches.

Type	Interval	AC Rating	Shpg. Wt. Lbs.	Price Each
T-12H	15 min. to 12 hrs.	15 amp.	2	\$12.45*
T-30M	1 min. to 30 min.	15 amp.	2	12.45*
TJ-12H	15 min. to 12 hrs.	10 amp. or 1/4 HP	2 1/4	14.45†
TJ-30M	1 min. to 30 min.	10 amp. or 1/4 HP	2 1/4	14.45†

*Standard Motors: 120 volt, 60 cycle. Special Motors: 24 or 240 volt, add \$1.00; 25 or 50 cycles, add \$1.00.

†120 volt, 60 cycle motor. 25 or 60 cycle, add \$1.00.

SANGAMO TIME SWITCHES

TYPE LS SYNCHRONOUS—TYPE WS SYNCHRONOUS CARRYOVER

Synchronous Socket Types

Type WS

The Type LS with self-starting synchronous motor is built for mounting on meter sockets the same as used for mounting socket type watt-hour meters. Its operation is identical as that of the Type L time-switch, except that the time dial can be set with a screw driver through a sealable opening in the cover.

The Type WS combines the precision of synchronous motor timing with the carry-over feature of the Type W time-switch. Type WS provides two openings in the glass cover, the upper for setting of the time, the lower for actuating the balance lever.

Type	Poles	Throw	AC Amp. Circuit	List* Price
LS-11	Single	Single	35	\$25.50
LS-21	Double	Single	35	28.00
LS-12	Single	Double	35	28.00
WS-11	Single	Single	35	44.50
WS-21	Double	Single	35	47.00
WS-12	Single	Double	35	47.00

*Standard Motors: Specify 120 or 240 volt, 60 cycle. All special features of the Types L and W can be applied to the Types LS and WS Switches.

MARK-TIME SWITCHES

MARK-TIME PORTABLE SWITCHES

Controls the time operations of any electrical appliance, device or circuit. Black bakelite case. Brushed chromium dial. Equipped with 6 feet rubber extension cord and series tap plug. Single-pole, single-throw. Current rating — 10 amp., 125 volts; 5 amp., 250 volts; A.C. or D.C., any cycle.

Turns current "off" at any time up to maximum time interval of switch. Used for heating pads, washing machines, electrical kitchen appliances, air conditioners, fans, room heaters, beauty shop machines, industrial machinery.

No. 5501 15 minute "off" switch.....\$6.55

No. 5502 30 minute "off" switch.....6.55

No. 5503 60 minute "off" switch.....6.55

These switches can also be made up in 15 amperes at \$1.65 additional.

No. 4505 5-HOUR "ON" OR "OFF" SWITCH

Turns current "on" or "off" at any time up to a maximum of five hours. 10 amperes. Used for radio sets, ventilating fans, neon signs, electric roasters, refrigerators, oil burners, battery chargers, garage heaters, poultry and dairy applications, and all uses listed under No. 5502.

No. 4505 5-hour "on" and "off" switch....\$11.95

No. 4505B Same as above except 15 amperes 13.60

9000 SERIES WALL SWITCH

Wall type unit which may be used to provide delayed action for porch or garage lights where it is desired to provide illumination for any predetermined time interval. Mechanically operated, wound and set simultaneously for time by merely turning the knob clockwise. Rugged and durable, this switch has full 20 amp. capacity and is rated for continuous duty. Ivory finish. Plate sets flush with wall in outlet box 2 1/2 inches or more deep.

No. 9000 Series Wall Switch in any timing up to 12 hours.....each \$6.55

A-9-S PHOTOGRAPHIC TIMER

An attractive unit mounted in black bakelite case timed for 60 minutes, and easily portable for service anywhere in the home. Excellent for timing cooking operations, phone calls, sun lamp treatments, etc. Sounds lingering chime note at end of set time. Adjustable stop permits resetting by sense of touch.

Price, No. A-9-S-4 (60 sec.).....each \$4.45

MARK-TIME SWITCHES

COIN METER No. 3200 SERIES

Used by apartment houses for laundry equipment—washers and ironing machines. Also for sun lamps, "Gym" devices, night tennis courts, amusement park devices, for current in tourist camps. Takes dimes for 20 minutes and quarters for an hour. Other timings available.

Also obtainable for AC operated only, at reduced price.

No. 3275 AC-DC Coin Meter\$19.60

MARK-TIMERS

Bell gives one lively musical chime at any time selected. An ideal time reminder and memory jogger for kitchens and other household uses; business and professional offices; hospitals, schools, etc. Non-electric. Every place a clock is used, a Mark-Timer is needed to tell when "time's up."

No. 56 Black — 1 hour\$4.15
 No. 57 Black — ½ hour 4.15
 No. 58 Black — 15 minutes 4.15
 No. 59 Black — 5 minutes 4.25
 No. 60 Black — 60 seconds 4.95

4700 SERIES ELECTRIC TIME SWITCH

Center stud mounted "Off" type switch in corrosion resistant steel case. Set and wound simultaneously by a single twist of the knob. Especially designed for short timing cycles — maximum 24 minutes. Special variations in timing available upon request. Furnished without dial or knob.

Dimensions: Diameter 2½ inches, depth 1½ inch. Regularly supplied with 150-watt contacts. For A.C. operation only. This unit was particularly engineered to time short cycles accurately, and at the same time take up a minimum amount of space. Center stud mounting facilitates incorporation in such devices as sun lamps, heating pads, electrical kitchen appliances, beauty shop equipment, etc.

Price on request.

 PROMPT AND CAREFUL
 ATTENTION**

PYRAMID "AMPROBE" SPLIT-CORE VOLT-AMMETER—POCKET SIZE

The "Amprobe" is the new pocket-sized split-core volt-ammeter for measuring currents and voltages without interrupting the circuit. With overall dimensions of 7½x2½x1½ inches and weighing only 14 oz., the Amprobe is less than half the usual size and weight of such instruments. May be carried in the pocket or worn on the belt. Specifically designed for engineers, electricians, manufacturers of electrical equipment, technicians, motor repair shops, maintenance men. One-hand operation. Seven-position switch, which can be flipped by the little finger of the hand holding the instrument, selects the meter scale. Five current and two voltage ranges. Finger trigger on the side of the case opens the transformer probe jaws, enabling them to clamp around the conductor and thus measure the current in that circuit. Jaws are specially shaped to get into tight spots. To measure voltage, a pair of accompanying test leads are plugged into the pin jacks on the front of the case and then connected to the line. Large, jeweled D'Arsonval movement and alnico magnet encased in a dust-and-moisture-proof compartment. Accuracy of ± 3% of full-scale reading, including any variation due to position of the conductor in the jaws. Completely insulated. No metal parts come in contact with the hand or circuit. May safely be used on bare conductors carrying as much as 1000 volts. Jaws will accommodate bus bars up to ½x1½ inches or cables as large as 1½ inches in diameter. Comes complete with voltage test leads and genuine top-grain cowhide, zippered case.

Model No.	Meter Scales Amperes	Volts
A-5	6.5/13/26/65/130	130/260
A-5-1	6.5/13/26/65/130	150/600
3-6	10/25/50/100/250	150/600

One "on" and one "off" daily operations standard.

One additional set of "on" and "off" tripping levers, when specified, at no extra charge. For more than 1 additional set, prices on request.

SANGAMO ROUND SOCKETS COMPLETE WITH SEALING RINGS (Special Socket Discounts Apply)

4 Terminal Socket
with two threaded outlets

Die-cast round sockets are available with 4, 5 or 6 terminals, and can be furnished with or without circuit-closing devices. 4 and 5 terminal sockets are made for vertical or horizontal mounting and have either two or three threaded outlets; 6 terminal sockets are for vertical mounting only and have two threaded outlets. Breakouts are provided in the back of most styles; sizes are specified in the tabulated list.

DIE-CAST ROUND SOCKETS WITH 4 TERMINALS

Use these sockets with 2-wire and 3-wire Type JS singlephase self-contained meters and Types JMS and JV-S time switch-meter combinations, except for Types JV-11-S2 and JV-21-S2.

SANGAMO INSTRUMENT TRANSFORMERS

TYPE M-6 TRANSFORMERS

600 Volts: 200 to 600 Amperes

The Type M-6 current transformer is designed for indoor service on circuits not exceeding 600 volts.

Transformer is of the wound type and has a single primary and a single secondary. The base mounting dimensions conform to recommended standards as given in EEI specification MS2.

A.S.A. Metering Accuracy Classification: Class 0.3 for B-0.1, B-0.2 and B-0.5 burdens at 60 cycles. Also has Class 0.5 rating at Burden B-0.2 under EEI specification MS2.

Primary Amps.	Ratio	List Price
200	40:1	\$45.00
400	80:1	48.00
600	120:1	53.00

TYPE M-3 TRANSFORMERS

1200 Volts: 100 to 800 Amperes

The Type M-3 three-wire current transformer is designed for indoor service on three-wire singlephase circuits. Meets A.S.A. 1.2 KV insulation class test requirements — 10 KV at 60 cycles and 30 KV full wave impulse.

Transformer has a two coil wound primary for connection in a three-wire circuit. The secondary current is 5 amperes when full rated current flows in both primaries.

A.S.A. Metering Accuracy Classification: Class 0.3 for B-0.1, B-0.2 and B-0.5 burdens at 60 cycles.

Type M-3 Transformer

Primary Amps.	Ratio	Bus Connection Width	Shpg. Wt. Lbs.	List Price
100	20/20:1	1	25	\$62.50
200	40/40:1	1 1/4	30	67.00
400	80/80:1	1 1/2	40	70.00
600	120/120:1	2 1/4	45	92.00
800	160/160:1	2 3/4	50	104.00

TYPES MB-50 AND MB-87 CURRENT TRANSFORMERS

Bus-Primary Type

MB-50; 5000 Volts, 1200 to 4000 Amperes; Impulse Level, Full Wave, 60 KV.

New design provides insulation to meet the A.S.A. 5.0 KV insulation test requirements — 19 KV at 60 cycles and 60 KV full wave impulse.

MB-87; 8700 Volts, 1200 to 4000 Amperes; Impulse Level, Full Wave, 75 KV.

New design provides insulation to meet the A.S.A. 8.7 KV insulation test requirements — 26 KV at 60 cycles and 75 KV full wave impulse.

The A.S.A. metering accuracy classification of Types MB-50 and MB-87 transformers for 60 cycles:

Burdens	B-0.1	B-0.2	B-0.5	B-2
Accuracy Class:				
1200 to 200 Amperes.....	0.3	0.3	0.3	0.6
3000 to 4000 Amperes.....	0.3	0.3	0.3	0.3

MB-50 and MB-87—Single Primary, Single

Primary Amps.	Ratio	Secondary		List Price	
		No. Bus Bars	Width Bus Bar	MB-50	MB-87
1200	240:1	1	4	\$ 95.50	\$125.00
1500	300:1	1	4	103.00	130.00
2000	400:1	2	4	113.00	138.00
3000	600:1	3	4	130.00	155.00
4000	800:1	3	6	138.00	172.00

WAGNER DRY-TYPE TRANSFORMERS

TYPE AE

Single-Phase—60 Cycle—55° C. Cont. Duty
General Purpose

Dry-Type
Transformer

Wagner dry-type transformers through 10-kva type AE, are designed for either indoor or outdoor service. They can be installed anywhere in factories, offices, stores, and homes — in out-of-the-way places, or immediately at the point of use, adjacent to the appliance or machine requiring lower or higher voltage than that supplied by the power company. Compact and light in weight, the type AE transformer is easy to install, and easy to move when changes are necessary.

Note: Ratings larger than 10-kva are for indoor installation only.

WAGNER DISTRIBUTION TRANSFORMERS

TYPES HEX, HEB, HEK AND HEL

Single-Phase—Oil-Filled, Self-Cooled
60 Cycle—55° C. Continuous Duty

Wagner single-phase, oil-immersed, self-cooled distribution transformers in ratings 1 1/2 to 500 KVA, 66000 volts and below are available in the following types:

HEX: Equipped with high-voltage pocket bushings and low-voltage tank wall bushings (built in sizes 100 KVA and smaller, 5000 volts and below).

HEB: Equipped with tank wall high- and low-voltage bushings (built in sizes 200 KVA and smaller, 5000 volts

and below).

HEK: Equipped with high-voltage cover bushings and low-voltage tank wall bushings (built in sizes 200 KVA and smaller, 5001 to 66000 volts).

HEL: Equipped with cover-type high- and low-voltage bushings (built in sizes 250 to 500 KVA, 66000 volts and below).

MATTHEWS LIGHTNING GAPS

For Rural Distribution Lines

MATTHEWS PROTECTOGAP-PROTECTOLINK COMBINATIONS

Provide efficient, low cost protection against lightning surges and line failure on the primary side of rural distribution circuits. Gap is ahead of the Fuse Link which greatly reduces the number of fuse outages caused by lightning. Birds or animals cannot short out the device. Requires only one line connection and reduces the number and cost of pole attachments and items to handle.

Protectogap—Interrupting capacity in Surge Amperes 8000 or less.

Protectolink—Interrupting capacity in 60 cycle follow amperes 1200 or less.

Cat. No.	Protectogap Rating †KV	Protectolink Rating Amps.	KV	Net Wt. Lbs.	*Price Each
1689-S	2.5; 5 & 8	50	5	9	\$10.48
1690-S	2.5; 5 & 8	50	7.5	10¼	12.75

†KV ratings are the operating voltages, line to ground for which they are recommended.

*Above prices apply to less than 25 assorted combinations. For larger quantities, prices on request.

MATTHEWS RINGAP

The Matthews Ringap was developed to provide double horn gap protection for low capacity, low revenue lines. It is as efficient as any double horn gap, the chief advantages being sturdy construction, unique design, and low initial cost. They should clear high impulse transients with no 60 cycle follow current about three times out of five.

To maintain maximum air gap insulation under wet climatic conditions the gap arms are staggered. This prevents water drip between arcing points.

Because of the likelihood of burning the brass gap arms and rings, if not cleared fairly quickly by a circuit breaker, these Matthews Ringaps have been designed so all parts can be easily and inexpensively replaced. They are equipped with No. 4 Solderless Connectors (for No. 4 solid copper wire or smaller) for line and ground connections.

Interrupting capacity in surge amperes, with no follow current, 65,000.

Cat. No.	Volts	Description	Net Wt. Lbs.	*Price Each
6069	8,000 or Less	Ringap	3¾	\$3.58

*Less than 25. For quantities in excess of 25, prices on request.

No. 6069 Ringap

MATTHEWS TEEGAP

The Matthews Teegap has all the advantages of the Matthews Ringap, the only difference being the design of gap arms. They are made of commercially pure black iron containing not more than .013 per cent carbon content, so as to minimize burning at the arcing points. Can be furnished with bird protective screens at slight increase in price.

Will clear lightning transients with no 60 cycle follow current three times out of five, thereby reducing fuse outage costs. Adaptable for cross arm or pole mounting.

Interrupting capacity in surge amperes, with no follow current, 65,000.

Cat. No.	Volts	Net Wt. Lbs.	—Dimens., Inches—		*Price Each
			A	B	
6621	8,000 or Less	3½	10	10¼	\$4.27

7621-S	15,000 or Less	4¾	13	11¼	5.79

Suffix letter "S" indicates Teegap with bird screens.

*Above prices apply to less than 25 assorted Teegaps. For larger quantities, prices on request.

No. 6621, 7621 Teegap

MATTHEWS FUSWITCHES

LOW TENSION DROPOUT—OPEN TYPE

Rated 5, 7.5 and 15 Kv.

100 Amp. or Less,

Interrupting Capacity 2000 Amps.

Where you have need for single insulator open type dropout cutouts for use on rural circuits, where the interrupting capacity is not likely to exceed 2000 amperes and the voltage will not exceed 15,000 these Low Tension Dropout Matthews Fuswitches are recommended.

They are substantial, no weak parts or parts which will cause trouble from corrosion. Nothing complicated about them.

Easily converted to 200 ampere Disconnecting Switches by replacing fuseholders with solid disconnect blades.

Cat. No.	Rating		Description	Net Wt. Lbs.	Price Each
	Amps.	KV			
1442-4	100	5	Fuswitch	10½	\$13.85
1452-4	100	7.5	Fuswitch	14¾	15.48
1458-4	100	15	Fuswitch	17½	19.23

Above prices apply to less than 25 assorted Fuswitches. For larger quantities, prices on request.

Voltage and current ratings and interrupting capacities conform to NEMA Distribution Cutout Standards.

MATTHEWS FUSWITCHES

LOW TENSION DROPOUT—OPEN TYPE

Rated 5, 7.5, 15 and 23 KV—100 Amps. or Less
Interrupting Capacity 2000 Amps.

These open type dropout cutouts, with two insulators, are applicable on urban or rural circuits where the interrupting capacity is not likely to exceed 2000 amperes and the voltage will not exceed 23,000. No weak parts or parts which cause trouble from corrosion. Fuseholders can be easily removed and installed with standard hot stick. Can be converted to 200 ampere Disconnecting Switches by replacing fuseholders with solid disconnect blades. Can also be furnished mounted on NEMA Standard Insulators.

Cat. No.	Rating		Description	Net Wt. Lbs.	*Price Each
	Amps.	KV			
1342-4	100	5	Fuswitch	13¼	\$14.66
1352-4	100	7.5	Fuswitch	15	16.30

1368-4	100	23	Fuswitch	44½	27.71

*Above prices apply to less than 25 assorted Fuswitches. For larger quantities, prices on request.

Voltage and current ratings and interrupting capacities conform to NEMA Distribution Cutout Standards.

MATTHEWS PROTECTOLINK CUTOUTS

Rated 5, 7.5 and 15 KV—50 Amperes

Efficient protection at low cost is provided in these ruggedly constructed open link type cutouts. Fuse links are designed so they cannot be installed upside down and design of contact arms permits ease of fuse link installation. The spring tensioned lower arm automatically seats fuse link contacts into contact recesses in the arms, thereby assuring positive and radio noiseproof contacts.

Matthews Protectolink Cutouts and Fuse Links are interchangeably adaptable with all other makes.

Cat. No.	Rating		Description	Net Wt. Lbs.	*Price Each

Also available in two-shot reclosing types in 50 amp., 5 KV and 7.5 KV ratings.

*Above prices apply to less than 25 assorted Cutouts. For large quantities, prices on request.

MATTHEWS CUTOUTS

DROPDOWN INDICATING TYPE — PORCELAIN HOUSED

No. 12

They will indicate an outage even if the door is frozen shut. Fuseholder will drop down if a stiff 30 or 50-amp. link melts, and the exposed end of the Fuseholder or Fuse Link tail will always be dead. They put lowest tension on Fuse Links of any Housed Indicating Cutout. Even if a lineman leaves as much as $\frac{3}{4}$ -inch slack in the Fuse Links, the patented wedge and spring contacts will automatically remove this slack when the door is closed. No toggles or setting gadgets. Door remains closed when Fuse Link melts or blows, so that snow, ice or rain cannot damage inside of Cutout. A heat run test will prove that these Cutouts are the

coolest of all Housed Indicating Cutouts. All current carrying parts have over 85 per cent copper content.

Cat. No.	Rating		Description	Net Wt. Lbs.	Price Each
	Amps.	KV			
12	50	5	Cutout	8 $\frac{3}{4}$	\$9.20
23	50	7.5	Cutout	11 $\frac{1}{8}$	11.61

Above prices apply to less than 25 assorted Cutouts. For larger quantities, prices on request.

NON-INDICATING TYPE — PORCELAIN HOUSED

Simple, rugged, no moving parts. Heavy Everdur set screws. All current-carrying parts are over 85 per cent copper content. Time-seasoned Bakelite covered fibre fuseholder tubes which will not warp. High flash-over values. High interrupting capacity. Lowest time-cost. Over 300,000 in use.

Only the best cast porcelain is used for the housings.

No essential changes in design in over twelve years, but many refinements have been made.

No. 650

Cat. No.	Rating		Description	Net Wt. Lbs.	Price Each
	Amps.	KV			
650	50	5	Cutout	8 $\frac{3}{4}$	\$8.76

Above prices apply to less than 25 assorted Cutouts. For larger quantities, prices on request.

Voltage and current ratings and interrupting capacities for all above cutouts, conform to NEMA Distribution Cutout Standards.

MATTHEWS FUSE LINKS

SERIES PT

FOR ALL PLUG TYPE CUTOUTS

The Series PT Matthews Fuse Links were designed to meet the demands of Power Companies for accurate, 100 per cent rated fuse links for use in low capacity Plug Type Cutouts.

All parts are assembled by crimping, (not soldering), for greater accuracy and strength. Flexible copper cable is lead coated for greater resistance to corrosion. Fusible elements covered by horn fibre tubes. Fork shape terminals permit ease of installation under contact terminal screws of plug cutouts.

Use them to prevent false outages; overloaded transformers; damaged cutouts and other equipment; and expensive and unnecessary service calls, instead of inaccurate "hit-or-miss" wire fuses now in plug type cutouts.

Packed in individual paper tubes, 25 to a telescoping container. Overall length, 8 $\frac{1}{4}$ inches.

MATTHEWS FUSE LINKS

SERIES 100-H UNIVERSAL FUSE LINKS

For companies now standardized on Series 100-H Universal Matthews Fuse Links, or for those who desire faster links than the new NEMA Standard Type E Links, these 100-H Fuse Links (which comply with NEMA Standards) are available.

They are assembled by crimping (not soldering), which assures greater strength and permits greater fuse co-ordination accuracy. Flexible copper cable is lead coated for greater resistance to corrosion. Fusible elements protected by horn fibre tubes.

Standard package 25, packed in 5 small cartons in master carton, each fuse link protected by paper tube. Overall length 20 inches.

MATTHEWS SECONDARY FUSES

CTS CARTRIDGE TYPE SEMAPHORE

The CTS indicate blown fuses by means of the little bakelite semaphores which are released when the fuses melt. They are entirely sealed against rain and do not fall apart and hang down.

They have high strength, accurately crimped, copper-stainless steel fusing sections and lead coated flexible copper tails which are highly corrosion resistant.

The inner tubing is made of horn fibre. The outer of wrapped Bakelite. Overall length, 21 inches.

MATTHEWS FUSELESS CUTOUTS

This thermally operated device eliminates the need for primary or secondary fuse links in cutouts or other types of transformer protection on rural lines. Designed for use on the typical single-phase multi-grounded neutral circuit, and is rated 7500 volts: 1.5, 3, 5, 7.5 and 10 kva. It can also be supplied on new transformers by most manufacturers.

When an abnormal current resulting from either a transformer failure or secondary line trouble occurs, the thermal tripping element operates in accordance with predetermined inverse time current characteristics. This releases the spring tensioned contact arm which instantly snaps to the ground contact on the base and the circuit is broken. However, in some instances the inductive reactance of the circuit may prevent the arc from being extinguished before the contact arm reaches the grounded contact. The resulting line to ground fault instantaneously builds up a short circuit current sufficiently great to operate a back up reclosing device. For this reason reclosing fuse cutouts or automatic reclosing circuit breakers must be installed on the line side of the same circuit where Matthews Fuseless Cutouts are installed.

Cat. No.	Description	Shpg. Wt. Lbs.	Price Each
1900	Fuseless Cutout, Pole or Crossarm Mounting	21	*\$22.20
1900-1.5	Thermal Element, 1.5 kva.70
1900-3	Thermal Element, 3 kva.70
1900-5	Thermal Element, 5 kva.70
1900-7.5	Thermal Element, 7.5 kva.90
1900-10	Thermal Element, 10 kva.90

*Price does not include Thermal Element and applies to less than 25 Fuseless Cutouts. For larger quantities, prices on request.

MATTHEWS LAMPLIGHTER

For Multiple Street Light Circuits

Assures positive on and off operation of multiple street lights at any setting of time switch or photo electric controls. Will control single lamps or any number of lamps up to their current ratings. Thermally operated, completely sealed against weather and very compact. Can be mounted on pole or crossarm and their maximum width of 2 1/4 inches will permit entrance in the bases of most metal or concrete street light standards.

Prices apply to less than 25. For larger quantities, prices on request.

L-M KYLE AUTOMATIC OIL CIRCUIT RECLOSERS

TYPE "H" (SINGLE PHASE) RECLOSER

Type "H"

The L-M Kyle Type "H" Automatic Oil Circuit Recloser is a complete single phase unit—with operating sequences governed by the accurate performance of the hydraulic timing mechanism. Winter or Summer, the dependable operation of the Recloser remains accurate — regardless of ambient temperature changes, as proven by the many thousands in use today.

The activating force that controls the Recloser operation is developed in the magnetic field of the solenoid coil. Carrying full line current at all times, the magnetic field of the coil attempts to draw the plunger downward into the coil. This force is opposed by the contact operating springs which effectively prevent any downward motion of the plunger until the minimum tripping current (200% of rating) is reached. Thus, the magnetic force and the retarding springs are at equilibrium just below the minimum tripping current.

At the increase in current caused by overload or short circuit conditions, the plunger instantly moves downward into the coil. This forces the contact operating springs to separate the contacts thereby opening the circuit momentarily. In the event that the fault is temporary, as are 90% of the disturbances, the line will be cleared and the contacts reclosed automatically.

If the fault persists, the Recloser will open instantaneously a second time, on time-delay the third time and lock out after the fourth. Thereupon, the Recloser will have to be reset manually. This isolates permanent faults by restricting them to a limited section of the line thus protecting the remainder of the system.

In the event that the fault is cleared after the first, second or third opening, the Recloser will automatically reset itself for another full sequence of operations.

In no way are the operation functions hindered by preloading or freezing temperatures. Currents of any value below the minimum tripping current may be carried prior to the occurrence of a fault without slowing the speed of interruption. The only effect of preloading is the rise in temperature of the insulating oil. Similarly, below zero weather only lowers the temperature of the insulating oil in proportion with the system as a whole.

Catalog Numbers—Opening Sequence*— (See below)

- (6)=Minimum Tripping Current (Amperes).
- (7)=Interrupting Capacity (Amperes).

*Unless otherwise specified, opening sequence of 2 Fast and 2 Retarded openings will be furnished.

Ratings may be changed by replacing the series trip coil with coil of desired rating. Weight of Recloser—65 pounds.

L-M KYLE AUTOMATIC OIL CIRCUIT RECLOSERS

TYPE "3H" (THREE PHASE) RECLOSER

Type "3-H"

Since, in 3-phase operation, it is desirable to lock out all three phases when a permanent fault occurs in any one phase, each phase must therefore be individually protected. This is adequately accomplished by the Type "3H" Circuit Recloser.

The 3-phase recloser basically combines three complete Type "H" Reclosers mounted on a single head and suspended in the same tank. Each of the three units operates as a Single Phase Recloser independently of the others but all are linked together to coordinate the three phase lockout action. Thus, when one unit trips after the fourth operation, a positive lockout occurs on all three Recloser units.

The occurrence of a single phase fault will cause one of the single pole units to operate in order to clear the system. Meanwhile, the two remaining single phase units, being inactive, will temporarily maintain the system on two phase operation.

A 3-phase fault will cause these three combined individual units to operate simultaneously, as one, to either restore service on a temporary fault or to lockout in the case of a permanent fault. The three units can then be reset, as one, by a single operating handle.

Catalog Numbers—Opening Sequence*

*Opening sequence: Same as Type "H," see foot notes on preceding column.

L-M KYLE AUTOMATIC OIL SECTIONALIZER

The L-M Kyle type "GS" Automatic Oil Sectionalizer is a protective device for sectionalizing single phase branch lines of 2.4 to 15 Kv. single and three phase distribution systems employing automatic oil reclosers of any type or make.

Operational abilities make possible the isolation of permanent faults on branch lines only when used in coordination with reclosers having either single-time or dual-time characteristics. It will not operate independently to interrupt short circuit currents — but must be used with a back-up recloser.

All ratings may be changed at any time by simply replacing the series trip coil. No recalibration is necessary. The L-M Kyle type "GS" Automatic Oil Sectionalizer offers a practical method of isolating permanent faults on single phase branch lines of single and 3-phase branch lines of single and 3-phase distribution systems.

Type "GS"

2400 to 15,000 Volts

Cat. No.	Wt. Lbs. With Oil	Minimum Tripping Current (Amperes)	Maximum Operating Current (Amperes)
GSA-1B-A	20	8	150
GSA-1B-B	20	14	200

GSA-1B-D	20	28	375
GSA-1B-E	20	48	600
GSA-1B-F	20	70	840
GSA-1B-G	20	100	1200

Ratings may be changed by replacing the series trip coil.

L-M "ELEMEX" CAPACITORS

These capacitors include new materials, new designs, and new methods of manufacturing to assure more uniform results and longer life — packs made by a new method — major insulation folded without slitting — individual discharge resistors for each parallel group of packs — pack assembly dowel-anchored to tank base — a highly efficient non-inflammable dielectric liquid — "ELEMEX" — and an entirely new method of individual and continuous evacuation,

drying, capillary impregnation, testing and rigorous inspection. The result has been a capacitor with low unit stress on the insulation, excellent performance, and a remarkable service record.

"ELEMEX" Capacitors offer many conveniences in installation and maintenance. All sizes and ratings fit the same hanger bolt holes. Terminal elevation above hanger flanges is the same for 15's and 25's in each voltage class, making mixing or changing simple. "Paragroove" connectors make "ELEMEX" Capacitors easier to install and connect. And, with Stainless Steel tanks, there is no paint to scrape and touch up. The blue-gray "Hydis" surface treatment is part of the metal, and is an excellent conductor, assuring a good ground.

Bushings are of rugged, one-piece, wet process porcelain units with liberal striking and creepage distances. Bushings are solder-sealed.

TYPE "L" KYLE HEAVY DUTY OIL CIRCUIT RECLOSER

The Type "L" Heavy Duty Oil Circuit Recloser was especially designed for use on primary lines having high fault currents. It meets the need for an automatic circuit recloser that is able to offer protection to circuits with load currents up to 100 amperes and fault currents up to 4000 amperes.

The ability of the Kyle Heavy Duty Oil Circuit Recloser to provide adequate line protection under large fault currents is derived from the newly developed arc interruption arrangement.

By employing the contained oil, the drawn arcs are extinguished quickly and effectively. Accurate timing is insured by the highly dependable hydraulic control system. This mechanism is virtually free of variations caused by oil viscosity changes and is able to absorb extreme shocks without damage — thus assuring consistently trouble-free operation.

In operation, the Kyle Heavy Duty Recloser is completely automatic. A permanent line fault will cause it to reclose three times before locking out. If the fault is of a temporary nature, it will be cleared on the first, second or third operation and the Recloser will automatically reset itself for another protective cycle.

Specifications: Single Phase. **Operating Voltage** — 2400 to 15,000 volts. **Insulation Level** — Meets requirements for 15 KV station equipment. **Impulse Level** — 110 KV. **Control Mechanism** — Full hydraulic and equalized to virtually eliminate timing variations due to oil viscosity. **Size** — Overall height, 37 inches; Tank diameter, 11 inches. **Weight** — 170 lbs. complete with oil. **Operation Sequences Available** — **Standard:** two fast, two retarded. **Optional:** two fast, two extra retarded.

**For the grouping of small motors under the protection of a single set of fuses see section 4343 N. E. Code.

***High reactance squirrel cage motors are those designed to limit the starting current by means of deep-slot secondaries or double-wound secondaries, and are generally started on full voltage.

†Based on 1947 code. Where code-marked motors are employed, refer to 1947 N. E. Code, Section 94304.

NOTE: Lug sizes of all switches and circuit breakers are in accordance with the 1947 N. E. Code.

See Notes 2, 3 and								See Note 1		

Notes:

- (1) These values for full load current are average for all speeds.
- (2) These values of full load current are for motors running at speeds usual for belted motors and motors with normal torque characteristics. Motors built for especially low speeds or high torques may require more running current, in which case the nameplate current ratings should be used.
- (3) Current in common conductors of 2 phase, 3 wire system will be 1.41 times value given.
- (4) For 90 and 80 per cent P.F. the above figures should be multiplied by 1.1 and 1.25 respectively.
- (5) For further information consult 1947 National Electrical Code.

CENTURY MOTORS

CENTURY SPLIT PHASE MOTORS

1/8, 1/4 and 1/2 Horsepower

1/6 H.P. Type SP
Split Phase Induction
Single Phase Motor

These motors are suitable for applications that do not require starting torque much in excess of full load torque, such as: air washers, blowers, fans, dish washers, factory sewing machines, washing and ironing machines, small tools, and similar equipment.

60 Cycles

Frame	HP	F. L. RPM Approx.	Volts	(Sleeve Bearing— Rigid Cushion Base Base)	Ball Bearing Rigid Base
63G	1/6	1750	115	\$13.95	\$14.89
65L	1/4	1750	115	\$15.94	\$16.88
C562	1/3	1750	115	\$16.85	\$18.00

CENTURY CAPACITOR MOTORS

1/4 to 20 Horsepower

Capacitor motors are in general, suitable for the same applications as type RS motors. The RS motor has higher starting torque with lower starting current while the capacitor motor has higher pull-up torque. The applications are the same: oil burners, unit heaters, fans and blowers, packaging machines, compressors and domestic refrigeration, etc.

1/6 H.P. Type CSH
Capacitor Start Induction
Motor

Δ—254 and smaller open frames have motor mounted condensers and internal cutout; 284 and larger frames have condensers and potential relay in separately mounted capacitor unit.

Δ—Totally enclosed, not fan cooled. †67L frame.
*—83 frame. *Automatic Overload Protection.
•50° C.

CENTURY MOTORS

CENTURY TOTALLY ENCLOSED

CENTURY SPLASH PROOF MOTORS

3 HP SC Splash Proof
Squirrel Cage Induction
3-Phase Motor

These motors are suitable for installations surrounded by processes which require splashing or where plants and machinery are washed down, such as dairies, and creameries. The solid frame and baffled air intake and outlet design of end brackets protect the vital parts of the motor. available in sizes from 1/2 to 125 horsepower.

FAN COOLED MOTORS

Totally enclosed fan cooled motors are available in sizes from 2 to 30 horsepower. These motors are suitable for dusty surroundings where the dust is of a highly explosive nature, or where the dust must be kept outside the motor because of its destructive effect.

75 HP Type SC Totally En-
closed Fan Cooled Motor

CENTURY EXPLOSION PROOF MOTORS

2 to 30 Horsepower

Explosion proof motors are available in sizes 2 to 30 horsepower. They provide protection to the vital parts of the motors and the surrounding explosive atmospheres containing Ethyl Ether Vapor (Class I, Group C), gasoline, petroleum, naphtha, acetone, lacquer solvent vapors and natural gases (Class I, Group D), metal dust (Magnesium) (Class II, Group E), carbon black, coal dust (Class II, Group F) or explosive grain dusts (Class II, Group G).

CENTURY MOTORS

CENTURY REPULSION START INDUCTION MOTORS

1/2 to 20 Horsepower

1/2 H.P. Century Type RS
Repulsion Start Induction-Brush
Lifting Single Phase Motor

These motors are suitable for installations requiring high starting torque with low starting current such as: Pumps, air compressors, refrigerator compressors, oil burners, blowers, fans, machine tools, stokers, grinders, packaging machines, conveyors and similar applications where the motor starts against heavy back pressures or loads that are hard to start.

CENTURY MOTORS

CENTURY TYPE SC SQUIRREL CAGE MOTORS

1/6 to 400 Horsepower

2 H.P. Type SC Squirrel Cage
Induction Three Phase Motor

By far, the greatest number of motors in use today on power circuits, are Type SC, squirrel cage motors. They are suitable for all types of general purpose applications.

Frequently special conditions of the load or surroundings will require something different than the standard open rated Type SC.

The type SCH motor also with the same mechanical appearance is built to furnish a high starting torque with a low starting current. This motor is used on such installations as refrigeration compressors where the starting torque of a type SC is not high enough. Current limiting starting equipment is not required on 30 Hp. and smaller, built in sizes 7 1/2 to 200 horsepower.

RELAY HEATERS FOR PT MANUAL STARTERS

For use with continuously rated Motors. Heaters are included in control equipment prices but should be ordered separately. One required with 2 Pole, 2 with 3 & 4 Pole devices. Specify catalog number of heaters required.

Selection Instructions for Types PT 2 and PT 7½

When necessary to change heaters, select from table. To prevent overloading the starter do not select heaters for motor of larger rating than the maximum given on starter nameplate. To protect heater and starter during short circuit, provide motor branch circuit protection in accordance with N.E. code. In no case should the fuse rating exceed 3.5 times the motor full load current. For continuous rated 40 deg. C. rise motors, except high resistance rotor types (KR) select heaters from table. For continuous rated 50 and 55 deg. C. rise and 40 deg. C. rise high resistance rotor motors, multiply the full load current of motor by 0.90 and use this value to select heater from table.

For group fusing place ahead of starter, fuses rated as in table.

Selection Instructions for Loom Switch

The table gives the proper size of heater to trip the switch on approximately 140 percent motor current in an ambient of 40 deg. C. (104 deg. F.). For motors requiring 125 percent protection, multiply rated motor current by 0.88 and use value obtained to select proper heater from table. Do not overload the starter by selecting heaters for a motor of larger H.P. rating than the maximum given on starter nameplate. To protect heaters against melting during short circuit, place ahead of starter fuses rated at not over 3.5 times full load current of motor. For group fusing (to protect against fire hazard only) place ahead of the starter fuses rated as given in table.

*HEATER UNITS—GROUP FUSING

For Use on Size 0 Manual Starters When Two or More Starters are Grouped on a Single Set of Fuses

In accordance with the National Electric Code, when in a group of motors, each is protected by a motor-running protective device which has been approved for group installations, the motor branch circuit protective device may be omitted provided the feeder conductors supplying the group are protected by fuses having a rating not exceeding that indicated on the smallest motor-running protective device of the group. Motor branch circuit conductor requirements for group fusing are specified in paragraph 4343B. of the 1947 National Electric Code.

CUTLER-HAMMER A.C. AUTOMATIC STARTERS

BULLETIN 9605—PRIMARY RESISTOR TYPE

Time Limit Acceleration
3-Phase—60, 50, and 25 Cycles

Bulletin 9605—Size 2

Bulletin 9605 is used with squirrel-cage motors for reduced voltage starting. Primary resistor gives 65 per cent of line voltage on starting. Time limit acceleration through C-H Mercury Timer insures trouble-free constant timing of accelerating period. C-H eutectic thermal overload protection.

H.P.	220 Volts		440 Volts		550 Volts	
	Price	Lbs. Boxed	Price	Lbs. Boxed	Price	Lbs. Boxed

30	297.00	200	297.00	225	297.00	225

Note—When ordering, give horsepower, voltage, cycles, and actual ampere rating of motor.

BULLETIN 9621—AUTO-TRANSFORMER TYPE

For Starting Squirrel-Cage Motors

For squirrel-cage motors, particularly where starting load varies over wide range. Constant accelerating time through C-H Mercury Timer. C-H eutectic thermal overload protection. Relay reset from outside of case. Both contacts mechanically interlocked. Connected at factory to give 65 per cent of line voltage on starting. An 80 per cent voltage tap also is provided.

Bulletin 9621

*With right-hand mounting bracket.

†With left-hand mounting bracket.

‡With long operating handle.

BULLETIN 10316—TYPE D LIMIT SWITCH

Ideal where a small, sturdy limit device is needed. For control circuits only—110 to 550 volts AC or 115 to 230 volts DC—inrush or peak current must not exceed 20 amperes. Can be used to start, stop or reverse motor at a certain point, or as a safety switch for overtravel protection. Silver-to-silver, double-break contacts for long life and best current-carrying qualities. Designed so front cover plate and back mounting plate can be interchanged giving two mounting positions, and roller can be turned 90 degrees giving two rolling positions—perpendicular and horizontal. Contacts are designed so a normally-open switch readily can be changed to a normally-closed switch and vice-versa.

Bulletin 10316H3

Cat. No.	Position of Contacts	Lbs. Bxd.	Price Each
10316H3	Normally Open	5	\$8.25
10316H4	Normally Closed	5	8.25
10316H10	Normally Open and Normally Closed	5	8.25

When ordering Limit Switches be sure to give correct catalog number and type of contacts desired—whether normally open, normally closed or one of each.

CUTLER-HAMMER A.C. AND D.C. ACCESSORIES

BULLETIN 10007 PRESSURE SWITCHES

Double Pole—Without Overload

Bulletin 10007H2

For pressures above atmospheric. For small motor or pilot circuit control. For air, gas, water and other fluids not injurious to rubber diaphragm. Quick make and break. Twin-break silver contacts. Adjustable pressure settings. View shows switch with unloader for air compressor service.

Without Unloader—Maximum Pressure 100 Lbs.

GOODYEAR V-BELTS COMPASS V-STEEL V-BELT

GOODYEAR COMPASS V-STEEL V-BELT

In addition to a strength member of high tensile airplane type steel cables, this belt has an under-section that is notched with deep vents to (1) dissipate the heat of rapid flexing, (2) eliminate belt stiffness, permitting use on smaller pulleys, (3) give flat flexibility with maximum wedge-grip and minimum frictional loss, (4) make a cooler running, longer wearing, super-efficient belt.

Made both for normal service in standard construction and in ORS construction for drives where oil, heat or static electricity are problems.

STEEL CABLE V-BELTS

GOODYEAR STEEL CABLE V-BELT

With a far greater strength factor—high heat resistance—uniform and practically zero stretch—this Steel Cable V-Belt offers many advantages. It pulls heavier loads—assures longer life on present drives or equal efficiency with fewer belts—permits slower or faster belt speeds.

The steel cable V-belt should not be confused with the so-called “wire” V-belts which have been tried and found wanting. The cable is the latest development of the steel industry. It possesses tremendous strength and has a higher flex-life than cotton or rayon cords.

Steel Cable V-Belts are available in a standard range of sizes.

E-C CORD MULTI-V BELTS

Goodyear E-C Cord Multi-V Belts, are famous for long life, continued matchability and low stretch. They incorporate the heavy endless cord construction which combines strength with extreme flexibility and low stretch.

The endless cord, load-carrying layer, cushioned in insulating gum, is placed in the neutral section of the belt where it is under neither the tension nor compression imposed by flexing. As a result, the internal friction, which occurs in a multiple construction, is eliminated and the full strength of the cords carries the load. The belt has an extremely long flexing life and a high resistance to fatigue or breakdown of the structure.

GOODYEAR V-BELTS MULTIPLE V-BELT SIZES

In "E" cross section, lengths longer than 360" may be supplied in increments of 60" only, up to 600" maximum.

FRACTIONAL HORSEPOWER V-BELTS

Goodyear offers a complete standardized line of fractional horsepower V-belts for miscellaneous light machinery drives of all types. These belts are not intended for use in multiple. They are available in three different standard cross-sections and in a variety of standard lengths, covering the entire range required for this class of service.

F.H.P. belts incorporate the endless cord construction. In these low-stretch, high-strength belts, the load is carried by a layer of endless cord located at the point in the belt where there is the least distortion from flexing. This construction eliminates the internal friction encountered in belts having a multiple ply construction.

GOODYEAR REPLACEMENT BELTS

In addition to the standard Fractional Horsepower V-Belt line, intended primarily for original equipment applications, Goodyear offers a complete line of replacement belts for miscellaneous light machinery drives such as refrigerators, washing machines, water pumps, stokers, oil burners, wood-working machines, beer pumps, etc.

The line includes most of the standard Fractional Horsepower sizes, as well as special sizes required for replacement on particular applications.

GOODYEAR AUTOMOTIVE FAN BELTS

The sturdy construction of Goodyear V-fan belts enables them to withstand the severest fan belt service. Their cord construction and the manner in which these belts are made, insures extreme flexibility, remarkable long life and trouble-free service.

Each Goodyear V-belt has its own cardboard envelope. Goodyear fan belts give complete automotive replacement coverage with a minimum of sizes.

OPEN-END V-BELTING

Open-end V-belting has recently been used in the V-belt field because of its ability to quickly rebelt a drive without dismantling the pulleys — thus saving valuable production time.

It should not be used except for emergency breakdowns or on drives where endless V-belts cannot be installed. There is a complete line of standard types and sizes.

Further information furnished on request.

ment after each speed
change.

SIGNAL WALL BOX VENT FAN

Outside shutter is cast aluminum with automatic
lever operated shutters. The totally enclosed motor
is rubber mounted and can be disconnected or re-
moved for cleaning. Motor switch and shutters
are controlled by opening and closing of the door.
Two types adjustable to wall thicknesses — 6 to
11½ inches or 13 to 24 inches. 110-120 volts A.C.;
60 cycles; watt input, 40; C.F.M. in free air, 650;
R.P.M., 1400.

Inside baked white enamel, shutters chrome,
balance brown.

Cat. No.	Fan In.	Adjustable to Wall Thickness, In.	Shpg. Wt. Lbs.	Price Each

Above prices include Federal Excise Tax.

CHALLENGER VENT FAN

These streamlined ven-
tilating fans are value-
plus. They are modernly
different, efficient and de-
pendable, and outstand-
ingly low in cost. Char-
acteristics usually identi-
fied only with those in
much higher price brack-
ets are found on these
fans. The square frame
of heavy gauge sheet steel
is easy to mount and holds the motor securely.
Motor is totally enclosed and equipped with ad-
justable conduit box. Motor and frame are black
wrinkle finish and the fan blade is chrome plated.
Lends itself well to wall, window and transom in-
stallations. Operates horizontally or vertically.

DEBONAIRE FLOOR CIRCULATOR

Debonaire fan with the Air-Jet principle. Because of design principles, including jet action with Air-Injector rings, the Debonaire will deliver more air, without annoying drafts. Specially constructed, deep-pitched Micarta blades, super-safe and ultra-quiet. The air-jet principle increases the air delivery to 1,700 cubic feet

per minute. Lightweight, exceptional strength and durability. For floor use anywhere. No hum, vibration or radio interference. Draftless, will not disturb papers on desk.

Westinghouse brushless, four-pole, induction-type motor with die cast, squirrel cage rotor. Single-speed "on" and "off" switch. Three molded plastic feet mounted on Air-Injector spacing straps. Finished in rich maroon, baked-on enamel with chromium trimming. Overall dimensions: 13½ inches diameter, 13 inches high. Net weight, 15 pounds. 8-foot, heavy-duty cord with soft rubber attachment plug.

BELT DRIVEN EXHAUST FANS

Mechanical Details for All Sizes

1. V-Belt Drive—insures long life—quiet operation.
2. Adequate instructions—most efficient methods of installation.
3. Century ball bearing motors—insure many years of trouble-free service.
4. Thermal overload protection prevents burned out motors in case of low voltage or overload.
5. Zephair heavy gauge, die-formed steel blades give uniform air velocity over entire blade area.
6. One-piece streamlined orifice—design increases air delivery—reduces power consumption.
7. Blade hub—cast iron, accurately machined to fan shaft.
8. Entire blade assembly statically balanced, assuring vibrationless running.
9. Blade shaft mounted on ball bearings—absorb thrust load—permit operation in any position.
10. Mounting arms offer minimum obstruction to air flow—absorb vibration.
11. Rugged construction and extra powered motor assure continuous uninterrupted service.
12. Protective Service Guarantee. Fan Unit—5 years. Motor—1 year.

Shipping Crate designed for use in installation — minimizes installation expense — crate easily removable for special application.

All fans have Underwriters' Laboratory label.

FEDERAL VEHICLE SIRENS

MODELS O AND V SIRENS

Low priced high quality sirens for volunteer firemen, deputies, coroners, etc. Models O and VG are alike except in finish. Model VL has powerful flashing red beam light similar in appearance to Model W. All models 4 7/8 inches diameter. Choice of 6 or 12 volts.

Model	Finish	Dimens., In.		Net Wt. Lbs.	Price Each
		Length	Height		
O	Lacquer.....	7	5 1/4	5 1/2	\$21.00
VG	Chrome.....	7	5 3/4	5 1/2	23.00
VL	Chrome.....	8 1/2	6	5 1/2	32.00

MODEL E SIRENS

The most famous vehicle siren. Conservative in price and appearance, but packed with quality and performance. Available with projector or flat grill. Rotor diameter 5 1/2 inches. Choice of 6 or 12 volts.

Model	Description	Dimens., Inches		Price Each
		Length	Height	
EG	Grill	8 1/2	7 1/2	\$43.00
EP	Projector	12 1/2	8 3/4	45.00

MODEL W SIRENS

Similar in capacity and performance to the Type E sirens, the "W" models are streamlined as well as chrome plated. Choice of grill or light. 6 or 12 volts. Type WLR has a light in rear as well as front. WF mounts in center of Ford radiator grill.

Model	Description	Dimens., Inches		Price Each
		Length	Height	
WG	Grill	10	7	\$50.00
WL	Light	13 1/2	8	60.00
WF	Ford Model	11 1/2	9	60.00
WLR	Rear Light	15	8	70.00

MODEL X SIRENS

Like the Model W, but constructed with a cast aluminum weatherproof manifold. The only truly weatherproof siren. With or without light. Choice of 6 or 12 volts.

Model	Finish	Dimens., Inches		Price Each

FEDERAL VEHICLE SIRENS

MODELS 28, 66, AND 67 SIRENS

Above average in size and power. For heavy duty service on police cars, fire trucks, or ambulances. The Model 28 is not streamlined or chrome plated. The No. 67 incorporates the Propello-Ray moving light. Choice of 6 or 12 volts. All are 7 inches in diameter.

Model	Description	Dimens., Inches		Price Each
		Length	Height	
28	Underhood	9 1/2	8	\$60.00
66G	Grill	11	8	70.00
66L	Light	15	8	80.00
67	Propello-Ray	17	8 1/2	100.00

MODELS 76, 77, AND 78 COASTER SIRENS

Special free wheeling clutch assembly allows sirens to coast for almost two minutes. Also are double tone models. Sound like two different sirens blowing simultaneously. An electric brake to stop coasting is optional. Other features like the 66 and 67, described above. Choice of 6 or 12 volts.

Model	Description	Dimens., Inches		Price Each
		Length	Height	
76	Underhood	11	8	\$85.00
77G	Grill	12	8	95.00
77L	Light	16	8	105.00
78	Propello-Ray	17	8 1/2	120.00

For same models with electric brake, add \$10.00.

MODELS C-4, C-5 AND C-6 SIRENS

The loudest and most powerful vehicle sirens. Eight-inch rotors produce deep powerful roar and coast almost three minutes. Superbly styled and chrome plated. Electric brake optional. Choice of 6 or 12 volts.

Model	Description	Dimens., Inches		Price Each
		Length	Width	
C-4	Underhood	11	9	\$ 90.00
C5G	Grill	12	9	100.00
C5L	Light	16	9	110.00
C-6	Propello-Ray	17	9	125.00

For same models with electric brake, add \$10.00.

FARADAY INDUSTRIAL HORNS WEATHERPROOF HORNS—OUTDOOR USE

Heavy duty, vibrating type with cast base tapped for direct entrance of ½-inch surface conduit. Also for mounting over outlet box in wall with hanger plate. Hanger plate furnished without charge, but only when specified on order for horn. Signal is sharp, clean cut, horn-tone of maximum strength.

Standard finish, black wrinkle enamel. Red enamel, if specified on order, without extra charge. All coils impregnated to make moisture-proof. Loudness rating at source: Megaphone 3500M; Two-way 3000M units.

FARADAY FLUSHCALL LINE

Efficient signal service combined with pleasing appearance. Neat, compact, flush type signal units for residential apartment houses, office and other uses. All items are of yoke mounted type, conveniently arranged for mounting in regular single, or multiple gang wall boxes, with standard switch or receptacle plates. Shallow depth and special construction of frame allows ample room for lock nuts and wires in box.

No adjustments required—but tone volume of Buzacall can be varied if desired. All devices arranged for use on 60-cycle, AC. 25-cycle AC at no extra charge.

Special frames protect mechanisms—louvered fronts prevent tampering. All units under standard toggle switch plates. Wall plates not included.

THE RINGCALL

Provides pleasing bell note of good volume, requires single-gang box and plate, or one gang unit.

"STANDARD DISPLAY"
RD-72

Practically a complete chime department in itself. It spotlights attention on the merchandise — it sells. This new display, richly finished in pleasing colors, exhibits a wide range of models, and permits actual sound operation of each. The ten chimes shown here are mounted on the board — all you have to do is hang it on the wall and let it sell for you.

Individual fact tags give all the selling features for each model. Completely wired, with push-buttons, transformer and plug-in-cord.

Dimensions: Board size — 60 x 53 inches. Chime tubes extend 13 inches below board. Shipping weight complete with mounted chimes, 91 lbs.

List Price of Chimes on
Display\$145.15
Display Free.

DISPLAY RD 315

Kitchen Beauty Model 315—A new low-priced combination door chime and electric clock. It chimes — it tells time. Variety of colors suitable for any "dream" kitchen.

List price of Kitchen Beauty Chime.....\$9.95
Display free.

The counter displays of Tulip Time and Kitchen Beauty are 12 inches wide; 18 inches high. Made of stiff cardboard with easel, these durable displays are screened in two colors with an actual operating model mounted on each display. Displays have two push-buttons in base panel and are battery operated for complete portability. Battery included. Displays make a smart traffic-stopping sales producer for any store.

JEFFERSON BELL RINGING TRANSFORMERS

THREE-IN-ONE UNIVERSAL BELL TRANSFORMER

Designed for quick attachment to (1) round or square outlet box cover, (2) side of outlet box, or (3) to wall of fuse or switch cabinet, the Jefferson "Universal" Bell Transformer requires no separate plates. It is ready to mount wherever there is a knockout while mounting feet

are also provided for open wiring installation on post, wall, or ceiling. Especially efficient for operating: Ordinary door bells of 2½ to 4-inch size, requiring about 3 watts each. Electric door openers. Transformer bells 3 to 6-inch size. Buzzers requiring about 2 to 4 watts. Annunciator or elevator signals. Furnace thermostats requiring 2 to 4 watts each.

Cat. No.	Volts		Size Inches	Cycle	Std. Pkg.	Price Each
	Pri.	Second-ary				
230-201	115	10	2½x1⅞x2	50-60	50	\$1.45
230-202	115	10	2½x1⅞x2	25-40	50	2.90

TRI-VOLT

This transformer provides three secondary voltages, 6, 12 and 18 volts; capacity 5 watts. Recommended for heavier work than the Wizard or Nucode types, especially where long leads are required. Size, 2x2½x3¾. Weight, 1½ pounds.

Cat. No.	Watts	Secondary Voltage	Primary		Price Each
			Volts	Cycles	
230-121	5	6-12-18	115	50-60	\$2.00
230-122	5	6-12-18	115	25-40	4.00

JEFFERSON CHIME TRANSFORMERS

CHIME TRANSFORMER 7½ V.A.

Universal Construction

To operate small and large chimes, transformers in this group are furnished with 12 volts and 18 volt taps. Types with secondary leads are listed as standard by Underwriters' Laboratories, Inc. Those with secondary binding posts are made exactly the same as listed types, but are not eligible for

listing. Size: 2x2x2½ inches. Weight 1½ lbs.

Cat. No.	Description	Volts	Cycles	List Each
Standard Mounting Feet				
230-151	Secondary Leads	115	60	\$1.50
230-152		115	25	2.00
230-251	‡Secondary Binding Posts	115	60	1.50
230-252		115	25	2.00

‡Not Listed as standard by Underwriters' Laboratories, Inc.

For 230 volt, 60 cycle primary, add 33½ per cent.

JEFFERSON SIGNALING TRANSFORMERS

Jefferson Signaling Transformers have been designed primarily for the most efficient operation of the present types of alternating current bells, horns and gongs; and for supplying low voltage power for the operation of complete signaling systems, including relays, controls, lamps, recorders, annunciators, etc.

The core and windings of each transformer are hermetically sealed in a heavy metal case for protection against dampness. To comply with the National Board of Underwriters' Specifications, transformers are equipped with flexible secondary leads. If desired binding posts can be supplied.

A separate compartment is provided for entirely enclosing the primary connections. Four knock-outs are provided in this compartment—two at the end and one at each side. Rigid or flexible conduit or armored cable may be used to meet N.E.C. rulings. For open wiring, standard ½-inch threaded bushings and locknuts may be used.

A special optional feature, is an automatic circuit breaker, which opens under overload or short circuit, affording protection both to transformer and equipment connected to it. A push button located at top of transformer permits quick and convenient re-setting of breaker apparatus, which is non-tamperable.

All of the following transformers have 4, 8, 12, 16, 20 and 24 volt secondary voltages.

Lamps of 40 watts and above are gas-filled and because of the bulb temperature should be protected from rain and snow when used out of doors.

GENERAL LIGHTING SERVICE

115, 120 and 125 Volts

Clear bulb lamps are satisfactory for use in adequately shielded reflectors or diffusing equipment; also in floodlighting and miscellaneous special applications requiring reasonably accurate control of light. White bowl lamps can be burned in any position, but lumen maintenance is best when burned base up. Recommended for use in open-type equipment such as RLM standard reflector to improve the quality of illumination.

These lamps will operate in any position of burning, but the lumen maintenance, particularly in lamps of higher wattage sizes, is best when burned vertically base up.

WESTINGHOUSE LAMPS THREE-LITE LAMPS

115, 120 and 125 Volts—White
For Indirect Portables and Wall Urns

G-30

The Indirect Three-Lite lamp permits the use of three levels of illumination from its two filaments which may be burned either at the same time or separately, a range from moderate amount of light for decorative value to full brilliancy, depending on the activities for which the light is desired. Can be burned only in the base down position.

Watts	Bulb	Base	Std. Pkg.	Price Each
100-200-300	G-30	3-Contact Mog.	60	\$0.60

THREE-LITE LAMPS

115, 120 and 125 Volts — Inside Frosted

These lamps are particularly applicable in spaces where flexibility in intensity of lighting is desirable, such as retail stores. Either filament can be used separately for obtaining moderate intensities of illumination or the two filaments can be used together to obtain high intensities.

PS-25

Watts	Bulb	Base	Std. Pkg.	Price Each

50-100-150	PS-25	3-Contact Med.	60	.36

SILVERED BOWL LAMPS

115, 120 and 125 Volts

Silvered bowl lamps have a permanent coating of mirror silver on the bowl. This coating shields the brilliant filament and forms a highly efficient reflecting surface as an integral part of the lamp. This reflecting surface does not dull or tarnish throughout the life of the lamp.

Silver bowl lamps should be used only in porcelain sockets and fixtures so designed that the temperatures of the lamp and fixture do not exceed limits for satisfactory operation.

WESTINGHOUSE TYPE RF LAMPS

Type RF Lamps

Type RF lamps are high output, high efficiency fluorescent lamps of especial value in industrial lighting service. Available in Blue White or Industrial White color. Industrial White lamps provide white light approximating North Sky daylight and can be used in most industrial applications including many cases where color discrimination is important.

These lamps are designed to operate only with special equipment providing direct current through the use of a rectifying circuit.

WESTINGHOUSE FLUORESCENT SUN LAMPS

FS20T12

FS40T12

This is a completely different type of sun lamp. It is different because it makes practical the irradiation of entire rooms with ultraviolet, though it is also ideal for sun tanning a single individual. Heretofore, it has been impractical to provide ultraviolet, by means of artificial source, to a group of persons. Thus this new Westinghouse sun lamp revolutionizes previous concepts of indoor sunshine. It is different, too, in that it provides the most convenient and inexpensive way to produce ultraviolet that has ever been developed. This has been made possible because of the inherent efficiency of the Fluorescent Sun Lamp.

Cat. No.	Watts	Operating Voltage	Bulb Dia.	Nom. Overall Length	Car-ton	Price Each

FS40T12	40	106	1 $\frac{1}{2}$	48	6	7.00

Medium bi-pin base.

The nominal overall length includes one lamp plus two standard lamp-holders.

WESTINGHOUSE NEON GLOW LAMPS

S-11—1 Watt

T-4 1/2—1/4 Watt

T-3 1/4—1/25 Watt

The complete line of Westinghouse Neon Glow Lamps are ideal for such purposes as pilot lights, location markers, current indicators for household and industrial electrical appliances, signal lamps for call systems, night lights, house numbers and for exit lights. The Neon Glow Lamp has a low power consumption, long-life and low brilliancy.

Screw Base Lamps, excepting NE-1 contain the proper resistor within the lamp base for use on electrical circuits in the voltage range shown.

Bayonet Base Lamps, and including NE-1 and NE-2 require the user to provide an external resistor.

All glow lamps may be used on circuits of higher voltage than shown provided the proper value of external resistance is used.

WESTINGHOUSE RADIANT HEAT DRYING LAMPS

Greater speed plus lower installation costs of radiant heat have resulted in lower processing costs in many drying and heating applications. Since infra-red heat is radiated directly from its source to the object being heated, no elaborate insulated heating ovens are required.

There are two broad general types of drying lamps available. One type is represented by the 250-watt R-40 bulb lamp having an inbuilt reflector and requiring no separate reflector. The other types require separate reflectors of Alzak aluminum or of gold plated metal—usually the latter. The 250-watt R-40 Bulb Reflector Lamp will be found satisfactory for a wide range of heating purposes.

WESTINGHOUSE RADIANT HEAT DRYING LAMPS

For example, this lamp provides all the benefits of infra-red in the home in a most practical way. Fitting regular household sockets and operating on standard voltage, it comes in handy for all the family. At the flick of a switch the quick-acting, penetrating infra-red rays help relieve the misery of stiff, sore muscles and joints. The lamp is also ideally suited for chasing chills while dressing on cold mornings, for drying hair or fingernail polish, and for many other domestic purposes.

LEADER FLOURESCENT FIXTURES
COMMERCIAL 24-INCH TROFFER SERIES
FIXTURES

Model No. TWL-440

Illustrated is the 24-inch Troffer with steel eggcrate louver. This fixture is also available in open style (TW-440), baffled (TWB-440), or choice of flat diffusing glass enclosure (TWG-440), or Holograph lens (TWHG-440). May be had with moulded louver of destaticized plastic (TWLP-440). Available in both regular and shallow design for single or continuous row installation. Special hangers available.

Specifications: One-piece housing of 18 gauge steel. Exterior finished in aluminum gray baked synthetic enamel, interior in white, high gloss baked enamel. Finished with flange trim or with T-bar mounting construction. Wired units include UL and ETL approved high p.f. 2-lamp transformers and sockets, type FS easily replaceable starters. Conventional 110-125 volts, 60 cycle A.C. Other voltages on request. Also available for instant-start operation in regular height. Available, in regular height only, for use with Slimline lamps in 42-inch to 96-inch lengths.

COMMERCIAL "VARSITY" FIXTURE

Model No. V-240

A combination of quality lighting and moderate price. Gives the abundance of direct and indirect light of a luxury-type fixture at comparatively low cost. Especially suited to use where "close-seeing" is a constant requirement such as in school rooms, libraries, over drafting-boards, etc.

Specifications: Housing and channel of 18 gauge steel. Entire unit finished in white, high-gloss baked enamel. Baffle type louvers (easily removable for servicing) achieve 25°-35° shielding. Other shielding angles available on request. Fixture can be installed single, or in continuous rows with no couplers needed. Wired units include UL and ETL approved sockets, type FS easily replaceable starters, and UL approved HPF brick-type ballasts. Conventional 110-125 volts, 60 cycle A.C. Other voltages and instant-start operation available on request. Unit may also be had with translucent plastic side panels at slight additional cost, No. VP-240.

LEADER FLUORESCENT FIXTURES

FLUORESCENT COMMERCIAL "OFFICER" SERIES FIXTURES

Model No. VL-440

Especially suitable for stores, offices, and institutions. This fixture combines lighting efficiency with simple installation and easy maintenance. Use it as a single unit or in continuous runs — ceiling mounted or suspended. Adjustable Leader Direclite spot light attachments available (excellent for mounting over merchandise).

Specifications: Four 40-watt T-12 48-inch fluorescent lamps. Also Model VL-240 for two 40-watt 48-inch T-12 fluorescent lamps. Housing and channel of 20 gauge steel. Extruded translucent plastic side panels and moulded plastic louvers. Louvers swing down and out of the way for easy relamping and cleaning. Plastic destaticized, warp-proof, dust-resistant and color-fast. Finished in white high-gloss baked enamel. Wired units include UL and ETL approved sockets and easily replaceable starters. Conventional 110-125 volts 60 cycle A.C. Other voltages and instant-start operation available.

Price is for 31° plastic louver.

COMMERCIAL SLIMLINE "VARSITY" FIXTURE

Model No. V-280

This model accommodates Slimline lamps in lengths up to 8 feet. Long fixtures obviously necessitate fewer fixtures for any given area — fewer to buy, to install, to lamp, to re-lamp. Both original and maintenance costs are held to a minimum. Slimline lamps provide instant-starting, choice of brightness levels, and single-pin bases for easy, quick re-lamping.

Specifications: Housing and channel of 18 gauge steel. Entire unit finished in white, high-gloss baked enamel. Baffle-type louvers (easily removable for servicing) achieve 25°-35° shielding. Other shielding angles on request. Fixture can be installed singly, or in continuous runs with no couplers needed. Instant-start 120, 200, 300 and 425 milliamperes operation. Uses either T-8 or T-12 75-watt Slimline lamps. Wired units include UL and ETL approved sockets and high p.f. ballasts. Unit may also be had with translucent plastic side panels at slight additional cost, No. VP-280.

Cat. No.	Lights	Dimensions, Inches			Shpg. Wt. Lbs.	Price Each

LEADER FLUORESCENT FIXTURES

FLUORESCENT COMMERCIAL U.R.C. RESEARCH LUMINAIRES

Model No. LRL-440

This fixture conforms to the technical specifications of the Utilities Research Commission (Better Light — Better Sight requirements). Leader offers it in excellent design, beauty and mechanical features. For use as a single unit or in continuous runs — suspended or mounted direct to ceiling.

Specifications: 2 or 4 40-watt 48-inch T-12 fluorescent lamps. Housing and channel of 20 gauge steel. Available with louvers (Model LRL-440) or with glass panels (Model LR-440). Entire side and bottom glass or louver hinged for easy maintenance. Exterior and end caps finished in rich silver-gray enamel. Interior finished in white high-reflecting, chip-proof baked enamel. Wired units include UL and ETL approved sockets, type FS easily replaceable starters, and two high p.f. 2-lamp ballasts. Conventional 110-125 volts 60 cycle A.C. Other voltages on request. Also available for instant-start operation.

LEADER FLUORESCENT FIXTURES

FLUORESCENT COMMERCIAL
"SCHOOLMASTER" SERIES

Model No. SM-240

Especially designed for schoolroom and hospital use. 60% downward and 40% upward light diffusion — same model, but with built-in germicidal lamp (SMG-240). Natural room ventilation causes circulation of air of room to pass over germicidal lamp.

Specifications: Two, three or four 40-watt fluorescent lamps, or 96-inch T-8 or T-12 Slimline lamps. Housing and channel of 18 gauge steel. Built for use as a single unit or in continuous runs. Standard louver cut-offs are 25-35 degrees and 25-45 degrees. Other shielding angles furnished on request. Entire unit finished in white high-gloss baked enamel. Wired units include UL and ETL approved sockets. Also available for instant-start operation. No connection couplers needed for continuous row installation. Swinging louvers for easy servicing.

Cat. No.	Lights	Dimensions, Inches			Shpg. Wt. Lbs.	Price Each
		Length	Width	Height		
SM-240	2	48 $\frac{3}{8}$	12 $\frac{3}{8}$	8 $\frac{3}{8}$	33	\$21.05

SM-440	4	48 $\frac{3}{8}$	12 $\frac{3}{8}$	8 $\frac{3}{8}$	45	28.42

With 30-watt Germicidal Unit Enclosed in Channel

SMG-240	2	48 $\frac{3}{8}$	12 $\frac{3}{8}$	8 $\frac{3}{8}$	40	28.47
SMG-340	3	48 $\frac{3}{8}$	12 $\frac{3}{8}$	8 $\frac{3}{8}$	45	33.69

With 60-Watt T-17 Lamps for Low
Surface-Brightness

This variation of the "Schoolmaster" has no louvers or other shielding, so that the abundance of quality light is fully used. Yet through the combination of the T-17 lamps and the efficient V-shaped reflector, there is no glare. Glossy paper under this light has little or no specular reflection. Ideal for schools, libraries, offices, etc.

Cat. No.	Lights	Dimensions, Inches			Shpg. Wt. Lbs.	Price Each
		Length	Width	Height		
SM-240-LB	2	60	12 $\frac{3}{8}$	8 $\frac{3}{8}$	45	\$24.55

"Sunlighter" with Fluorescent Sun Lamp
Centered between Lighting Tubes

Same specifications as SM-240, above, except that this fixture combines a 20-watt fluorescent sun lamp with two 48-inch lighting tubes, or 40-watt sun lamp with 60-inch lighting tubes. Highest quality illumination combined with health-giving radiations reproducing sun's most desirable ultra-violet rays. Cast over a wide area for all-day, room-wide use. Sun lamp produces Vitamin D in effective quantities. Lamp stays cool in operation. Especially suited for use in classrooms, gymnasiums, assembly halls, hospitals, offices, factories, bowling alleys. Price does not include sun lamp.

Price is for 425 ma.

FLUORESCENT COMMERCIAL "NEW
HORIZON" SLIMLINE SERIES FIXTURES

Model No. NHC-480

Used in commercial establishments where a distinctive and highly modern effect is desired. Moulded plastic louvers offer 45° or 31° shielding and provide maximum diffusion of efficient light from 8-ft. slimline lamps. Leader slimline units use one-piece steel channel embossed for rigidity and flush ceiling mounting.

Specifications: Extruded translucent plastic side panels and moulded plastic louvers. Louvers swing down to right or left. End caps of deep-drawn steel. Entire unit is finished in white high-gloss baked enamel. Wire units include UL and ETL approved sockets and two high p.f. 2-lamp ballasts. Conventional 110-125 volts, 60 cycle A.C. Other voltages on request. Instant-start operation is a feature. Directlite spot light attachments available. Available for 120, 200, 300 and 425 milliamperes operation.

INDUSTRIAL "ZEPHYRLITE" FIXTURES

Model No. ZUO-240

A fixture in which advanced design and engineering provide the utmost strength and rigidity. For mounting direct to ceiling, or suspended either as individual units or in continuous rows. Closed end "Zephyrlite" (ZIU for 2-lamp operation) meets specialized lighting requirements where concentrated high level illumination is desired.

Specifications: 20 gauge all-steel deep drawn channel housing, for use with sliding clamp hangers. Channel and reflector top surface finished in gray baked enamel. Reflector finished in double coated white baked enamel, ZUOL series (or in porcelain, ZUOP series). Units completely wired and ready to install include UL and ETL approved 95% p.f. corrected ballasts, turret type sockets, and replaceable starters. Conventional 110-125 volts 60 cycle A.C. Other voltages on request. Also available for instant-start operation.

LEADER FLUORESCENT FIXTURES RECESSED TROFFERS

Model No. T-240

Available with or without flange trim, and for T-Bar steel channel or wood furring mounting. A versatile fluorescent fixture, to be used singly or in continuous rows. The easily removable reflector provides quick accessibility to all auxiliaries. Special hangers may be ordered for any type of ceiling construction. Furnished in 12-inch, 24-inch and shallow-type fixtures.

Specifications: Housing and channel of 18 gauge steel. Interior finished in white high-gloss enamel. Exterior finished in aluminum-gray baked synthetic enamel. Fixtures furnished as open (T-240), glass enclosed (TG-240), baffled (TB-240) or louvered (TL-240). Wired units include UL and ETL approved high p.f. 2-lamp transformers and sockets, type FS easily replaceable starters. Conventional 110-125 volts 60 cycle A.C. for 1, 2 or 3 40-watt lamps. Other voltages on request. Instant-start operation available. Length 48 inches.

Mitchell Module Lighting System

**A**

Module A
Uses 4 14-Watt
T-12 15" Type F
Lamps

Module A2
Uses 2 14-Watt
Lamps

Module B
Uses 1 32-Watt
12" diameter
Circline Lamp and
1 Par/3SP Spot or
1 Par/3FL Lamp

B

The word "module" comes from a Latin word meaning "standard of measurement." The standard of measurement or module of the MITCHELL MODULE system is 16 1/4 inches. Thus, the plan dimensions of MODULES A and B are 16 1/4 x 16 1/4 inches. MODULES C and D are exact multiples of this standard of measurement.

Module C
Uses 4 40-Watt T-12
48" Type F Lamps

Module CS
Uses 4 40-Watt 48T12 Slimline Lamps

Module C2
Uses 2 40-Watt Bi-Pin Lamps

Module C28
Uses 2 40-Watt Single Pin Slimline Lamps

C

A module is a unit of standardized measurement that makes possible the use of multiples of the unit in various flexible combinations so that they form a complete structure of uniform, harmonious proportions.

Module D
Uses 4 75-Watt T-12
425 milliamp
Slimline Lamps

Module D2
Uses 2 75-Watt 96T12
Single Pin Slimline Lamps

D

Mitchell Module Lighting System

Advantage—

Equal brightness throughout

The ingenious plastic side and end panels, which are an exclusive feature of all Mitchell Modules, provide equal brightness on all sides and ends. A consistent color temperature is maintained throughout the entire Module. Regardless of the lighting pattern, you will never find disturbing, undesirable dark sides or ends in any Module lighting system. No other system achieves the "all-over brightness control" of a Mitchell Module installation.

The New Ideal of Lighting—There is no limit to the creative use of Module — the only existing mass-produced lighting system that offers all the advantages of custom installation for every type of commercial and institutional establishment.

No Dark Spots in The Module Spotlight—Module B provides vivid down punch highlighting for merchandising and displays — without the dark spots created by ordinary spotlight units. Module B accommodates either a 150-watt PAR/3SP Spot or a 150-watt PAR/3FL Flood Lamp — plus a 32-watt

12-inch diameter fluorescent Circeline lamp which maintains the equal brightness common to all Module units.

Ordinary Fluorescent—Metal ends of fixtures create objectional dark spots. Spotlight sides and ends are always dark — to mar the appearance of the installation.

Matching ordinary fixtures are not available for diversified applications. Fixtures are unrelated in design, dimension and material. Impossible to achieve a unified relationship.

Advantage—

Harmonious throughout

Mitchell Module makes it possible to illuminate all rooms and areas of an entire building interior with matching Modules, used singly or in combination as required to fulfill proper lighting requirements. Regardless of the area or function, the Modules used will blend harmoniously throughout. Their uniform styling, related proportions and perfect integration create a single, unified lighting "family" of handsome distinction and unsurpassed lighting excellence.

MITCHELL SLIMLINE FLUORESCENT FIXTURE

No. 3020 FOR 4-8 FT. SLIMLINE LAMPS

Open Type

With Louver Shield

A brilliant commercial lighting fixture. Features an exclusive construction in two 4-foot sections, all ready to slide together to make a single sturdy 8-foot unit. Hanging and installing is an easy one-man job. An 8-foot fixture packed in a 4-foot carton. Easier to handle and install than any other 8-foot fixture available. No hazards, no struggling with ordinary fragile, bulky 8-foot fixtures. The last word in convenient, versatile Slimline design. Sockets are enclosed in Satin Aluminum die cast housing. Channel is of heavy gauge steel finished in Baked White Enamel. Where shielding is desired, a Model No. 340 Louver is attached to the open-type fixture. Provides 30° lateral shielding and 20° longitudinal shielding due to its full depth design. Louver has exclusive trunk-lock hinge mechanism for relamping and maintenance convenience.

Ideal for continuous row installation direct to ceiling, or on stems. May be used individually, surface or stem mounted.

Dimensions 96¼ inches long, 10⅞ inches wide, 5⅝ inches deep. Operates on 110-125 volts, 60 cycle A.C. Bears Underwriters label. Ideal attractive lighting for sales and display areas and for business offices.

MITCHELL FLUORESCENT TROFFERS

Open Type, Glass Shielded, and Louver Shielded Troffers

Mitchell Troffers provide attractive high intensity recessed lighting for offices, stores, lobbies, banks, bowling alleys and public buildings. Engineered for more attractive and effective Commercial Lighting, with the utmost simplicity of installation.

The Mitchell Troffer System consists of:

1. "Basic Unit" No. 3040, 3041 and 3042 (reflector and wireway channel wired with ballasts and starters) for 2-40 watt lamps, or for 3-40 watt lamps, or INSTANT-START.
2. Hinged Glass Frame, No. 323, of ribbed prismatic glass. Slips into "basic unit" where glass shielding is desired. Special hinge hooks permit frame to swing down freely for easy relamping and cleaning.
3. Hinged Metal Louver, No. 324. Slips into "basic unit" where louvered shielding is desired. Has exclusive swing-hinge feature.
4. End Plate No. 321 for ends of continuous rows, and Coupling Plate No. 322 to connect units together in rows.

For Acoustical ceilings of Tee-Bar snap-in block construction, the "basic unit" snaps right into place — requires no accessory fittings. For other types of ceilings — plaster and lath, acoustical tile, etc. — a complete line of simple accessory parts is provided to assure easy, accurate permanent mounting.

DELUXE SLIMLINE STRIPS

No. M4

Ideal for flooding large areas with cool, high-level illumination. Compact and adaptable for either vertical or horizontal installation. For lighting large waiting rooms, hotel and building lobbies, theaters and other large areas.

Easy installation for every conceivable requirement is assured by abundant knockouts for easy wiring. Conveniently punched holes are provided for screw mounting. Constructed of heavy gauge welded steel, finished in baked white enamel. General Electric equipped throughout. UL approved. T8-200 Milliamp ballast. These units are also available in 72 inch, 64 inch and 48 inch lengths.

COMPCO FLUORESCENT FIXTURES

INSTANT START CIRCLINE FLUORESCENT FIXTURES

Model 492—Flushmount

Clean, attractive design accented by suspended spherical ornament. Finished in white, washable, baked "Glazename," the high lustre finish exclusive with Compo. One light, 12 inch diameter, 32 watt L.P.F. 110-125 volt, 60 cycle, AC only.

List Price, Model 492 (with lamp).....each \$10.85

Model 495—Flushmount

Available in two styles: white with chrome trim or ivory with polished brass trim. Body of fixture finished in sparkling "Glazename," baked on. Terraced crown on white body is mirror-bright, triple chrome plated. Crown on ivory fixture is highly polished, gleaming brass finish. Both ornamented with crystal pendant. One light, 12 inch diameter, 32 watt, L.P.F. 110-125 volt, 60 cycle, AC only.

List Price, Model 495 (with lamp).....each \$12.95

Model 550—Flushmount

There is sparkling brilliance in the overall, triple chrome finish of this handsome fixture. Body and trim alike glitter and gleam with reflected highlights. Accented with pendant crystal ornament. One light, 12 inch diameter, 32 watt L.P.F.

List Price, Model 550 (with lamp).....each \$14.95

COMPCO FLUORESCENT FIXTURES

INSTANT START CIRCLINE FLUORESCENT FIXTURES

All fixtures complete with lamps, ready to install. 110-125 volt 60 cycle only. Fixtures U.L. approved. (Also available without lamps.)

Model No. 665—Economy Model

Full size, low priced fixture, using the spring clip method for securely holding lamp. Available in white, washable, baked "Glazename," or triple chrome plated. Specify 665-C for chrome and add \$1.15 to price of No. 665-W. One light, 12 inches in diameter, 32 watt LPF.

List Price, Model 665-W (with lamp)....each \$9.00

SIMPLET "FRICTION SET" FIXTURE HANGER

A Fixture Hanger that turns to any angle after being screwed to an outlet box. Although base and receptacle remain stationary, hanger arms may be turned to align with any preconceived lighting plan. Exclusive friction ring firmly holds fixture in selected position. Hanger screws on to 3 1/4 inch or 4 inch outlet boxes, no other fastening necessary. Furnished complete with receptacle, two 5-foot chains, S-hooks and cord clips.

Cat. No.	Description	Std. Pkg.	Wt. Pkg. Lbs.	List Price Each
K-100	Fixture Hanger for 3 1/4 or 4-inch outlet box....	50	55	\$1.10

Finish—Cadmium. **Material**—Steel. **Dimensions**—Diameter of cover 4 1/4 inches. Overall length of arms 9 inches. **Receptacle**—Sturdy two-wire, 15 amp. receptacle with double contacts, which grips plug cap firmly.

COMPCO PORCELAIN UTILITY SOCKETS

TWO STYLES FOR EVERY USE AND NEED

No. 299

No. 254

No. 299—Floor Stand Socket

Positive action lock secures height of stand in position at any point. Easily operated — can't slip. Positive leg adjustment. No screws or clamps to set. Folds away for easy storage. Packed 12 to shipping carton; weight 60 lbs. U.L. approved.

List Price, No. 299 Lamp Stand for Heat

Lampseach \$7.50

No. 254 Clamp-On Socket

Vise-action spring clamp grips securely — holds lamp steadily in place where desired. Rubber covered at contact point to prevent marring. 6-ft. approved cord. Packed 25 to carton. U.L. approved.

List Price, No. 254 Porcelain Socket and

Spring Clamp Assembly.....each \$1.95

COMPCO ALL PURPOSE HOLDER

4-INCH HOLDER—ONE PIECE PRESSED STEEL CONSTRUCTION

Quickly and easily installed. Will fit most standard types outlet boxes. Complete with cross bar and extension screws, eyelet hole for pull chain sockets and knockout at top rim. Baked-on white enamel finish or highly polished plate finish.

Baked-On White Enamel Finish

JEFFERSON FLUORESCENT LAMP BALLASTS

No. 234-701

No. 234-501

No. 234-601

All of the materials used in Jefferson Electric Ballasts are of selected high quality. Moisture is removed in vacuum equipment of latest design and coils are double vacuum impregnated under pressure, making them impervious to moisture under all operating conditions. Only the best grades of electrical steels are used for laminae, which are re-annealed after punching.

The rugged steel cases are black enamel finished and equipped with convenient mounting brackets.

Installation—To promote efficient and long service the usual installation precautions must be observed. Like other electrical devices, ballasts have definite operating limitations. Jefferson Ballasts are designed to deliver rated watts to the lamp at the nominal voltage indicated on each unit. Failure to install on circuits within the limits indicated in the following table will cause lamp to deliver other than its rated output and may possibly damage the ballast or lamp.

Single Lamp Ballasts — 60 Cycles Normal Power Factor

Cat. No.	Circuit Voltage	Lamp Watts	Appr. Watts Loss	Appr. Power Factor %	Appr. Shpg. Wt. One Ctn.	Std. Ctn.	List Price

*234-191	110-125	2-40	25.0	95	4	44	10.00

†Will also operate the 85 Watt Lamp.

*For use in ambient temperatures as low as 40° F.

Nominal Voltage	Low Voltage	High Voltage
118	110	125
208	199	216
236	220	250

Frequency—Frequency must agree with the frequency indicated on the ballast housing.

Ventilation—It is important that the housing in which the ballast is mounted be suitably ventilated to insure proper dissipation of heat. These units, like most electrical devices, generate a certain amount of heat during normal operation should not be more than 50 degrees C.

Reduction of Stroboscopic Effect—Each two-lamp high power factor ballast is equipped with a condenser which not only corrects the power factor but operates one lamp out of phase with the other, thereby greatly reducing the stroboscopic effect characteristic of fluorescent lamps.

†Will also operate the 85 Watt Lamp.

JEFFERSON SLIMLINE LAMP BALLASTS

FOR LONG SLIM FLUORESCENT LAMPS

Approved by Underwriters' Laboratories, Inc.

Slimline lamps with single pin contact at each end operate on the hot cathode principle. They are instant starting and do not require a separate starting device. The types listed below are designed for operation on a nominal line voltage of 118 or a range of 110-125 volts. The function of the ballast is to transform the line voltage to the high starting voltage required by the lamp and when the arc is established, limit the current and voltage to that required by the lamp in normal operation. For efficiency and long life lamp service it is imperative that the ballast characteristics closely match those of the lamps and users guarantee is the E.T.L. label appearing on each ballast. This certifies that the Electrical Testing Laboratories, an independent testing organization, periodically test ballasts taken from regular production to ascertain if they meet the electrical requirements set up by the leading lamp manufacturers.

JEFFERSON LUMINOUS TUBE SIGN TRANSFORMERS

SERIES 721-724 HIGH-INTENSITY TRANSFORMERS

Listed Standard by Underwriters' Laboratories

Series 721—U. S. Patents Nos.
1,777,256 and 1,786,422.

Designed for use with all types of portable or fixed indoor or outdoor neon signs. Cases are drawn in one piece from heavy rust-resisting steel, and finished in baked-on black wrinkled enamel.

CORE AND COIL WITHOUT CASE

Jefferson Core and Coil types are particularly adaptable for small portable signs, where space is at a premium and where small sections of tube are to be operated. Each unit is assembled in the same careful and thorough manner as are Jefferson encased types.

Price, Model No. LMC-362 Cabinet.....each \$35.50

No. LSF-444 LIGHTED MODEL

Equipped with Grotelite heavy die-cast one-piece fixtures. Light gray hammer enamel finish. Switch in left bracket; convenience outlet in right. T-10 40-watt frosted bulbs furnished. No shades required. 14 x 20 arched top plate glass mirror. Polished stainless steel frame.

Seamless deep-drawn body. Lustrous baked-on white enamel finish, "Sealtex" treated before enameling for enamel adherence and rust resistance. White enameled continuous piano hinge — bullet catch — removable shelf brackets — two bulb edge glass shelves. Rough opening: 12¼x17½x3½ inches.

Price, Model No. LSF-444 Cabinet.....each \$28.00

GROTE BATHROOM CABINETS

MODEL No. LSF-264 DELUXE CABINET

This lighted model furnished with chrome plated light fixtures, switch and convenience outlet.

Bright stainless steel mirror frame or mirror clips if desired. Polished plate glass mirror with quality backing. White enameled steel continuous hinge. Removable shelf brackets set in recessed standard with shelf adjustments 1 inch apart. Bulb edge glass shelves (3 furnished). Chrome-plated round bar door stop. Matched moulded plastic razor blade disposal box and tooth brush holder. Complete cabinet made of heavy gauge cold rolled steel and finished in a high lustre baked on enamel. Mirror size, 16x24 inches; rough opening, 13¾x19¾x3¾ inches. Shipping weight, 32 lbs.

Price, Model No. LSF-264 Cabinet.....each \$44.40

MODEL No. SF-264 UNLIGHTED CABINET

Same details of construction as the LSF-264 except unlighted.

The beauty of design and quality construction in this unlighted cabinet makes it an outstanding value. Furnished with polished plate glass mirror. The Grote one-piece seamless body on this cabinet embodies all the quality features and accessories in the Grote line.

Mirror size, 16 x 24 inches; rough opening, 13¾x18¾x3¾ inches.

See above for details of construction.

Shipping weight, 25 lbs.

Price, Model No. SF-264 Cabinet.....each \$22.00

GROTE BATHROOM CABINETS

MODEL No. SF-444 CABINET

Bright stainless steel mirror frame. Polished plate glass mirror, 14x20 inches. Removable shelf brackets set in recessed standards with shelf adjustments 1 inch apart. Bulb edge glass shelves (2 furnished). Slot in cabinet body for razor blade disposal. Complete cabinet of medium gauge cold rolled steel, finished in high lustre baked on enamel. Rough opening, $12\frac{1}{4} \times 16\frac{3}{8} \times 3\frac{1}{2}$ inches.

Price, Model No. SF-444 Cabinet.....each **\$14.05**

MODEL No. SF-0241 SURFACE TYPE CABINET

An outstanding cabinet for surface mounting. The same Grote quality construction is maintained. Furnished with glass shelves, continuous hinge, bar door stop, bullet match and door bumpers. Stainless steel frame. 14 x 20-inch plate glass. Body dimensions, $13\frac{3}{4} \times 18 \times 4$ inches overall. Shipping weight, 17 lbs.

Price, Model No. SF-0241 Cabinet.....each **\$11.80**

MODEL No. WF-0241 SURFACE TYPE CABINET

Same as above, except has white enamel frame and window glass mirror. Shipping weight, 15 lbs.

Price, No. WF-0241 Cabinet.....each **\$8.50**

GROTE BATHROOM CABINETS

STOR-in-DOOR* BATHROOM CABINETS

Shelves recessed inside the door allow more useable storage space — every item in the cabinet plainly visible — every article conveniently in finger-tip reach. These recessed models contain all the distinctive Grote quality features — drawn seamless steel bodies with rounded corners, gleaming white enamel finish, adjustable glass shelves.

Recessed Model C-264, with Grote-in-Door features. Plate glass beveled top mirror held in place by streamlined chromium trim, extending over door interior. Piano type hinge, chromium plated. Three adjustable bulb edge shelves in body — four shelves in door. Wall opening: $13\frac{7}{8} \times 16\frac{3}{8} \times 3\frac{1}{2}$ inches. Weight, 26 lbs.

Price, C-264 with Semi-framed Plate Glass Mirror**\$27.80**

Model No. SD-440, recessed type, features Grote Stor-in-Door* with stainless steel frame on plate glass mirror. Piano-type hinge; adjustable bulb-edge shelves. Wall opening: $12\frac{1}{4} \times 16\frac{3}{8} \times 3\frac{1}{2}$. Shipping weight, 18 lbs.

Price, SD-440 Rectangular, Rounded Corners, Stainless Frame Plate Glass.....**\$15.50**

STOR-in-DOOR* BATHROOM CABINET

The added shelves recessed inside the door allow twice as much useful storage space — every article in the cabinet plainly visible — every item conveniently in finger-tip reach. Designed to give more usefulness to bathroom cabinets.

No. SD-1200, with arched, framed mirror and generous sized cabinet. Gleaming white enamel finish baked on all-steel cabinet. Clear window glass, size 11x19 inches. Body size— $13\frac{3}{4} \times 18 \times 3$ inches.

Shipping weight, 10 lbs.

Price, Model No. SD-1200 Cabinet.....each **\$7.25**

*Only Grote makes the Stor-in-Door Cabinets. Patent pending.

GOODRICH LIGHTING EQUIPMENT

Permanent Porcelain Enamel Finish

GOODRICH SEPRABLE REFLECTORS

Patent No. 2,046,184

Easy to Install—Easy to Service

The remarkable ease with which Seprable reflectors may be installed is due to the complete "take-apart" construction of hood, socket and reflector. Simply wire the sockets and with a quarter turn, snap them into the hoods. Reflectors also attach with a quarter turn. No screws are used; there is nothing to loosen or corrode. The resilient socket cushions the lamp against vibration, maintains a firm contact, lengthens lamp life. Standard finish is

vitreous fired porcelain enamel, green outside, white inside.

Reflectors with pendant and 4-inch outlet-box hoods are listed below. When specified, right-angle hoods will be supplied at same price. For medium feed-thru hoods add \$0.20 to list price. Standard tapping 1/2 inch or, when specified, 3/4 inch.

SEPRABLE STANDARD DOME REFLECTORS

Complete with hood and resilient keyless socket. For medium base pull-chain socket, specify and add \$0.90 to list price.

Porcelain Enameled—Weatherproof
With Keyless Socket
STOCKLITES
Patent No. 1,894,227

Light is directed to the sides, providing adequate illumination from top to bottom shelves and into bin interiors. Aisle glare is eliminated by the curved V-shaped flanges which also help to build up light intensities where it is needed. The Stocklite improves working conditions and makes possible faster, more accurate handling of orders. Equipped with Seprable hood, the Stocklite is easily attached or detached without the use of tools, and without disturbing the wiring. Standard finish white inside and outside. Fixtures listed below are supplied with keyless sockets. For pull-chain socket specify and add \$0.90 to list price.

FLOODLIGHTS WITH POLE, BRACKET AND CROSSARM MOUNTING HOODS

Pole Mounting

Bracket Mounting

Crossarm Mounting

Floodlights are finished in vitreous fired porcelain enamel which is easily cleaned to retain its original high efficiency. Equipped with cast ventilated hood which allows floodlight to be completely removed from the hood without disturbing the wiring. During installation and wiring, only the hood is handled instead of the heavier complete unit. Hoods provide for complete vertical and lateral positioning. Pole mounting hoods are concealed wiring style for mounting on 2-inch pipe or, when specified, on 1½-inch pipe. Bracket mounting hoods are open wiring style and may be clamped on 1-inch to 2-inch iron pipe or attached to wooden crossarm or other flat surface, and are furnished with threaded wire entrance bushing which may be replaced with BX connector. Crossarm mounting hood is open-wiring style. May be attached to any flat surface. Allows for vertical and lateral positioning. Automatic stop assures the reflector being returned to its exact original position.

DIFFUSO FLOODLIGHTS

Large, seamless, one-piece construction. This floodlight is recommended for evenly illuminating large areas. Standard finish, green outside, white inside.

Cat. No. 2001

This Revere Floodlight was developed originally to meet the needs for "long range" floodlighting applications. Its concentrating high candlepower beam provides efficient illumination of areas such as stadia, railroad yards, golf driving ranges and other areas where the floodlight is to be mounted some distance from the area to be lighted.

Many unusual features have been incorporated in the design to provide the ultimate in efficiency, and simplicity of installation and maintenance. Since the introduction of the 20-inch unit, there was a demand for the incorporation of the same features in a medium spread 18-inch floodlight utilizing a majority of the same parts. The resultant design has made possible the interchange-

ability of reflectors and glass by simply removing four screws. Settings of focus remain undisturbed.

The entire floodlight is mounted in one-piece cast aluminum trunnion adapter which encircles and is attached rigidly to the front section reflector. A hot dip galvanized steel yoke is attached to the trunnion casting. The unit is available with cross arm, 1½-inch slip fitter, 2-inch slip fitter, pipe clamp mounting or flat base.

The socket cap is provided with a water-tight packing gland through which a No. 12 two-conductor rubber covered cable can be passed.

The unit is designed for use with a 750, 1000 or 1500 watt PS-32 clear bulb general service lamp with mogul screw base.

REVERE FLOODLIGHTS

VENTILATED AND WEATHERPROOF No. 6500
LINE OF 750-1000 WATT FLOODLIGHTS

The housing of this floodlight is of heavy gauge steel, having a cast iron front frame and lens ring door with wing-nut and eye-bolt latches to secure door frame against an impregnated asbestos gasket in frame casting. The housing is scientifically ventilated and effectively excludes rain, snow and insects.

A simple and easily operated lamp focusing mechanism produces a narrow or wide spread of light to suit every application. The silver mirrored glass reflector has been designed for maximum efficiency for all lamp positions. The reflectors are of the narrow beam type with plain smooth surface, or of medium spread type with a stippled finish.

Plain, stippled and ribbed lenses are available with a choice of lens, reflector and lamp focusing, and degree of spread from narrow (20° using plain lens, narrow beam reflector and with lamp at focus) to wide (90° using a stippled lens, medium beam reflector and with lamp ahead of focus) can be had.

The ribbed lens provides a rectangular horizontal only; when a vertical spread only is desired the lens may be rotated 90°.

Dimensions: Lens 18 inches; height 28 inches; width 22 inches; depth 13½ inches.

REVERE FLOODLIGHTS

1500 OR 3000 WATT 24-INCH AIRPORT
FLOODLIGHT

Army-Navy Aeronautical Specification AN-L-5a

The 7200 series Airport Floodlight is the ideal unit for illumination of large landing fields, as it provides a greater factor of safety for night take-off and landing than other types of general floodlights.

This unit differs from other Airport Lighting units because it is obtainable with a variety of spread lenses. When used in banks of two or more, uniform illumination may be obtained by overlapping of the beams,

thus providing high intensity illumination on the runway or landing area.

The housing is a one-piece aluminum alloy casting, dust-tight and weather-proof. The large area through which the heat is dissipated makes it unnecessary to provide ventilation.

The main reflector is ground and polished and is of the highest type commercial precision mirror. It is provided with an auxiliary spherical reflector in front of the lamp, redirecting spill light to the main reflector, thereby increasing the efficiency and eliminating stray light which is so objectionable to pilots.

The door frame is made of cast aluminum alloy, rugged in construction, hinged at the side and provided with a channel in which is mounted an impregnated asbestos gasket.

Lens of heat-resisting glass, 25 inches in diameter, produces a horizontal spread of approximately 10, 30, or 80 degrees in accordance with Army-Navy Specification AN-L-3a.

Two-pole terminal block is provided in the lower interior of the floodlight housing.

Mogul BiPost receptacle is accurately adjusted at the factory for correct focal position of the lamp. Other types of receptacles furnished on application.

Standard mounting, bronze fitter to slip 2½-in. pipe. Other types of mountings furnished on application.

Finished in International orange and white stripes. Other finishes available.

The bronze quadrant is graduated in degrees to provide accurate setting of floodlight, with locking clamp.

Lamps used are 1500 watt, 32 volt, T-24 bulb; 3000 watt, 32 volt, T-32 bulb; Mogul BiPost base, Airport Floodlight Service.

REVERE LIGHTING FOR NIGHT-TIME FLYING

HIGH INTENSITY RUNWAY MARKER Bi-Directional Type—C.A.A. Spec. L-819

Recommended for installation where adverse weather conditions prevail. If extreme adverse atmospheric conditions prevail, such as found in fog-bound coastal areas, the super-high intensity runway marker should be used.

Designed for use with a single 200 watt, T-14, 6.6 ampere medium prefocus base airport marker lamp. The optical system consists

of two doublet lens systems back to back and a Prismatic diffusing panel over the top. Two beams of light are projected up and down the runway by the fixed focus lenses.

The lamp housing is made of cast aluminum and supports the optical parts. The socket is mounted on an aluminum adapter casting. The lamp housing slips on over the adapter and is held in place by two spring-loaded hood-type latches. The parts are keyed to each other so that proper alignment is assured. A cast iron base cover and breakable coupling is furnished to fit an 'ANC' deep or shallow base.

Water tight disconnecting cable sets are provided; these conform to C.A.A. Spec. L-823, Nos. 45-64 and 45-65. The receptacle, No. 45-65, is provided with a flange to provide a water tight seal in the base cover. Spare parts available.

ULTRA-HIGH INTENSITY RUNWAY MARKER Uni-Directional or Bi-Directional Type C.C.A. Spec. L-820

This marker employs two highly efficient sealed beam projector lamps plus an auxiliary lamp operated from independent circuits. For clear weather, the auxiliary top lens of medium candlepower is adequate. When low visibility conditions are encountered the high candlepower projector lamps are used. By using brightness control equipment, varying degrees of illumination can be had. The improved design incorporates a cast aluminum 2-piece housing to accommodate the sealed beam lamps. The housing is provided with an impact, heat-resisting lens held in place by means of metal clips. The lenses are available in clear (white) or colors. The housing assembly is supported by a central chassis casting hinged at the side. Markings provide easy setting to any vertical angle from horizontal to 30 degrees above horizontal and any horizontal angle 30 degrees either side of a line parallel to the runway.

REVERE ELEVATED RUNWAY AND STRIP MARKER LIGHTS

Elevated strip or runway marker lights are being used more and more because they are more readily seen. Being elevated, they offer more trouble-free service. They provide a better day marking system. They provide higher candlepower than the flush type marker with equal wattage.

Three types of mounting are available: The Central Column type. The Stake Mounting type, and the "ANC" Base Mounting type.

REVERE RUNWAY MARKER LIGHTS

Semi-flush runway marker, surface mounted. Developed to conform to the needs of Class I and Class II airports. A low surface mounted unit which can be used on paved runways. The unit will take a considerable blow from landing gear or tail wheel without damage to the light or the plane. The unit is provided with a heat-treated lens which produces two beams of light approximately 175° apart. Designed for use with 30 or 40 watt T-10 medium prefocus base airport marker lamp. A spherical Alzak aluminum reflector is used to redirect considerable light into the lens. Housing and lens ring, cast aluminum.

REVERE WIDE ANGLE FLOODLIGHTS

180° FRESNEL LENS AND MULTIPLE OR
SERIES CIRCUITS

For Defense and Protective Lighting

Multiple-Type (Metal Hood) No. 2911-A

For use at Ordnance Plants, Bomber Plants, Arsenals, Industrial properties, Railroad and Ship Yards, Docks, Oil Refineries, Highway and Railroad Bridges, Reservoirs, Power Stations, Towers, etc.

This type of lighting is entirely to the advantage of the patrol guard because the intruder is in the beam of light in all directions of approach. The glare produced is such that the intruder cannot see the patrol guard or watchman directly underneath or back of the floodlight, yet adequate illumination is provided for the guard to move about the property safely and undetected.

The floodlights are ruggedly built, dust-tight and weatherproof. The Fresnel Lens is of heat-resisting glass and provides a horizontal spread of 180 degrees and a vertical spread of not more than 30 degrees. Mounting brackets have externally operated focusing mechanism.

The Series-Type is available with metal or porcelain hoods. The Metal Hood Series-Type has wet process receptacle and bushings.

REVERE FRESNEL FLOODLIGHT

FOR PROTECTIVE AND WIDE ANGLE FLOODLIGHTING

This floodlight is equipped with a Fresnel heat-resisting glass lens and provides a beam of 180° on the horizontal, with a 10° to 20° vertical beam when a clear lamp is used. If a frosted lamp is used, a vertical beam of 60° may be obtained. It is available for fixed type mounting or for portable use as illustrated.

The fixed-type is recommended for use on pipe stands or poles in various mounting heights, depending on the application, also for wall mounting in vertical or horizontal position.

The portable-type is available with or without casters, also with or without a protective guard, as listed. It makes a desirable unit for aeroplane hangar interiors or aprons to supplement general overhead lighting.

These Fresnel Lens Floodlights lend themselves to many uses including sidewalks, yards, open areas, hangar aprons, signs, building fronts, bridge approaches, loading docks, rivers, dams, bridges, etc.

REVERE PYLON-LITE STANDARDS

This outstanding Revere unit offers many possibilities in lighting. Since its introduction, its usefulness has spread from Gas Station Lighting to Outdoor Theater Entrances, Park and Driveway Entrances, Airport Loading Area Lighting, Street and Highway Lighting, etc. The Standard Unit (No. 1942-3F) is 5 ft. high to luminaire. Luminaire is 4 ft. 10 in. high. Overall height to light center (if flood is used) is 10 ft. 5 in. high. To top of top floods — 11 ft. 10 in.

Rich lighting effects are obtained through the 6 instant start fluorescent lamps mounted in special sockets that do not need starters. A heavy steel channel serves as the structural support of the fixtures as well as an enclosure for ballasts and wiring. Lamps operate properly under any weather conditions. Lower hexagonal section is of steel with pedestal base surrounded by a tapered hexagonal housing. All Pylon-Lites are furnished complete with Lamps.

Specifications

Steberlite line of cast aluminum lampholders for "Sealed Beam" reflector and projector type lamps for floodlighting yards, feed lots, corrals, driveways, croquet and tennis courts, patios or other play areas on farms, country estates and homes. In fact, Steberlites are the economical answer to outdoor lighting of every description. They are completely weatherproof, of durable cast aluminum with articulated joint permitting quick and easy angle adjustment to any desired range. Each Lampholder is equipped with a special silicone rubber gasket which guarantees a permanent seal between lamp and socket. In this listing we offer the S-300 Lampholder to be mounted singly, in pairs or in clusters of three lamps depending upon the area to be illuminated and the intensity of light desired. Each Lampholder is carefully wired at the factory, facilitating assembly and reducing installation costs.

No. S-330 is a three lamp cluster unit complete with Lampholders, adapter fitting and mounting bracket.

No. S-320 is a two lamp cluster to which an additional Lampholder may be added at any time to boost the volume of light output and coverage.

The versatility of Steberlites permits many combinations and arrangements which will answer any lighting problem. Other Steberlite fittings and accessories are available, including Color equipment, louvers, adapters for four or five lamps, pole mountings, flanges, etc.

MITCHELL SOFT LITE TV LAMP

Especially designed for use on top of the television set to softly illuminate area surrounding set. Eliminates disturbing sharp contrast of dark area in room and the distracting glare, providing a new degree of comfort for television viewing especially over long periods.

This Multi-Purpose Lamp has many uses—singly or in pairs on the mantel shelf; indirect light for the bedroom, den or sickroom; night light for hallway, nursery, etc.

Artistically styled of heavy-gauge solid brass. Satin bronze or Colonial brass finish which will not reflect outside lighting. Base has weighted bottom, covered with felt discs to prevent scratching furniture. Uses incandescent bulb from 25 to 100 watts. Push-switch in base. Height 10 inches—reflector bowl at top 5 inches. Wired with 6-ft. cord and plug. Choice of two finishes—satin bronze or Colonial brass. Packed 12 to a carton.

Price, Model 960 Satin Bronze, or Model 961 Colonial Brass finish.....each \$5.75

**Separate Prices on Holders and Lenses
Used in No. 17 and No. 18 Color Kits**

No. 17-H Holder only for R-40 Lampseach **\$1.00**
No. 18-H Holder only for PAR-38 Lamp each **1.00**

Color Lenses, interchangeable in No. 17-H and No. 18-H Holders — Green, Blue, Amber, Red (specify color). Price, No. 23, **\$0.45** each.

**MITCHELL SPOTRAY BED LAMPS
"SPOTRAY" DELUXE BED LAMP**

This highly efficient bed lamp throws a concentrated beam of light upon the page for easy reading. Uses a 25 watt bulb, but the specially designed lens produces 100 watt efficiency. Lamp is mounted on heavy, smooth-action ball swivel that turns in any desired direction at the touch of a finger. Has "on-off" switch fitted into clamp body. Felt-lined mar-proof clamp. Metalescent bronze baked enamel finish. Complete with cord and plug.

Individually packed, 12 to master carton; shipping weight, 36 lbs.

Price, No. 1400 "Spotray" DeLuxe Bed Lampeach **\$5.95**

"SPOTRAY JR." BED LAMP

Clamps on the back of any bed. Felt lining in clamp prevents marring. Fully adjustable by means of a super-smooth ball swivel. Powerful convex lens produces maximum efficiency from standard 25 or 40 watt bulb. Confines beam of soft restful light within a small area. Equipped with "push" type switch, and approved cord and plug.

Metalescent bronze baked enamel finish. Packed 1 to a carton; 12 to shipping case. Shipping weight, 3 pounds each.

Price, No. 1241 "Spotray Jr." Bed Lamp, ea. **\$3.45**

MITCHELL BED LAMPS

LUXURAY BED LAMP

Luxuray, the better light — better sight bed lamp. Gives shielded, directed light through the new "Plastacele" diffuser which screens out raw light and permits only glareless, conditioned light to come through. Luxuray casts its light over the reader's head directly on the reading page.

Easy to Adjust. Rubber-covered clamps allow simple adjustment to any bed without marring the finish. Clamps are flexible and permit bending to make fastening secure.

Easy to Operate. The light switch is within easy reach of the user.

Equipped with 6-foot Underwriters' Approved cord and plug.

Available in a choice of a deep-tone Walnut finish, and soft Ivory finish.

Packed one to a carton. One dozen of one finish to shipping container. Shipping weight, 24 pounds.

Price, Model No. 1245-W Walnut Finish.....\$2.50
Price, Model No. 1245-I Ivory Finish 2.50

No. 2056 "PLASTI-LITE" FLUORESCENT BED LAMP

Here is a new fluorescent bed lamp offering more light (and more scientifically directed light) than any bed lamp on the market. The angle of light is so directed that you can read with utmost comfort in reclining position, with absolutely no glare or reflection from reading page.

Amazingly cool and comfortable — a peak in fluorescent performance. "Plasti-Lite" comes in moulded plastic—Onyx Ivory.

"Plasti-Lite" uses one 8-watt, 12-inch, T5 fluorescent lamp bulb. Has standard approved sockets. Easy to operate switch. Approved 9-ft. rubber cord, with new type "plug-in" ballast. No hum. Rubber covered clamps and bumpers to fit securely any type bed and prevent marring surface. Dimensions: 12¾ inches long, 3¾ inches wide, 3 inches high. Individually packed, shipping weight 2½ lbs. Operates on 110-125 volts, 60-cycle, A.C.

Cat. No.	Description	Price Each
2056	"Plasti-lite" Bed Lamp with Bulb, Onyx Ivory finish.....	\$7.95

EAGLE LAMPS

No. 300 BAKELITE BED LAMP

A scientifically constructed Bed Lamp. The outstanding feature of this Lamp is the ease with which the Shade can be removed.

Ordinary Lamps of this type have to be disconnected and removed from the Bed for washing. This lamp eliminates all this as the Shade slides into tracks on back plate, and to clean remove the cushioning rubber bands first and slide the Shade off the plate. Underwriters approved. Pull chain socket, 6 ft. rubber zip cord and flat cap.

UNION HAYMOW LIGHTING FIXTURE

Glass globe is standard wide mouth quart canning jar. Recommended for use in such hazardous locations as barns, chicken houses, grain warehouses, etc.; where the 1947 National Electrical Code does not require special fittings covered by Article 500.

The No. 159 Haymow Lighting Fixture is designed for those dusty and mildly corrosive locations where the cost of the conventional dust and vapor proof fixtures exclude their use.

Socket, cover and globe holder are made of heavy sections of molded Bakelite. Will resist corrosive effects of moisture as well as mild acid and alkaline atmospheres, such as exist in most farm outbuildings.

The entire fixture is insulated. Danger of exposed metal parts becoming energized is eliminated. Mounts on standard 3 1/4 and 4-inch outlet boxes. For normal use—100 watt lamp; where lit continuously—60 watt lamp.

No. 159

Cat. No.	Description	Car- ton	Std. Pkg.	Wt. Lbs.	Price Per 100
159	Fixture and Globe	1	25	46	\$114.45
159-G	Globe only	12	12	15	23.10

No. 159, listed by Underwriters' Laboratories, Inc.

UNION PORCH LIGHT FIXTURE

Dust and vapor proof. Eliminates the unsightly collection of dust and charred insects that necessitate frequent cleaning of the conventional porch light.

This vapor tight fixture protects lamp shell and socket interior. The corrosion resistance of the black bakelite cover and adapter ring protects the fixture from the most severe atmospheric conditions indefinitely. The attractive pebbled glass globe assures light diffusion. Threaded top makes installation easy. Takes 100-watt lamp. For 3 1/4 or 4-inch box.

Cat. No.	Description	Car- ton	Std. Pkg.	Wt. Lbs.	Price Per 100
169	Fixture and Globe	1	12	23	\$140.70

APPLETON PORTABLE REELITES

Rating—250 Volts, 660 Watts

PORTABLE TYPE REELITES

An automatic reeling device for extension light cords. The light is always available within arm's reach and no time is lost in untangling cords or plugging in for new extensions. Each reel has a ratchet stop which works exactly like a window shade. Furnished standard with cover plate which fits over all 3 1/4 or 4-inch octagonal outlet boxes. Finish is light grey enamel. Furnished with No. 16 gauge, 2-conductor cord.

PLAIN BRACKET STRAP

Without French hook. Very handy for miscellaneous wiring on brackets, etc. Made 1/8-inch thread only.

Price, No. F-12 Bracket Strap.....\$3.50

JOSLYN STREET LIGHTING EQUIPMENT PIPE BRACKETS

Hot Dipped Galvanized

Joslyn Pipe Brackets are made of standard steel pipe. The 1 1/4-inch brackets can be furnished with threaded or clamp type malleable iron pole plates. The scroll is attached to the pipe by malleable iron clamping collars, which permit the bracket to be properly aligned after mounting on the pole. These brackets can be furnished in lengths of 4, 6 or 8 feet.

JOSLYN STREET LIGHTING EQUIPMENT

Type 50 Wedge Band Luminaires

Tapped 1 1/4 Inches for Pipe Bracket or Mast Arm Mounting

For Series Circuits Up to 5000 Volts or Multiple Circuits

2500-10,000 Lumen—Up to 575 Watts

Joslyn types 50 and 90 wedge band luminaires have been skillfully designed and engineered to provide maximum luminous efficiency together with electrical and mechanical durability. Electrical characteristics are more than adequate for series circuits up to and including 5,000 volts. They are designed in accordance with the latest requirement for standardization as to types of light distribution and interchangeability. One of the many outstanding features is the smooth, self cleaning outer surfaces of the Holophane refractors and globe.

Detail of wedge band high pressure glassware-reflector sealing.

Interchangeability—The assembly, consisting of the reflector and glassware, can be attached to most other heads in addition to those supplied with the complete luminaire. This minimizes the number of parts required on the service truck for maintenance purposes. The series receptacle has mounting hole spacing and overall height in accordance with the latest standard practice. This still further reduces the number of service parts required, since this receptacle will fit into most other heads.

JOSLYN STREET LIGHTING EQUIPMENT

Type 50 Wedge Band Luminaires

Tapped 1 1/4 Inches for Pipe Bracket or Mast Arm Mounting

For Series Circuits Up to 5000 Volts or Multiple Circuits

2500-10,000 Lumen—Up to 575 Watts

(Continued from previous page)

The various styles of aluminum heads are essentially the same with the exception of the method provided for wiring and mounting. All heads for top mounting have a 1 1/4-inch tapped hole, but can be tapped 1 1/2 or 2 inches if specified. The side mounting heads are for attachment to 1 1/4-inch pipe, but can be supplied for 2-inch pipe if specified. The two adjusting screws permit alignment of the luminaire. The wet process porcelain heat baffle protects the cable insulation from the heat developed by large lamps, and its use is recommended for lamps of 6,000 or 10,000 lumen ratings.

All bushings have pipe threads for attaching to the head, providing a tight and secure means of attachment. The porcelain bushings for single conductor wires have a 1/2-inch diameter hole and those for two conductor cable have a 1-inch diameter hole. When equipped with external terminals, the porcelain bushings for single conductor wires provide a water and dust tight seal. The gland bushings have a rubber packing gland for either single or two conductor cables.

Type 90 Wedge Band Luminaires

With Slip Fitter for 1 1/4-Inch Pipe

For Series Circuits Up to 5000 Volts or Multiple Circuits

2500-10,000 Lumen—Up to 575 Watts

(Continued from previous page)

Detail of Wedge Band High Pressure Glassware Reflector Sealing

The series receptacles are available in wet or dry process porcelain. Overall height is 3 3/8 inches, and mounting holes are located on 4 3/8-inch centers to take No. 12-24 or smaller machine screws. The mogul multiple and medium multiple sockets are equipped with mounting brackets having the same mounting hole spacing as the series receptacles. The series socket conforms to the latest standards for interchangeability. The white glazed porcelain housing is 3 1/2 inches long and all metal parts are made of heavy, nickel plated bronze, providing ample current carrying capacity for all series circuits.

Reflector is made of heavy gage Alzak Aluminum with a highly polished reflecting surface and natural finish outer surface. The Wedge Band Globe Holder embodies a new principle of sealing the glassware to the reflector without the use of a gasket. It is made of heavy rolled aluminum and is provided with a 1/4-inch diameter non-ferrous bolt. The conical seating surface of the reflector acts as a spring diaphragm, which is drawn down by the wedge band into exact conformity with the glassware flange.

Types 1 and 3 distributions are provided by the use of Holophane refractors, which have a prismatic inner surface and a smooth outer surface. Types 4 and 5 distributions, a clear rippled globe is used.

L-M STREET LIGHTING

L-M STREET LIGHTING STANDARDS

The L-M line of street lighting equipment includes every item required for a complete modern installation — luminaires, standards, brackets, mast-arms, switches, transformers, cut-outs, etc.

A dependable, complete line of efficient lighting, lasting good appearance, trouble-free service and low maintenance cost.

L-M Lighting Standards for all types of installations can be supplied in either pressed steel or concrete for any desired mounting height.

These standards are strong and durable — their ornamental design is pleasing and correct to the last detail.

L-M offers a complete line of material to meet every street lighting need. If desired, a specially designed luminaire can be supplied.

Full particulars furnished on request.

L-M DIRECTOLITE GLASS REFLECTOR

Light distribution similar to that of modern enclosed luminaires at a cost comparable to the old style radial reflectors in which a mirrored reflecting surface is permanently bonded to the glass of shock-proof qualities. Even illumination is obtained with very few shadows under usual installation conditions.

Cat. No.	Description Reflectors	For Light Center Lamps, In.
614308A1	Small Symmetric	5 3/8
614308A2	Large Symmetric	7

STAINLESS STEEL DIRECTOLITE REFLECTOR

A sturdy, rigid reflector whose physical properties of strength and permanence assure many years of trouble free, low cost operation. Equally important are the excellent lighting characteristics which give

high utilization of light on the street surface. With lighting characteristics in I.E.S. Type II classification, this luminaire finds its natural application for residential streets. It is available with a complete line of collars for attachment to porcelain and metal heads in which correct focal position is obtained with normal settings for 1,000 and 2,500 lumen 5 3/8-inch light center series street lamps or 5 1/4-inch light center multiple lamps.

Cat. No.	Description
614338B1	Reflector with street and house side shields.
614337B1	Plain reflector without street or house side shields.
614340A5	Street side shield.
614340A3	House side shield.

L-M STREET LIGHTING

L-M METROLITE LUMINAIRE

The Metrolite Luminaire is recommended for use on straight series circuits of 11,000 volts or less and on multiple street lighting circuits. Furnished with a wet process, green glazed porcelain head fitted with metal dead end terminals for outer wiring. This luminaire is available in a variety of glassware and reflector combinations, and with a wide selection of cast iron hoods for mounting, and with either series or mogul multiple socket.

Listed and illustrated here is the L-M Metrolite porcelain head with 20-inch radial bowl and radial wave reflectors and series socket.

Cat. No.

- *600011C1 Radial Bowl Reflector with Type C Collar for Clip Attachment.
- †600011C2 Radial Wave Reflector with Type C Collar for Clip Attachment.
- *600011C9 Radial Bowl Reflector with Type G Collar for Clip or Adapter Attachment.
- †600011C10 Radial Wave Reflector with Type G Collar for Clip or Adapter Attachment.

*5 3/8 and 7-inch light center lamps.

†5 3/8-inch light center lamps.

L-M METAL CONVERTOLITE LUMINAIRE

This fixture consists of a metal hood and metal cast reflector, or radial reflector. The cast reflector is furnished in two sizes, a short type for multiple service, and a long type for series service. Four different types of hoods are available, adaptable to various types of mounting. Hoods are furnished for 1 1/4-inch pipe tap, unless otherwise specified. All 8-inch Holophane refractors may be used with this fixture. The advantageous feature of this unit is that it can easily be converted into a porcelain head type unit, for use on high voltage series circuit, by merely attaching a porcelain head type unit between the hood and cast or radial reflector.

Cat. No.		
Mogul Multiple	Series	Description
602016C1	With 20-inch Bowl Reflector
602016C2	With 20-inch Wave Reflector

L-M STREET LIGHTING

L-M SPHEROLITE LUMINAIRE

The Spherolite Luminaire with Fluted Alzak Aluminum reflector increases lamp efficiency — gives more light without increasing lamp size. Light is directed to the street and the concealed light source eliminates glare. Light weight — weather-proof, dust-tight construction — detachable glassware for easy replacement in the field, all these quality features lower the maintenance cost.

Designed for use with lamps up to and including 575 watts or 10,000 lumens. Available with a choice of controlled light patterns, a choice of glassware holders and wide selection of internally and externally wired hoods for series or multiple circuits, and a selection of porcelain heads.

Illustrated here is the Spherolite Luminaire with inner wired metal head and V-band glassware holder. Furnished with series receptacle

and recommended for use on 5000-volt series circuits or less. Furnished with multiple socket where desired to standardize on one size hood for a complete system.

For Series Operation

Cat. No.	Description
603800 C4	With Globe only, Symmetric light distribution. IES Type V. V-Band Glassware Holder.
603800 C5	With B-way Refractor and Deflector, Asymmetric. IES Type III. V-Band Glassware Holder.
603800 C6	With Globe and Deflector, Asymmetric. IES Type IV. V-Band Glassware Holder.

For Mogul Multiple Operation

603800 C10	With Globe only, Symmetric light distribution. IES Type V. V-Band Glassware Holder.
603800 C11	With B-way Refractor and Deflector, Asymmetric. IES Type III. V-Band Glassware Holder.
603800 C12	With Globe and Deflector, Asymmetric. IES Type IV. V-Band Glassware Holder.

Open type reflector attached to the inner wired high-voltage Spherolite metal head. Furnished with wet process porcelain series receptacle and recommended for 5000-volt series circuits or less. Produces IES Type V symmetric light distribution.

Cat. No.	Description
602008 C4	With Alzak Aluminum Reflector

L-M STREET LIGHTING

L-M SPHEROLITE LUMINAIRE

Spherolite Luminaire with Metro-lite porcelain head and pressure latch glassware holder.

Furnished with series receptacle and recommended for use on straight series circuits of 11,000 volts or less.

Cat. No.	Description
600000 C1	With Globe only, Symmetric, IES Type V distribution.
600000 C2	With B-way Refractor and Deflector, Asymmetric, IES Type III distribution.
600000 C3	With Globe and Deflector, Asymmetric, IES Type IV distribution.

L-M CONTROLITE SR. LUMINAIRE

The Controlite Sr. Luminaire is an ornamental unit with concealed light source, especially recommended for use on straight series circuits of 5000 volts or less with 4000 to 15000 lumen lamps, and on multiple street lighting circuits with 300 to 750-watt lamps. It is ideal for the efficient and aesthetic lighting of the boulevards and business districts of larger cities.

This luminaire controls the light scientifically with an Alzak Aluminum dome reflector for symmetric light distribution and with an additional Alzak Aluminum deflector for asymmetric IES Type IV light distribution. In addition to the rigid suspension type illustrated and listed, luminaires are available with ornamental suspension type or adjustable heads.

300-750 Watt Lamps		
Cat. No.	Type	Distribution

R & S UNDERWATER LIGHTING FOR SWIMMING POOLS

Cast Bronze Equipped with Alzak Aluminum Reflector and Clear Spread Light Lens

To insure against shock due to accidental grounds or short circuit, means are provided for effectively grounding all metal parts.

REMOVABLE WATER-COOLED TYPE

For any pool where it is inconvenient or uneconomical to drain the water for relamping, these adjustable water-cooled units are particularly suitable.

Relamping is accomplished by releasing the sur-
leasing the sur-
leasing the sur-

plus cable in the pull box and removing the floodlight unit from the housing in the concrete wall.

Watts	Description	Cat. No.	Price Each
250-400	*Removable Floodlight only	2362	\$80.00
1000-1500	*Removable Floodlight only	2398	170.00
250-400	Housing for No. 2362	2362H	35.00
250-400	Housing for No. 2362	2362SH	45.00
1000-1500	Housing for No. 2398	2398H	75.00
-----	Cable Box for No. 2362 or 2398	2363	28.00
-----	Trunion Plates (Set of 2)	2362TP	7.00
-----	Support Bracket	2362B	3.00

*Equipped with 16 ft. of heavy duty cable.

FRONT RELAMPED TYPE

This flood-light is used in pools which are drained frequently or at regular intervals. At such times a burned out lamp may be replaced by the removal of the front bezel.

Watts	Description	Cat. No.	Price Each
250	Floodlight only	2360	\$75.00

BACK RELAMPED TYPE

Indoor pools are usually constructed with a passageway or space behind the pool walls. These floodlights are specifically designed for this type of pool construction. To relamp these units the back cover plates are taken off by the removal of the wing nuts.

Watts	Description	Cat. No.	Price Each
250	Floodlight only	2364	\$95.00
400	Floodlight only	2365	100.00
1000-1500	Floodlight only	2422	250.00

Lighting location layout for illuminating a particular pool will be prepared without obligation.

Lamps are not furnished with fixtures. Type G "Floodlight Service" lamps should be used.

Conduit and drain connections not furnished. Drawing showing recommended method of installing floodlights furnished with each job.

R & S WATERTIGHT FIXTURES

FOR FOUNTAIN ILLUMINATION

Reflector Type Fountain Light

No. 2303

No. 2303 and 2417 for fountains, small pools and lily ponds. No. 2096 is similar to No. 2303 but made of aluminum for fish ponds.

Description	Cat. No.	Price Each
100 watt, bronze	2303	\$25.00
100 watt, aluminum	2096	33.50
150 watt, bronze	2417	40.00

GLOBE TYPE FOUNTAIN LIGHT

The flared lip globe type fountain light is designed for installation in small pools and fountains for general illumination of water.

No. 2369

Watts	Overall Height	Cat. No.	Price Each
25	5 3/4"	2366	\$10.00
100	7 3/4"	2367	12.00

200	9 3/4"	2369	18.00

STEP LIGHT FOR LANDSCAPE ILLUMINATION

Designed to illuminate steps, terraces, entrance gates, patios, etc. Bronze construction eliminates corrosion. Arranged for flush mounting and supplied with diffusing glass panels which re-directs the light downwardly. Statuary bronze, standard finish. Other finishes available.

Price, No. 2090 (Max. size lamp, 100-watt) ..\$25.00

CURB LIGHT

For installation along drive-ways, catwalks and terraces. Equipped with fresnel lens which gives a wide horizontal beam of light, eliminating any tendency of light being thrown upwardly on the surrounding landscape.

Constructed entirely of cast bronze with all external parts brush bronze finish. Other finishes are available.

Maximum size lamp, 60 watt.

Price, No. 2092.....each \$20.00

SEYLER POLE LINE HARDWARE

Hot Galvanized

U-THRU SECONDARY RACKS

0378-2768

Heavy U-Thru Secondary Racks have points pressed from 12 gauge steel formed so the smooth, round side of points are inside, toward the line wire. The rack back is pressed from 9 gauge steel and is 3½ inches wide. Extension to center of insulator bolt is 4 inches. Insulator is No. 255.

Light U-Thru Secondary Racks are constructed on the same principle as the Heavy Type except that the backs and points are pressed from 12 gauge steel and insulators are smaller, No. 0606 Insulator being standard equipment. Exceptional strength is provided for a light rack, the "U" through principle with its advantages being a feature of this rack. Extension to center of insulator bolt: 6 and 12-inch spacing, 3½ inches; 8-inch spacing, 4¼ inches.

4	8	3768	32½	1029	0048	29½	989

SECONDARY RACKS WITH EXTENDED BACKS

The light forged type secondary racks are made of one-piece back to which drop forged steel points are riveted and electrically welded. For use on buildings or for light secondary runs they have ample strength and rigidity. No. 0606 Insulators are standard.

Heavy type racks are also made with extended ends for pole mounting; in all other respects they are identical with the 1834 Series heavy type secondary racks. These racks may be completely assembled on the ground and sent up the pole complete. The extended back gives the lineman free access to the mounting holes thereby reducing installation time to a minimum. Insulator No. 255 is regularly furnished with these racks.

HEAVY TYPE SECONDARY RACKS

No. 2834

Seyler heavy type secondary racks are designed for secondary network duty where relatively heavy loads may be expected. The back is heavy pressed steel, points are drop forged steel, riveted then electrically welded to the back. Insulator bolt is made of ⅝-inch high carbon steel. Center mounting holes are 1½ x 1½ inches and side mounting holes are ⅞ x ⅞ inch. Extension to center of bolt hole, 4 inches; to center of outer wire groove, 4⅞ inches. Insulator No. 255 standard.

JOSLYN POLE LINE MATERIAL

Hot Dip Galvanized

HEAVY SERVICE SECONDARY RACKS

These racks are designed for the heaviest secondary service loads. The rounded back fits snugly to the pole and provides a broad bearing surface. The backs are made of 1/8-inch open hearth steel and the racks are hot dip galvanized with the greatest of care to prevent rough spots which might damage the insulation on the wire.

SCREW TYPE ANCHORS

The Screw Type Anchor has a forged eye with 3 circular grooves. When used with a single guy, the load is centralized in the center groove; used with 2 guys the load is divided uniformly on the outer grooves. The eye will accommodate a 1¼-inch bar used to twist the anchor into the earth.

GUY ATTACHMENTS

No. J6505

No. J6500

No. J6502

These Guy Attachments are all sturdy enough to shear the bolts used to fasten them to the pole.

Two-bolt attachments such as the No. J6505 are used on steep guys. Wherever possible, use these attachments under the head of a machine bolt. When used under the nut where the load bears on the threaded portion of the bolt, there will be some loss in the shearing strength of the bolt.

JOSLYN POLE LINE MATERIAL

COPPERWELD GROUND RODS AND GROUNDING WIRE CLAMPS

Copperweld Ground Rod is non-rusting. Its heavy exterior layer of pure copper is inseparably molten-welded to the steel core, assuring dependability and long life.

The rod is rigid and easy to drive. The core, of specially selected steel, provides "stiffness" sufficient for driving in any soil.

The Clamps eliminate the need for soldered connections and provide dependable electrical and mechanical connections between the grounding wires and the ground rods.

Wood Screw Threads

The wood screw threads on small lags will be found a great improvement over the ordinary thread. These small screws are generally used for the attachment of various brackets to residence walls. The sharp wood screw threads are easier to start into the wood and much less liable to split the wooden walls.

WOOD BRACKETS

Joslyn Wood Brackets are manufactured from oak, thoroughly seasoned and dried, which eliminates shrinkage after the bracket is installed. The top or threaded portion is accurately turned to size and the threads are cleanly cut. All brackets are threaded four threads to the inch, tapering 1/8 inch, to one inch in length.

GUY CLAMPS

No. J1061

No. J929

No. J1033

No. J1030

No. J1061 clamp is furnished with a special square head bolt which also has a square under the head. This square under the head prevents the bolt from turning while being tightened.

The No-Slip Groove Clamp has rifled grooves rolled to fit the lay of stranded guy wire. It is standard with many power companies. Grooves will accommodate $\frac{1}{8}$ and $\frac{3}{8}$ -inch 7-wire left hand lay strand.

Cat. No.	Style Clamp	For Strand Size	Lgth. In.	Std. Pkg.	Wt. Lbs. Per 100

TUBASE GUY CLIPS

Type A

Type B

Made of drop forged steel. The two square shouldered bolts are a press fit in the square holes, making a rigid assembly; two clamping members, two nuts.

Type A is standard, type B can be had on special order. This clip may be installed either way on the strand. It is the only clip which develops the full strength of the wire.

JOSLYN GALVANIZED STEEL STRAND

Galvanized Steel Strand used in pole line construction is made in the following grades:

- Standard Strand, single or double galvanized.
- Siemens-Martin Strand.
- High Strength Strand.
- Extra High Strength Strand.
- Specification and Utilities Strand.

All strand is galvanized by the most modern methods. Rigid inspections and manufacturing controls insure the highest quality of steel strand and uniformity of zinc coatings.

Hot dip galvanized strand is produced by an entirely new process in which a stream of molten zinc flows over the wire in a hermetically sealed box. The resulting coating is free of the con-

taminations present in coatings produced by older methods.

Electrolytically galvanized strand is coated by the Bethanizing process which produces a zinc coating of unusually high purity. Heavy thicknesses of zinc, as listed below, are possible with this method.

ACKERMAN-JOHNSON TOGGLE BOLTS

For Fastenings to Tile, Hollow or Thin Walls, Sheet Metal, etc.

Spring-Wing toggle bolts are of latest pattern and strongest possible construction.

All sizes listed are threaded full length with American standard machine screw thread.

To determine shortest usable length add thickness of work and of wall plus $\frac{1}{2}$ the spread of wings plus $\frac{1}{4}$ -inch.

Orders should specify the style of bolt, its diameter and length.

Also furnished with special finishes, or in brass or with steel head and brass bolt. Prices on request.

When ordering Toggle Screw Anchors, please specify from the first three columns.

SETTING TOOL

The Toggle-Screw-Anchor is easily "set" with this speedy but inexpensive tool.

ACKERMAN-JOHNSON EXPANSIVE SCREW ANCHORS

For attaching fixtures or wiring to any hard surface as brick, concrete, stone or marble, slate, etc.

Anchor Nut

Expansive Sleeve

Anchor Assembled

Consists of a deep nut of conical design with lead-alloy expansible sleeve; factory assembled to be handled as one piece. Threaded for machine screws or bolts.

Operation

The sleeve expands over tapered formations of the nut against all sides of hole, giving perfect holding contact thruout its length and circumference. These anchors are installed completely before the work is attached. When set in good masonry their holding power will exceed the tensile strength of screws or bolts to be used with them. For any diameter of screw or bolt, specify the corresponding size and anchor from the first column of list.

Anchor Installed

Cross section of anchor installed with work attached.

PILOTTED SETTING PUNCH

Included without additional cost in each box of anchors.

ACKERMAN-JOHNSON STUD TYPE EXPANSION BOLTS

For fastening to concrete, brick, stone, etc.

With Single Expansion Unit

With Two Expansion Units

The stud type expansion bolt (single) consists of bolt with special, tapered head, a lead-alloy expansible unit and nut. When installed with tool shown below the threaded end of bolt protrudes and fixture may be secured with nut.

When set in good masonry the holding strength of single unit is about equal to the tensile strength of bolt.

Bolt installed; Expansion completed, and fixture attached.

However additional units may be used on the larger sizes for extra heavy duty or where the greatest possible safety is desired as for anchorage of heavy power equipment, street lamp or signal standards, etc.

*Indicates diameter of lag screw with which the shield is used. The size of shield shown is outside diameter and indicates size of drill required. Price is for shield without lag screw.

When no length is specified on orders, Long Standard Shield will be furnished.

FIBRE ANCHORS FOR USE IN ANY MATERIAL WITH WOOD OR LAG SCREWS

Holds Screws Fast

core, the threads of the screw do not cut the fibres of the plug, but instead thread the metal core, making it possible to unscrew and replace the screw.

The fibre construction of the Rawlplug being flexible permits the plug to conform to any irregularities of the hole under compressive action of screw. Thus the entire length and circumference of plug grips the full surface of hole. Because of this "elastic compression" shock and vibration have no effect on the gripping power of Rawlplugs.

They work equally well in any material: wood, glass, masonry, plasters, slate, rubber, marble, tile, brick, concrete, or metal. Unaffected by moistures, temperature, insects, fungus, vibration, or shock.

*For 1/4" Lag Screw use No. 14 or 16 Rawlplug.

†For 1/2" Lag Screw use No. 20 Rawlplug.

▲For 1/2" M/T and 1/4" 3/8", 1/2" R/T Rawl-drills use No. 20 Holder.

†Prices quoted upon request for any size and length not shown above.

‡Standard Package contains one dozen boxes of Rawlplugs of same size and length or one dozen M/T or R/T Rawl-drills or 1/2 dozen Holders of the same size.

RAWLDRILLS

TYPES OF RAWLDRILLS AND ACCESSORIES

Machined Type (symbol M/T straight flute, R/T twist flute). Accurately machined to size from solid bars of high grade tool steel. Recommended when drilling holes for Rawlplugs, Rawl-Drives, and all types of expansion bolts.

Used in a tool holder when drilling by hand and in Rawl-Chuck when drilling by power hammer. Can be resharpened on any grinding wheel. Made to exact diameters.

STRAIGHT FLUTE
M/T (Machined Type)
Rawldrills

TWIST FLUTE
(R/T) Rawl-Twist Drills

RAWL-CHUCK

Made of chrome nickel steel accurately machined and heat treated for a severe service in all standard electric and pneumatic chipping hammers.

In ordering be sure to specify make of hammer and size, and if pneumatic whether round or hexagon barrel, and whether for No. 14, No. 20 or No. $\frac{5}{8}$ drill taper.

Rawl-Chuckseach \$8.00
Special tool steel ejector pin for chucks
(5" long)net each .90
Extra shank pins for Pneumatic Chucks.....net each 1.90

RAWL-GRIP

To Fit Standard Tool Holders

Made of live hard rubber in two sizes, easily applied to No. 14 and No. 20 Rawldrill holders. Gives safe, comfortable and firm cushion grip.

No. 14 (Fits No. 14 Holder).....\$2.25 each
No. 20 (Fits No. 20 Holder)..... 2.25 each

Forged Drills — Standard Type (Symbol S/T) for Hand Drilling. Made in sizes from $\frac{3}{8}$ " to 1 $\frac{1}{2}$ " inclusive. Enlarged handle eliminates shock to hand — makes drilling easier.

Rawl-Spiral Carbide Drill—Made in sizes from $\frac{1}{8}$ " to 1 $\frac{1}{2}$ " inclusive.

Taper Shank (Symbol T/S) Power Hammers.

No. $\frac{5}{8}$ Taper on Drills $\frac{3}{8}$ " to 1 $\frac{1}{2}$ " diameter inclusive.

No. 20 Taper on Drills No. 16 ($\frac{1}{2}$ " to $\frac{3}{4}$ " diameter inclusive).
No. 14 Taper on M/T Drills No. 6-14 inclusive.
Used in a tool holder when drilling by hand and in Rawl-Chuck when drilling by power hammer.

PAINE "SUDDEN DEPTH" CARBOLOY TIPPED DRILL BITS

WITH AUTOMATIC DUST EJECTOR

**FAST
ACCURATE
SILENT**

Fig. 365W

**HOLDS EDGE
MANY TIMES
LONGER THAN
ORDINARY
DRILLS**

Finest tool steel with Carboloy tip (Diamond-like hardness) — especially designed for expansion anchor installation.

The "Sudden Depth" Drills are equipped with automatic dust ejector — a thin durable wire wound around the shank that spirals the dust and dirt out of the hole when drilling. Holes are kept clean, permitting the drills to bite into concrete and masonry with maximum speed and less wear.

Use in any hand or portable drill (slow speed) — the harder the material the slower the speed. Can be used continuously without cooling agent — will not harm the most fragile material.

CUMMINS PORTABLE TOOLS

GENERAL UTILITY ELECTRIC DRILLS

Model 150-160-170-190— $\frac{1}{4}$ Inch Capacity

Capacity: $\frac{1}{4}$ inch in metal, $\frac{1}{2}$ inch in wood. Frame: die cast aluminum. Motor: Designed for operation on 115 volts, AC. No-load Speed: 2200 r.p.m.

Bearings: self-aligning Oilite bronze; ball thrust on chuck spindle. Gears: steel pinion integral with armature shaft, extra-wide chuck gear of tough alloy metal; precision-cut and fitted for quiet operation. Switch: single-pole, "on-or-off," Thumb-operated slide action. Bakelite button with non-slip grooving. Cord: 8 ft. rubber covered, with 2-prong rubber plug. Length: 10 inches overall. Weight: 3 lbs. Chuck: for Model 150 — Jacobs 1B geared chuck; for Model 160 — Jacobs Hex-Key chuck (chuck key for each model permanently attached to cord in Jacobs Rubber-Flex holder); for Model 170—B & M keyless chuck; for Model 190—Jacobs keyless chuck.

Model No.	Description	Shpg. Wt. Lbs.	Price Each
150	With Jacobs geared chuck.....	4	\$21.95
160	With Jacobs Hex-Key chuck.....	4	19.95
170	With B & M Keyless chuck.....	4	18.95
190	With Jacobs Keyless chuck.....	4	19.50

CUMMINS MODEL 151 DRILL STAND

For Model 150, 160, 170 or 190

Quickly converts Cummins Model 150, 160, 170 or 190 Drill into a handy and sturdy drill press. Fast clamping device for accurately holding the drill. Neoprene grip operating handle. Machine surface grey iron base. Three screw holes for bench mounting. Painted machine grey.

Drills to center of $7\frac{1}{2}$ -inch circle, with 3-inch vertical travel. $7\frac{1}{2}$ -inch maximum distance between chuck and table. $\frac{1}{8}$ -inch diameter solid cold rolled steel supporting column.

Price, Model 151 Drill Stand onlyeach \$12.95

Model No. 201 Drill Stand for No. 200, $\frac{1}{2}$ -inch Drill. Priceeach \$17.50

CUMMINS MODEL 195 POWER TOOL KIT

This 29-piece Power Tool Kit consists of the following: Cummins 190 Drill—115 volt A.C. Motor — 2200 r.p.m.; light strong aluminum die-cast housing; On-Off safety switch; $\frac{1}{4}$ -inch Jacobs chuck. 4-inch rubber backing pad; $4\frac{3}{4}$ -inch

lambswool bonnet; 6 sanding discs; 7 carbon steel twist drills; steel arbor and attachments (5 pieces); 3-inch cloth buffing wheel; 3-inch grinding wheel; 3-inch wire wheel brush; steel paint mixer; steel bench stand; sturdy steel chest.

Price, Model No. 195 Power Tool Kit.....\$21.95

CUMMINS PORTABLE TOOLS

No. 425 STANDARD DUTY $\frac{1}{4}$ -INCH DRILL

Capacity, $\frac{1}{4}$ -inch in metals, $\frac{1}{2}$ -inch in wood. Universal AC or DC motor, 115 V. standard; 220 volts special. Jacobs 7B

chuck. 2200 rpm standard. Ball and "Oilite" bearings mounted in proper position. Trigger switch with arc snuffers and lock for continuous operation. Equipped with 10 ft. 3-conductor cord with rubber plug and pig-tail for grounding. Length, 11 $\frac{1}{2}$ inches overall. Net weight, 4 $\frac{1}{4}$ lbs.; shipping weight, 6 lbs.

Price, No. 425 $\frac{1}{4}$ -inch Drill with Jacobs 7B Geared Chuckeach \$35.95

No. 200 STANDARD DUTY $\frac{1}{2}$ -INCH DRILL

This drill is ideal for precise production drilling in metal or wood. Dynamically balanced, full size, Universal AC-DC 115 V. motor; low weight (8 lbs.) for its hard hitting capacity; has auxiliary top handle. Momentary contact two-pole switch with automatic arc snuffers and release button. Diecast aluminum body. Anti-friction ball, roller and "Oilite" bearings; sealed lubrication. Helical cut alloy steel gears, heat treated for toughness. No-load speed 550 r.p.m. Shipping weight, 12 lbs.

Price, No. 200 $\frac{1}{2}$ -Inch Drill with Jacobs Geared Chuckeach \$42.95

No. 600 CUMMINS PORTABLE SAW With Bevel Base

Powered and engineered to provide outstanding performance. Base adjusts for depth and bevel cuts. Equipped with 6-inch blade, cuts 1 $\frac{1}{2}$ inches deep. Has die cast aluminum frame and universal AC-DC 115-volt motor. No-load speed, 4200 r.p.m. Ball bearings on armature and worm shaft; ball and roller on saw shaft. Precision cut steel worm, bronze wheel. Double-pole, momentary contact safety switch. Blower keeps line of cut clear of sawdust. Telescopic type safety guard with quick return feature. Base adjusts vertically for depth of cut from $\frac{3}{4}$ to 1 $\frac{1}{2}$ inches. Bevel cuts at 45° through lumber 1 $\frac{3}{4}$ inches thick. Has 12 ft. 3-conductor rubber covered cord with 2-prong plug and pigtail connector for ground. Length overall, 12 inches. Net weight 11 lbs. Equipped with one 6-inch combination blade, tube of lubricant, wrench. Shipping weight, 14 lbs.

Price, No. 600 Portable Saw.....each \$62.50

No. 020 steel carrying case available at extra cost of \$5.50.

RIDGID PIPE TOOLS

NO. 65R RATCHET PIPE THREADERS

No. 65R-P

Self-contained die stock, threads 1, 1¼, 1½ and 2-inch pipe. High speed steel chaser dies. One set of dies. Thumb lever releases dies for quick back-off. Handy stand-up feet.

Choice of two speedy mistake-proof workholders — no bushings. Automatic cam type — turn gauge ring to pipe size. Plate type — turn screws to size on plate.

Cat. No.	Description	Price Complete
65R-P	Ratchet with plate type Workholder	\$25.60
65R-C	Ratchet with Cam type Workholder	27.50
No. 65DRP. same as No. 65RP but with 2 handles, \$27.00. No. 65DRC, same as No. 65RC but with 2 handles. \$29.50.		

NO. 1R POSTER THREADERS

Strong steel and malleable construction. Thread 1 to 2-inch pipe with 4 sets of dies, all kinds of pipe and conduit. Same size, same number chaser dies are interchangeable. Thumb lever reverses ratchet, locks it for solid die.

Automatic cam type — turn gauge ring to pipe size. Plate type — turn screws to size on plate.

No. 1RC Poster

Cat. No.	Description	Price Complete
1R-P	Ratchet with Plate type Workholder	\$23.60
1R-C	Ratchet with Cam type Workholder	25.75
No. 1DRP Poster, 2-handle ratchet with plate type workholder, \$24.95; No. 1DRC Poster, 2-handle ratchet with cam type workholder, \$27.75.		

RIDGID THREADERS FOR SMALL PIPE

No. 00-R with Exposed Ratchet

No. 00-R with exposed ratchet, threads ⅛, ¼, ⅜, ½ and 1-inch pipe; No. 0-R with inclosed ratchet threads ⅛, ¼, ⅜, ½, ¾ and 1-inch pipe; No. 11-R with inclosed ratchet, threads ⅛, ¼, ⅜, ½, ¾, 1 and 1¼-inch pipe; all with convenient carrier.

31-A	Threads ½, ¾, 1-in. pipe	10	11.50

HEAVY-DUTY PIPE CUTTERS

No. 1 Heavy-Duty Cutter

Extra cutting power comes from the heat-treated blade, assembled in a steel-bushed hub; tough and thin, it rolls through all kinds of pipe. Extra rugged heavy-duty cutter wheels also available. The heavy-duty cutter with powerful malleable frame is made to cut true, each one tested and guaranteed. Trench-type heavy-duty cutter Nos. 42 and 44 with 4 cutter wheels and short handle for cutting in close quarters. All cutters can be made 3-wheel.

Cat. No.	Description	Price Each
1	Heavy-duty, ⅛ to 1¼-in. capacity	\$ 5.80
2	Heavy-duty, ⅛ to 2 -in. capacity	7.75
3	Heavy-duty, 1 to 3 -in. capacity	13.00
4	Heavy-duty, 2 to 4 -in. capacity	26.00
6	Heavy-duty, 4 to 6 -in. capacity	38.95
42	Four-wheel pipe cutter, ½ to 2-in.	9.10
44	Four-wheel pipe cutter, 2½ to 4-in.	33.00

COPPER AND BRASS TUBING CUTTER WITH ROLLS

This cutter rolls quickly, easily and cleanly through copper, brass or aluminum tubing and thin wall conduit. Rollers smooth the tube, ready for soldering.

Compact, light, strong; always cuts true. Handy integral reamer that saves time. Wheel well protected from damage in tool kit. Razor-edge cutter wheel of alloy steel gives many more quick clean cuts per wheel.

Cat. No.	Description	Price Each
000	⅛ to 1-in. capacity (O.D.)	\$2.15
00	⅜ to 1½-in. capacity (O.D.)	2.45
0	½ to 2½-in. capacity (O.D.)	4.45

RIDGID PIPE TOOLS

BENCH YOKE VISES

Equipped with integral pipe rest and pipe bender. LongGrip jaws to protect polished pipe are furnished in sizes up to 4-inch capacity.

RIDGID LONGRIP PIPE REAMER

Above — Reamer Unit
Below — Reamer and ratchet handle complete

Because of the long taper of this reamer, it cuts burr cleanly from the inside of pipe or conduit with least possible effort—practically no pressure required. Does not reduce wall of threading end nor flare or split pipe.

Furnished complete with ratchet handle; or reamer unit may be purchased separately for use in Ridgid No. 00-R small ratchet die handle.

BLACKHAWK HYDRAULIC PORTO-POWER EQUIPMENT

S-34 BLACKHAWK S-34 HYDRAULIC THIN-WALL CONDUIT BENDER

Price of S-34.....each \$203.40
Price of S-35.....each 128.00

The new Blackhawk S-34 handles thin-wall conduit (electro-metallic tubing) in sizes of 1¼ and 2 inches.

It consists of the S-35 assortment of attachments and the S-71 hydraulic unit. Owners of the S-34A Bender need only buy the S-35 assortment to handle thin-wall conduit. Likewise, owners of the S-36 Bender need only purchase the RC-159 10-ton ram and the S-35 attachment assortment to bend thin-wall conduit.

S-34 offers such exclusive advantages like remote-control for more accurate bends — all directional operation to use ram and bending frame at any angle or plane — plus the extra utility of using the hydraulic unit as jack.

Furnished in durable wooden kit.

Contents of S-35

Part No.	Description	Qty. in S-35	Price
Z-680	1¼-inch Shoe (radius 7¼ inch).....	1	\$16.00

Note: S-35 is shipped in shipping container only — if portable chest is desired in addition, specify 19568 chest.

PORTO-POWER HYDRAULIC KNOCK-OUT PUNCHES

Punches openings up to 4½ inches for conduit in the toughest conduit boxes, troughs, panels, etc, with tons of smooth, hydraulic, remotely controlled power. No more swinging of heavy, bulky wrenches — no more loosened boxes — no more shaky set-ups — no more cramped quarters — no more sudden breaking through to throw user off balance. Porto-Power Knock-Out Punches are safe, sure and speedy.

SB-40 ASST. Offers six conduit opening sizes of ½, ¾, 1, 1¼, 1½ and 2 inch. SB-40 includes six knock-out punches, five attachments, RC-426 hollow ram and case. See note below.....\$93.50

SB-41 ASST. Offers ten conduit opening sizes — same range as in SB-40 and 4 larger sizes of 2½, 3, 3½ and 4 inch. Includes ten knock-out punches, five attachments, RC-426 hollow ram and case. See note below.....\$185.00

SB-44 ASST. Consists of the SB-43 hydraulic unit and six attachments to convert wrench-operated punches to hydraulic power..... \$99.90

SB-43 Unit includes P-76 pump, Z-913 hose and RC-426 hollow ram. Is the hydraulic unit in assortment SB-43 (not shown).....\$90.00

Note: The Porto-Power P-76 Pump and Z-913 Hose which connect to the RC-426 Ram, are not included in the above sets because electrician owning a Blackhawk S-71 or -78 unit already have this equipment. If you don't own the S-71 or S-78, then purchase the P-76 Pump and Z-913 Hose in addition to the SB-40 and SB-41. If electric operation is desired, specify the P-182 Pump.

SB-40

IDEAL FISH TAPE REELS AND PULLERS

Standard Size

Junior Size

Invaluable for building construction and industrial work. Reel serves as handle to give firm grip in pulling on fish tape.

Saves 50 per cent of the workman's time. Keeps tape fully protected, coiled ready to use.

Nine stock sizes of complete Fish Tape, Reels, and Pullers.

Cat. No.	Length and Size Tape	List Each
31-007	50 ft. $\frac{1}{8}$ x .045 ($\frac{3}{8}$ ")	\$3.40

31-083	Fish Tape Ball87

IDEAL COIL-FLEX FISH TAPE

For all types of conduit — including aluminum. The Ideal Coil-Flex is extremely flexible; can be pushed or pulled with little effort through any and all bends allowed by the electrical code. Its round surface slides through any type of conduit far more easily than flat tape. Positively prevents cutting or damaging of aluminum. Ends are smooth and round to avoid catching or snagging.

The Coil-Flex consists of a 25-ft. length of steel spring $\frac{1}{2}$ inch in diameter with a rustproof inner steel cable. A male fitting on one end and a female fitting on the other makes it easy to join together two or more lengths for jobs requiring a longer tape. Easy on the hands, it gives a safe, positive grip. Every Coil-Flex is factory inspected and tested at 400 pounds pull.

Price, No. 31-081 25-ft. length.....each \$10.20

BURBANK ELECTRICAL PRODUCTS

B.E.P. FISH TAPE PULLER

The B.E.P. Puller snaps on or off the tape instantly. Its gripping mechanism permits the Puller to slide easily on the tape, then automatically grips the tape when the hand draws backward in a pulling motion. It is easy on the electrician's hands. Fits any fish tape. Makes a hard pull easy. Packed 10 in a box.

Price, No. 108 B.E.P. Fish Tape Pullereach \$1.95

B.E.P. FISH TAPE REEL

Stores 100 feet of fish tape and stores it on the inside. A real time saver, its entire load can be coiled and uncoiled in a jiffy — as easy to pay out as a coil of wire. Saves the electrician's hands. One in a box.

Price, No. 114 B.E.P. Reel, (14 inch for $\frac{3}{8}$ or $\frac{1}{4}$ -inch tape).....each \$2.25

N.E. BEND SNAKE LEADER

The famous N.E. Bend Snake Leader steers the fish tape smoothly around any bend; flips easily out of junction box. Will pull over 750 lbs.; can pull as many as seven wires. No jamming or forcing. Packed 10 in a box.

Price, No. 101 N.E. Bend Snake Leadereach \$2.75

BURBANK ELECTRICAL PRODUCTS

B.E.P. KIT

B.E.P. KIT

The B.E.P. Kit consists of the N.E. Bend Snake Leader, 100 feet of fish tape, and the B.E.P. fish tape Reel. The entire load of the Reel can be uncoiled in a jiffy — as easy to pay out as a coil of wire — and just as easy to reel in.

Price, No. 212 B.E.P. Kit.....each **\$7.85**

(Includes N.E. Bend Snake Leader, 100 feet 1/8x.060 tape and 12-inch reel.)

KLEIN TOOLS

NO. 245-W OBLIQUE CUTTING PLIER

This tool has two "W" shaped notches at back of knives. Designed for removing acetate cellulose

insulation from .050 and .058 wires used on telephone distributing frames, etc. Wt. per doz. 3 lb.

Price, No. 245-W, size 5-inch.....each \$6.50

NO. 245 OBLIQUE CUTTING PLIER

This plier measures exactly 5 inches in length. It is slightly smaller in all dimensions than the 202-5 and will be found particularly convenient as it can easily be carried in vest pocket.

Weight per dozen, 3 pounds.

Price, No. 245-5, size 5-inch.....each \$5.70

NO. 202-SW OBLIQUE CUTTING PLIER

This plier is the all - purpose cutting tool for telephone installation and maintenance work. The "W" notches will slit acetate cellulose

and other insulation from wires up to .058 O.D. A stripping hole .052 diameter is provided in blades. Sleeve openings in handle.

Weight per dozen, 3 3/4 pounds.

Price, No. 202-5-SW, size 5 1/2-inch.....each \$7.00

NO. 202-5-V OBLIQUE CUTTING PLIER

(Volute Spring—Narrow Head)

This is the regular No. 202-5 plier but fitted with volute spring for bench work.

Price, No. 202-5V, size 5 1/2-inch.....each \$8.00

NO. 220 "AUTO" OBLIQUE-CUTTING PLIER

Made especially for automotive mechanics and others who demand a

high quality plier of this pattern. Knives are close cutting and carefully matched for their full length. The "Handform" handles provide full leverage and comfort for continual use. Weight per doz., 7 pounds.

Price, No. 220-7, size 7-inch.....each \$6.50

KLEIN TOOLS

NO. 301 LONG NOSE PLIER

Without Cutters

Perfected to meet a long-felt want of electrician and general mechanic. For

switchboard, telegraph and telephone work, armature winding, etc.

NO. 303-6 LONG NEEDLE NOSE PLIER

Has all the features of No. 301 series, except that the points of the nose are of the needle point pattern.

Polished head and temper-blued handles. Standard package 6. Weight per dozen, 3 3/4 pounds.

Price, No. 303-6, size 6-inch.....each \$5.00

NO. 217 CHAIN NOSE PLIER, SIDE CUTTING

Similar to No. 317-6 but with side cutting knives. The knives are carefully matched and cut true over their entire length. Made in one size only. Weight per dozen, 3 1/2 pounds.

Price, No. 217-6, size 6-inch.....each \$6.00

NO. 313 HEAT-COIL PLIER

Particularly adapted for the removing of heat coils from switchboards and telephone terminals,

the points of the nose being shaped to fit the coils. This tool is also serviceable in removing caps from batteries or from binding posts, as well as holding any cylindrical object.

Weight per dozen, 3 3/4 pounds.

Price, No. 313-6, size 6-inch.....each \$5.20

CHAMPION DeARMENT TOOLS CHANNELLOCK SELF-GRIPPING PLIERS

The Channellock design provides a quick, positive grip when pressure is applied to only one handle. The greater the pressure, the tighter the grip. The exclusive tongue and groove joint makes a plier far superior to the conventional type.

No. 407

This plier is primarily intended for battery work. The self-gripping feature insures a positive grip on acid corroded and mutilated terminal nuts. Polished steel finish. Length, 7 inches; capacity, $\frac{1}{8}$ to $\frac{5}{8}$ inch. Packed 6 to a carton; weight per dozen, 6 $\frac{1}{4}$ lbs.
Price, No. 407.....each \$2.30

No. 410

A heavy-duty self-gripping plier which will hold work of any shape with a positive pipe wrench grip. Polished steel finish. Length, 9 $\frac{1}{2}$ inches; capacity, $\frac{1}{8}$ to 1 $\frac{1}{8}$ inches. Packed 6 to a carton; weight per dozen, 12 $\frac{1}{2}$ pounds.
Price, No. 410.....each \$3.20

No. 417

A heavy-duty plier with a gripping power many times greater than the ordinary slip-joint plier. Polished steel finish. Length, 7 inches; capacity, $\frac{7}{8}$ inch. Packed 6 to a carton; weight per dozen, 6 $\frac{3}{4}$ pounds.
Price, No. 417.....each \$2.30

No. 420

The wide range of adjustments of the No. 420 Pump Plier makes it adaptable to a multitude of uses. The adjustment eliminates wear on the joint bolt and greatly prolongs the life of the tool. Five adjustments. Length, 9 $\frac{1}{2}$ inches; capacity, $\frac{1}{8}$ to 1 $\frac{1}{8}$ inches. Packed 6 to a carton; weight per dozen, 9 pounds.
Price, No. 420.....each \$2.90

CHAMPION DeARMENT TOOLS CHANNELLOCK SELF-GRIPPING PLIERS

This ignition plier incorporates the Channellock adjustment feature in order to eliminate wear on the joint bolt and lengthen the life of the tool. A midjet plier. Polished steel finish. Length, 4 $\frac{1}{2}$ inches; capacity $\frac{1}{2}$ inch. Packed 6 to a carton; weight per dozen, 1 pound.

Price, No. 424.....each \$2.00

No. 99 UTILITY CLIPPER

Drop forged. Has few parts: two jaws, two handles, and four bolts. Angle of the jaws throws handles above a level plane so that any position of work is accessible. Tool is designed with wide open diagonal jaws for cutting battery terminals. Also makes an excellent clipper for small bolts, wire, etc.

- No. 99—Length, 15¾ inches; weight per dozen, 30½ poundseach **\$5.00**

I. X. L. CHAIN PLIER

Opening Link

Closing Link

For opening and closing electrical chain links. The nose of the plier is used for opening the links, while the notches in the handle close the links. The double nose provides for opening large or small links. Two notches in the handle provide for closing large or small links. A coil spring in handle keeps the points together affording easy insertion in the link.

The plier is 7 inches long, made of malleable iron, has a perfect grip and is very powerful. Attractively finished in copper bronze. Packed one dozen in an attractive counter display box. Weight per dozen, 7¼ pounds. Weight per case (1 gross pliers) 105 pounds.

Price, IXL Chain Plier.....each \$0.75

EZ CABLE RIPPER

For Non-metallic sheathed cable. Lays open cable without scoring the conductors. Designed especially for the new, smaller diameter cables.

Cat. No.	Unit Pkg.	Std. Pkg.	Pkg. Wt.
9020-EZ	50	100	4½

IDEAL CABLE RIPPER AND WIRE GAUGE

This ripper cuts cleanly, easily and quickly. Just the tool for use on nonmetallic sheathed duplex cable or lead-covered cable. The case-hardened cutting point gives long service.

Can also be used for ripping outer sheathing of other cords, lead cables, etc., where outside diameter is ⅝ in. or smaller.

Price, No. 45-018.....each \$0.57

IDEAL STRIPMASTER WIRE STRIPPER

The only hand type Wire Stripper with automatic single-squeeze operation. Exclusive automatic feature holds jaws open after stripping to permit removal of wire and prevent crushing. A single squeeze of the handles strips wire clean and bare up to a full ⅞ inch. There is no nicking or fraying of wire.

The narrow span between the handles and a light weight of only 10 ounces assure a comfortable grip. Simple design and sturdy construction make it practically abuse-proof. Blades are specially hardened for long service and can be changed with the removal of only two screws.

Strips any of the following wire: Building, fixture or telephone wire — lamp, portable equipment and appliance cords. Automotive wiring, radio, instrument wire and cable — switchboard and aviation wire, also FM and TV down lead wire.

Cat. No.	Wire Gauge	Price Each	Extra Blade No.	Price Per Pair

45-094	16 or 18 or FM and TV down lead wires	7.00	L-4437	1.47

*Strip only. No cutting edge.

Blades are interchangeable on all models.

IDEAL BX ARMOR CUTTER

Cuts BX Armor in one operation. Just open the jaws and snip. Jaws are formed to take BX cable of any make, two or three wire, No. 10 or No. 14. No adjustments are necessary. Cuts quickly and cleanly without injury to wire insulation.

Handy pocket size. Hardened steel cutting blade is removable for sharpening. Blade is also replaceable. Weight, only 12 ounces.

Price, No. 45-079 BX Armor Cutter.....each \$4.80

GREENLEE ELECTRICIAN'S BITS

No. 21 SOLID CENTER ELECTRICIAN
AUGER BITS

These auger bits have a solid center type of twist, and single cutter head of the extension lip pattern. Fitted with a coarse screw point for fast feed, and have one spur for outlining hole, which insures smooth boring.

Standard package, ½ dozen in box.

Sizes in 16ths. Price per dozen.

No. 900	\$2.85	\$2.95	\$3.10	\$3.25
No. 925		3.60		3.80

GREENLEE NO. 750 JOIST BORER

Makes the electrician's job of joist boring easier by combining the latest developments in design with a construction that is accurate and high grade.

The bit chuck runs smoothly in needle bearings and is sturdy enough to drive bits that are larger than those used in other types of borers. Equipped with heavy round-link chain and newly designed Idler Pulley Safety Guard that prevents injury to the operator's hand. The steel chuck drives bits up to 1¼ inches in diameter. Foot Rest for supporting frame on floor, and one 1½-in. No. 44 Short Unispur Auger Bit furnished as equipment with each machine.

NO. 735 KNOCKOUT PUNCH SET

No. 735

This set is furnished with a leather case in which the punches are regularly packed. The set consists of 4 punches for cutting 3/8, 1 1/8, 1 1/2, 1 3/4-inch holes for 1/2, 3/4, 1, and 1 1/4-inch conduit.

Improved Drive for 1/2-Inch Punch

To increase the length of service of the 1/2-inch Punch in cutting 3/8-inch holes in the heavier-gauge sheet metals, the No. 1387AV Drive Screw and No. 1388AV Drive Nut are available. These fit the standard No. AV121 Punch and No. AV122 Die for 1/2-inch conduit, as furnished with the No. 735 Set, and they take the place of No. AV322 3/8-inch Cap Screw.

NO. 737 KNOCKOUT PUNCH SET

This set is packed in a leather case, similar to No. 735, but it consists of only two punches for cutting 1 1/8 and 2 3/8-inch holes to take 1 1/2 and 2-inch conduit.

NOS. 738 AND 739 KNOCKOUT PUNCHES

Shown here is the No. 738 Punch. The No. 739 is of same design, but larger. By adding these two punches to Nos. 735 and 737 Sets, enlargements can be made for all sizes of conduit from 1/2 to 3-inch inclusive. The No. 738 makes a 2 1/2-inch hole for 2 1/2-inch conduit, and No. 739 makes a 3 1/2-inch hole for 3-inch conduit.

These two punches are not listed as a set, but are packed and sold individually.

No. 738

Price, No. 4024 Tool Pouch
.....each \$1.40

No. 4089 SKINNING KNIFE POUCH

This knife pouch is designed to hold the skinning knife as a safety precaution against personal injury, and is a means of preventing accidental damage to other tools or harness.

Weight 5 ounces. Shipping weight, per doz., 4 pounds.

Price, No. 4089 Skinning Knife
Poucheach \$1.00

BUCKINGHAM LINEMEN'S SAFETY EQUIPMENT

No. 5041 INSTALLERS' TOOL POUCH

Tool Pouch with one large pocket and one wing pocket.

Will hold a variety of small tools. 5½ x 9½ inches, it will fit on any belt up to 2 inches in width. Made of top-grade harness leather securely riveted and stitched. Used extensively by telephone installers.

Weight 7½ oz. Shipping weight per 12, 7 pounds.

Price, No. 5041
Installers Tool
Pouch.....each \$2.85

BUCKINGHAM LINEMAN'S WORK GLOVE

Made from genuine imported goat skin. They are soft and pliable and will dry out soft after becoming wet. Gloves are triple lock-stitched with hot waxed linen thread and have Davey tips and large reinforcements around base of thumb. They also have a heavy stiff cuff which affords maximum protection when climbing poles.

Standard glove No. 7158 has a 5 inch cuff, also available with a 7 inch cuff or wrist length No. 7300. Furnished in sizes 9, 10 and 11. In ordering specify size required.

Cover glove No. 7400 (for rubber gloves) available in medium and large sizes.

Prices on request.

BUCKINGHAM THREAD CLEANERS

Damaged threads of any size or pitch, on any type of bolt, can be reconditioned quickly and easily with these tools. They restore flattened, distorted or badly rusted, right- or left-hand threads, so that nuts can be removed or put on with ease.

These tools can be used by any mechanic, repairman or maintenance worker in the shop or in the field. Easily set and held to size by a single locking device on the knurled handles. Two types of blades are available for No. 6106 only — one set for threads as coarse as 6 to the inch or coarser, and the other for all finer threads.

Price, No. 30A (quart size)each \$9.20
 No. 25A (pint size)each 9.20
 No. 27 (quart, bottom fill).....each 9.90

NO. 206A BLOW TORCH

Powerful torch for professional users. Heavy improved burner develops high heat and gives superior performance in any weather. Automatic cleaning needle and jet-block may be easily replaced after long wear. Cool composition valve wheel. Highly polished seamless brass tank with trouble-free pump. Gasoline fuel.

Price, No. 206A (quart size).....each \$11.50

NO. 39A BLOW TORCH

Super torch for professional users. Develops large blue flame and operates perfectly in any weather. Sturdy construction. Wire cleaning needle and orifice block easily replaced after years of wear. Perfect combustion obtained from adjustable air syphoning tube. Drip cup conveniently filled through lower priming valve. Highly polished brass tank with trouble-free pump. Gasoline fuel.

Price, No. 39A (quart size).....each \$15.00

No. 92A BLOW TORCH—QUART-SIZE

Experienced precision workers in the factory and laboratory and on particular sweating and copper-fitting jobs insist on the Turner Double Jet burner of the 92A. Both jets function to produce a soot-free, pencil point "flame-within-a-flame" of terrific intensity, hot enough for light brazing. When idling, the lower jet produces a noiseless "lazy" flame that keeps the torch generated for instant action. For gasoline.

Price, No. 92A (quart size)each \$16.60
 No. 95A (pint size)each 16.60

EMPIRE ELECTRIC LANTERNS

No. 900 "FOCAL-RAY" LANTERNS

Exclusive "Focal-Ray" adjustment. Change the concentrated spot - beam to a flood light instantly, at the turn of the lens head.

Highly polished non-tarnishing reflector. "All-position" pivot base and handle. Beam the light in any direction. Sliding switch, wireless and waterproof. Comfortable, black plastic handle, non-tipping octagon base, channel uprights. Attractively finished in maroon baked enamel. Polished, electro-plated lens head and cover. Fittings bright plated.

Cat. No.	Std. Pkg.	Shpg. Wt. Lbs.	Less Battery
900	12	28	\$3.25

No. 890 "ADJUSTO-BEAM" LANTERN

Focusing made easy. Concentrated beam adjusted from spot beam to flood light by turning lens head. Swivel base permits directing the light to any angle.

Seamless, drawn steel body. Electro-plated, then green enameled. Trimmings and fittings bright plated. Waterproof, wireless, sliding switch. Parabolic reflector, highly polished, non-tarnishing.

Cat. No.	Std. Pkg.	Shpg. Wt. Lbs.	Less Battery
890	12	26	\$2.65

No. 924 "ADJUSTO-BEAM" LANTERN

Twin Switches. Light both bulbs at same time, or light separately. The "Focal-Ray" adjustment gives a spot or flood light at the turn of the lens head.

Black plastic handle, non-tipping rigid base. Positive adjustment in any direction with the "all-position" pivot base. Two tone gray finish with polished, electro-plated cover and lens head. Bright plated fittings. Seamless steel body.

Cat. No.	Std. Pkg.	Shpg. Wt. Lbs.	Less Battery
924	12	30	\$3.95

Note: All above Lanterns operate on 6-volt Lantern batteries, and use standard Mazda No. 502 or No. 27 bulbs. Spare bulbs can be carried in compartment in inside cover. All fully guaranteed and individually packed. Supplied with bulb, but less battery.

BURGESS LANTERNS

No. TW2 LANTERN

For general industrial use. Has a long powerful beam. Operates economically from No. 4F2H battery. Easy focusing with lens ring. Steel body, finished in baked-on enamel.

Price, No. TW2 Lantern, less Batteries\$2.85

BURGESS FLASHLIGHTS

CLIPPER—2-CELL FLASHLIGHT

Stream-styled maroon enamel and chrome. Pre-focused. Lock-off switch. Uses 2 size 2 cells and lamp No. PR2. Packed six on sales-making display card.

Price, No. 146 Flashlight, less cells.....each \$1.55

No. 148 2-CELL FLASHLIGHT

Sturdy all-metal construction, 2-cell flashlight. Durable maroon finish with sparkling trim. Pre-focused bulb. End cap. Uses 2 size 2 cells. No. PR2 lamp. Packed 25 in corrugated carton with eye-catching display card.

Price, No. 148, less cells.....each \$0.78

No. 248 5-CELL FLASHLIGHT

Ideal for outdoorsmen needing long beam and extra long life. Seamless brass barrel completely chrome plated. Prefocused for sure spot, garter clip, large head. Lock-off switch with flasher position. Uses five Burgess No. 2 cells and No. PR12 lamp.

Price, No. 248, less cells.....each \$3.70

No. 346 BABY TUBULAR

Baby tubular pre-focused light. Brass barrel with chrome and enamel trim. Slide switch. End cap. Uses 2 Burgess size 1 cells and No. PR4 lamp. Packed 6 on sales-making display card.

Price, No. 346, less cells.....each \$1.35

No. 92 PENLIGHT

Carry like a fountain pen. Maroon and chrome finish. Lock-off switch.

Price, No. 92 Penlight, less cells.....each \$0.83

RAY-O-VAC FLASHLIGHTS

Z21P 2-CELL PENLIGHT

Uses 2 No. 7R batteries and No. 222 bulb. Standard package 24; weight 2¼ lbs.

Price, No. Z21P Penlight, less batteries.....\$0.80

Z22B 2-CELL BABY SPOTLIGHT

Uses two 1LP batteries and No. PR4 bulb. Standard package 24; weight 6¼ lbs.

Price, No. Z22B Spotlight, less batteries.....\$1.60

Z22R 2-CELL SPOTLIGHT

Uses two 2LP batteries and No. PR2 or PR6 bulb. Standard package 24; weight 9¼ lbs.

Price, No. Z22R Spotlight, less batteries.....\$1.60

Z32R 3-CELL SPOTLIGHT

Uses three 2LP batteries and No. PR3 or PR7 bulb. Standard package 24; weight 11 lbs.

Price, No. Z32R Spotlight, less batteries.....\$1.95

Z33R 3-CELL SEARCHLIGHT

Uses three 2LP batteries and No. PR3 or PR7 bulb. Standard package 24; weight 21 lbs.

Price, No. Z33R Searchlight, less batteries.....\$2.25

Z53R 5-CELL SEARCHLIGHT

Uses five 2LP batteries and No. PR12 bulb. Standard package 12; weight 12¼ lbs.

Price, No. Z53R Searchlight, less batteries.....\$2.98

RAY-O-VAC FLASHLIGHTS

BR22 PREFOCUSED SPOTLIGHT

Has rubber end cap and hood and fibre barrel. Uses PR2 or PR6 bulb and two 2LP batteries. Standard package, 24; weight 11 lbs.

Price, No. BR22 Spotlight, less batteries.....\$1.60

G22 2-CELL PREFOCUSED SPOTLIGHT

Uses PR2 or PR6 bulb and two 2LP batteries. Standard package 24; weight 15 lbs.

Price, No. G22 Spotlight, less batteries.....\$2.60

RAY-O-VAC BATTERIES

RAY-O-VAC No. 2LP LEAKPROOF FLASHLIGHT BATTERY

Size "D" Leakproof cell—for standard sized flashlights. Ray-O-Vac Leakproof batteries require no dating because they stay fresh for years and years. They guarantee any flashlight regardless of make against sticking, plugging or corrosion from leakage. They last longer in actual use.

Price No. 2 LP Leakproof Flashlight Battery\$0.125

RAY-O-VAC LEAKPROOF No. 1 LP

Size "C" Leakproof cell—for baby or junior sized flashlight.

Price, No. 1 LP Leakproof Flashlight Battery\$0.125

RAY-O-VAC BATTERIES

RAY-O-VAC No. 941 LANTERN BATTERY

Tests by users prove the lowest possible cost per hour service. Laboratory controlled to maintain quality. Exceeds U. S. Government standards of service for this type of battery.

Standard on most railroads and wherever low service costs are vital.

Price, No. 941 Lantern Battery.....each \$0.80

RAY-O-VAC 7R PENLIGHT BATTERY

This battery is manufactured of highest quality ingredients and has been accepted as standard equipment by many manufacturers of original equipment using this size cell.

Price, 7R Penlight Battery.....each \$0.10

RAY-O-VAC No. 6 TELEPHONE BATTERY

Specially compounded mix for telephone service. High sustained voltage over long periods of time. Users acclaim economy and dependability.

Price, No. 6 Telephone Batteryeach \$0.65

BURGESS HEARING AID BATTERIES For Vacuum Tube Instruments "A" BATTERIES

1ES 2ZE 2ES TE

Every Burgess A Battery has been built to provide a maximum of operating economy for the hearing aid user. Packed in the familiar black and white stripes for instant identity of Burgess quality.

No. 1ES—Baby tubular size. 1½ volts. Size 1½ x ¾ inches diameter. Fits battery clips of all popular typeseach \$0.10

No. 2ES—Standard tubular, 1½ volts. Size 2½ x 1½ inches. Heavy duty mix affords users longer, economical serviceeach \$0.10

No. TE—Popular plug-in, 1½ volt A cell. Fits all standard pouches on most instruments. Light weight yet provides long, dependable service. Size 3¾ x 1½ inches.....each \$0.27

No. 2ZE—1½ volts. Two heavy duty penlight type cells. Brass cap terminals. For self-contained instruments. Size ¾ x 1½ x 1½ inches. Weight 1 ounceeach \$0.25

BURGESS HEARING AID BATTERIES

"B" BATTERIES

XX15E XX22E XX30E

Burgess hearing aid B batteries are made with an exclusive new process to give long, more reliable service on all types of hearing aids. Available in all popular sizes.

No. XX15E—22½ volt B. An ideal auxiliary battery for user's comfort. Equipped with standard 3-hole socket. Can replace any make battery of equivalent voltage. Size 1½ x ¾ x 3¾ inches. Weight each 4½ oz.....each \$1.45

No. XX22E—33 volt B. Designed to provide those who need only low amplification with a maximum of comfort and economy. Fits pouches of all hearing aid instruments. Equipped with standard 3-hole socket. Can replace any make of battery of equivalent voltage. Size 2½ x ¾ x 3½ inches. Weight each, 6 oz.....each \$1.65

No. XX30E—45 volt B. Most popular size with hearing aid users. Light in weight with maximum economy. Equipped with standard 3-hole socket. Fits pouches of all hearing aid manufacturers. Can replace any battery of equivalent voltage. Size 2½ x ¾ x 3¾ inches. Weight each 7 oz.....each \$1.90

WAYNE ELECTRIC WATER HEATERS

ROUND AND TABLE TOP MODELS—SERIES WR AND WT

Round Models in 20, 30, 40, 52, 66 and 82-Gallon Sizes
Table-Top Models in 30 and 40-Gallon Sizes

SINGLE OR DOUBLE HEAT ELEMENTS

10-Year Warranty on All Models Equipped
with Waynode Rod

Wayne heaters excell in long life and economy operating features. Popular sizes have ALL desirable features of higher priced heaters at no extra cost. Extra-heavy, electric-welded galvanized steel tanks. All bronze internal waterways. Pressure safety fitting on drain nipple. Cold water intake baffle. Hot water heat trap. 3/4-inch Fiberglas insulation. 100 per cent immersed heat elements. All models are available with single or double heat elements with or without interlocking thermostats to meet all utility and code requirements. Pressure relief valve may be installed on either cold inlet or outlet piping.

INFRA-RED BAKED WHITE ENAMEL EXTERIOR

Table-Top model matches kitchen appliances. Black recessed base provides toe space. All electrical and water connections are readily accessible under the porcelain top.

ROUND MODEL INSTALLS IN ANY BASEMENT, KITCHEN OR UTILITY ROOM

The sturdy steel-jacketed round model is beautifully finished in white enamel, trimmed in forest green to add beauty in any home.

Built to highest quality standards of carefully inspected, approved materials. NEMA standard, acceptable to all utility companies.

WAYNE GAS WATER HEATERS SERIES WHG—30 AND 40 GALLONS

Wayne Gas Water Heaters are constructed of extra-heavy gauge materials. The tank is copper-bearing steel, hot-dipped AFTER electric welding to insure completely protected tank head joints. Pure molten zinc is heavily applied for lasting tank operation. The jacket is rigid, cold-rolled cabinet steel for lifetime service.

This universally popular Wayne Automatic Gas Water Heater is beautifully finished in baked white enamel with forest green trim. Every ultramodern feature is included. Newest, instant-acting, adjustable thermostatic controls provide record gas economy and FAST heat recovery. The extra-size intake baffle spreads incoming water over the heated tank area for rapid heating. Extra-thick insulation keeps water hot. The single-port burner cannot clog. A balanced air-gas mixture is made possible with a Bunsen-type adjuster, providing a clean hot flame. Approved for natural, manufactured or mixed gas. When used with L-P (bottled) gas, 100 per cent shutoff safety controls should be installed.

Cold and Hot Connections at Top of Heater for Easy Piping

Inlet and outlet are 3/4-inch female connections flush with top of jacket, 8 inches apart, center to center. Pressure relief valve may be installed on "T" on either connection. Heat is self-leveling and self-ventilating with three formed bosses in base. Rate at 25,000 BTU/Hr. input with recovery capacity of 60 degrees rise at 35 gallons per hour.

MARKEL HEETAIRES

SERIES 195-196 PORTABLE FAN-GLO HEETAIRE

The first portable Heater with both kinds of heat. The Fan-Glo Heetaire does both — it gives warm comfort in a limited area first — the area of use — it produces and distributes quickly:

1. Abundant scientifically-reflected infra-red rays — to heat all the humans and furniture and walls in its rays quickly.

2. Abundant fan-forced heated air —

fan-forced to heat all air around the humans and the entire room quickly.

Two Heaters in One—There are two Neo-Glo Elements in the double action Fan-Glo Heetaire. One is mounted in front of a chromium reflector to provide radiant heat. The other element heats the cool air which the fan draws in at the base of the Heetaire.

High-baked enamel finish. Induction type motor for 50-60 cycles A.C. No radio interference. Size, 15 $\frac{1}{4}$ inches high; 9 $\frac{1}{2}$ inches wide; 12 inches deep. Wired: 6-ft. of approved cord and plug.

Cat. No.	Volts	Cycles	Watts	Car-ton	Approx. Shpg. Wt. Lbs.	Price Each

MARKEL HEETAIRES

SERIES 230 BUILT-IN WALL FAN-GLO HEETAIRE

The 230 Series Built-In Wall Fan-Glo Heetaire is the first recessed heater built that gives both kinds of heat — abundant infra-red rays plus abundant fan-forced heated air. (Construction and principle are exactly the same as the Portable Fan-Glo Heetaire.)

Highly polished Nuchrome. Ivory enamel, tan enamel finishes. Heetaire front, 12 inches wide x 18 inches high. Heetaire box, 10 $\frac{1}{2}$ x 15 x 3 inches. Wired, two elements and two switches. One element and fan can be shut off at user's convenience. Motor, 50-60 cycle A.C. only.

H233KT	240	55.00
2000 Watts		
235KT	120	57.50
H235KT	240	57.50

Thermostat and Heetaire are both separately tested and listed under re-examination service by Underwriters' Laboratories.

MARKEL HI-LO HEETAIRE SERIES 140

This powerful, quiet, lightweight portable Hi-Lo Heetaire produces and distributes heat quickly. Cool air passes around the high-quality, long-lived resistance coil wire element that operates at a low temperature, is heated and then fan-driven to heat

all the air around the humans in the room. With its 2-heat switch, model 145K2 operates at either 800 watts (LO) or 1320 watts (HI). Model 146K2 operates at either 1000 watts (LO) or 1650 watts (HI).

Hi-Lo Heetaires—2 Heats

Model No.	Watts	Volts A.C.	Switch	Price Each
146K2	1650/1000	115	Hi-Lo/On-Off	\$11.95

CUTLER-HAMMER PYROFLEX RANGE SURFACE UNITS

ELEMENTS FOR REPLACEMENT SERVICE

Bulletin 15150

Electric Range surface units with Pyroflex 2-way heat flow—the one outstanding development in range surface units since the advent of the rod type element — now available for replacement and modernization on all models of electric ranges.

Cat. No.	Watts	Volts	Diam. of Element	Price Each
15150-				
H61	1250	115-120	6"	\$7.00
H62	1250	230-240	6"	7.00
†H63	1250	†	6"	7.00
H81	2100	115-120	8"	9.00
H82	2100	230-240	8"	9.00
†H83	2100	†	8"	9.00

†Price of element includes one aluminum reflector pan packaged with element.

†Special unit for Frigidaire ranges — high wattage element 236 volts, low wattage element 118 volts.

STAINLESS STEEL ADAPTER RINGS

Required with each unit.

Cat. No.	Ring Diam., Inches	TO BE USED WITH PYROFLEX ELEMENT		Price Each
		Rated at	Size Inches	
15150-				
R63	7 7/8	1250 watts	6	\$1.50
R64	8 5/8	1250 watts	6	1.50
R65	9 7/16	1250 watts	6	1.50
R67	9 7/8	1250 watts	6	1.50
R69	10 7/8	1250 watts	6	1.50
R85	9 7/16	2100 watts	8	1.50
R87	9 7/8	2100 watts	8	1.50
R88	10 1/4	2100 watts	8	1.50
R89	10 7/8	2100 watts	8	1.50

To order complete unit consisting of element, pan, and ring, add ring "R" number to basic element number.

For example: Cat. No. 15150H61-R63 would cover a 1250 watt unit for 115-120 volts, 6 inches diameter with a 7 7/8-inch diameter ring.

RING APPLICATION DATA

Adapter rings should be selected to fit the type and size of range opening, per table below.

For 1250 Watt Unit

CASCO STEAM AND DRY IRON

Irons dry — irons with steam. Fully automatic, with super-accurate fabric dial that automatically delivers the right heat, the safe heat for both steam and dry ironing by simply dialing the fabric. Thermostat is accurate to within 15 degrees.

Water cannot rust it . . . steam cannot corrode it. Finest stainless steel insures extra years of trouble free ironing with crystal-clear water. New Flip-up to Fill-up top. No caps, no funnels. Fingers never touch hot metal. Distilled water unnecessary. Automatic seal acts as safety valve.

Casco exclusive internal baffle system prohibits spitting or dripping on fabrics and gives greater water capacity. Scorch-proof heel rest. It's tip-proof, yet actually suspends body of iron in air. Cannot scorch no matter where you stand it.

Built-in Calrod heating element. Mirror polished aluminum sole plate, flared and beveled — complete with button nooks. 32 square inches of ironing surface. Air cooled, comfort-shaped handle.

Super-heated steam guarantees perfect steam pressing for the thickest, heaviest materials. Concentrated steam vents — steam goes where it's needed most, penetrates the deepest fabrics. None wasted around the edges.

7-foot cord reduces the need for extension cords. Removable plate permits simple cord replacement.

Weight, 3½ pounds. Holds 11 ounces of water, with over an hour of continuous steam ironing, without refilling.

Underwriters' Approved. Guaranteed for one year. Gift packaged in distinctive plaid box.

Price, No. N-1 Casco Steam Iron.....each **\$19.95**

Federal Tax included.

HAMILTON BEACH MODEL "G" FOOD MIXER
with "MIXGUIDE" and "BOWL CONTROL"

Here is the food mixer that is easiest to sell because it is easiest to use. It is the mixer women want most because of the many extra features they get without paying a premium. Precision built to practically eliminate service. Sold under a policy that assures you full profit on every sale. Backed by powerful national advertising, effective promotional material.

Specifications—Mechanical Details

Motor—Built by Hamilton Beach. No radio interference.

Current—Operates on 110-120 volts DC or AC up to 75 cycles.

Drive—Worm gear of phosphor bronze. Quiet, compact, durable.

Beaters—Chromium plated, mounted in a single, guarded, easily detachable frame.

Bowls—Opaque glass bowls in white. Small bowl, 1 quart; large bowl, 3 quarts.

Finish—Baked enamel, with bakelite handle.

Cord—6-ft. rubber cord with unbreakable moulded rubber plug.

HAMILTON BEACH MIXETTE 3-SPEED PORTABLE FOOD MIXER

With One Hand Operation

A small portable mixer that does a real job of mixing, mashing, beating, folding. Will handle any job in the recipe book. Not as many speeds or features as the big Hamilton Beach with Mix-guide and Bowl Control, but the answer to many small-kitchen housewife's needs. Mixette has three tested speeds, right under the thumb, powered by trouble-free Hamilton Beach motor that has long been the standard for the small appliance field.

Features: Hand that holds mixer sets speed. Flat base permits standing on end so batter drips in bowl. Use with any bowl or pan — anywhere. Weighs only 2½ lbs., yet contains no plastic. Use beater for mixing liquids. When not in use hang on wall bracket that is included or store in drawer. Balanced handle eliminates wrist strain. Metal case — baked-on white enamel. Recipe book and instruction book. Beautifully gift packaged.

Price, Mixetteeach **\$17.75**

HAMILTON BEACH QUICK DRY ELECTRIC HAIR DRYER

The Choice of Professionals

For many years Hamilton Beach Hair Dryers have been the choice of professionals — beauty shop operators and barbers — because they dry quicker and better. The new No. 6 "Quick Dry" offers the same advantages — plus light weight and easy handling. It has a switch on either side — ON-OFF and HOT-COLD. All metal, no plastic. Finished in handsome ivory enamel. Hamilton Beach quality-precision manufacture throughout guarantees years of trouble-free service.

Attractive, colorful package shows the "Quick Dry" in actual use, demonstrating ease of handling. Additional uses — defrosting, drying nail polish, spot drying, paint drying, etc., featured on sides of package. Open, it makes an attractive counter display.

Price, No. 6 Hair Dryer.....each **\$14.90**

HAMILTON BEACH VIBRATORS

TYPE K VIBRATOR

The lowest priced vibrator in the Hamilton Beach line, developed to meet the demand for a motor-driven vibrator at a modest price. Into it are built features rarely found in a vibrator in this price range.

Compact motor, applicators 1, 2, 4, 6, 7, toggle type vibrating movement (adjustable for wear), handy switch and baked enamel finish. Packed in fitted carrying case.

Listed by Underwriters' Laboratories, Inc. Operates on 110-120 volts, D.C. or A.C., up to 75 cycles.

Packed with instruction sheet individually in carton. Shipping weight, 3½ pounds.

Price, Type K Vibrator complete, each.....**\$14.95**

TYPE F VIBRATOR

Exceedingly popular for home and professional use. Has 7 different speeds to vary intensity of vibration. Operates on 25-60 cycles, 110-120 volts A.C. No extra charge for motor to operate on 110-120 volts D.C. Wear adjustment insures long life. Listed by Underwriters' Laboratories, Inc. Complete with 7 feet of cord, can of oil, instruction card, applicators 1, 2, 3, 4, 6, 7, all packed in a fitted carrying case. Packed individually in carton. Shipping weight, 5¼ pounds. (Unless otherwise specified, A.C. motor will be furnished.)

Price, Type F Vibrator complete, each.....**\$19.50**

TYPE D VIBRATOR

Stands up under hard service in barber shops and homes. Has no speed control. Operates on 110-120 volts, D.C. or A.C., up to 75 cycles. Adjustments for wear. Listed by Underwriters' Laboratories, Inc. Complete with 7 feet of cord, can of oil, instruction card, applicators 1, 2, 3, 4, 6, 7, all packed in a fitted carrying case. Packed individually in carton. Shipping weight, 5¼ pounds.

WESTINGHOUSE ELECTRIC APPLIANCES

MODEL ID-505 ADJUST-O-MATIC IRON

Efficient, dependable Westinghouse Adjust-O-Matic iron. Efficient because the "COROX" heating element assures fast, even heat distribution at the ironing surface, an important factor for smooth, crisp ironing.

The cool, fatigue-proof handle permits a natural arm and wrist movement. The sloping ironing edge lets the iron glide quickly and easily under buttons and into pleats. The big, easy-to-read fabric-markings on the cover plate are easily selected by the Fabric Selector Dial, located at a convenient finger-length from the handle. A flick of the finger sends the heat surging into the "COROX" element — right up to the selected temperature.

This iron is dependable because the rugged Uni-therm thermostat maintains the ironing temperature selected, regardless of fabric dampness.

One-piece, cast iron base with 800-watt tubular "COROX" heating element permanently pressed into base. Heel Stand: Just tilt iron up on cool heel, no need for pad or holder. Complete with 6-foot Underwriters' approved cord and plug permanently attached. Spring wire guard keeps cord out of users way while ironing.

Price, No. ID-505 Adjust-O-Matic Iron..each \$8.95

No. ZR-44A COZY-GLOW HEATER

Instant heat when and where wanted. Infrared rays produced by heating element have therapeutic value, also excellent for quick drying of paints and lacquers. 14-inch aluminum reflector tilts to any desired angle — wire guard removable for easy cleaning. Weighted base prevents overturning. Operates on a-c or d-c.

No. LPC-94 ADJUST-O-MATIC IRON

This Adjust-O-Matic Iron has the new super-sensitive Unitherm thermostat that maintains accurate heat control whether ironing light-dry or heavy-moist garments. Control lever is fabric-marked for accurate selection of heat required. The 1000 watt, fast heating, tubular Corox heating element is pressed in a cast iron base for better heat distribution on the ironing surface, long element life and cooler cover and handle. New easy grip handle with thumb rest means "easier on the hand" ironing. Lightweight — weighs only four pounds.

A.C. only. 7-foot Underwriters' Approved cord with soft rubber plug permanently attached to the iron. Withstands 10,000 cycle-test and 50 pound pull. Available in right or left hand model.

HAMILTON BEACH VACUUM CLEANERS

CHAMPION NO. 14

Weights Only
13 lbs., 15 oz.

The Champion, built to Hamilton Beach precision standards plus new, outstanding lightness and ease of handling . . . and all the well-known, up-to-date features (floor light, tip-toe nozzle adjustment, more powerful ball-bearing motor and many other refinements.) Here, indeed, is a finer cleaner that will appeal to those who want the best.

New, light weight—ease of operation and increased cleaning efficiency are built into this cleaner through the use of ALSILOY. This new alloy makes these advantages possible without sacrifice of structural strength.

MOTOR: Powerful, oversized, ball-bearing motor — horizontal type—built by Hamilton Beach. More powerful than the No. 12. Its oversize armature gives great reserve power. Has a 24-bar, mica insulated and undercut commutator—a feature which represents the finest in motor manufacture. Radio interference eliminator built into motor. Operates on 110-120 volts DC or AC up to 75 cycles. Motor speed 9500 R.P.M. under load.

LUBRICATION: The ball-bearings are grease-packed and need no additional lubrication.

BRUSH: Full width (11 $\frac{1}{4}$ in.) motor-driven brush. Selected, high-quality China bristles in a single spiral row insure long wear. Adjustment for bristle wear is made with fingertips without removing brush.

NOZZLE ADJUSTMENT: A simple movement of the toe instantly changes the nozzle adjustment to five positions. Will not slip out of adjustment.

LIGHT: Wide vision light for cleaning dark corners, under beds, in closets, etc. 25-watt lamp made expressly for vacuum cleaners.

BAG: New accordion type made of heavy, vatdyed, sun-fast material, scientifically developed to allow escape of air and retain dust. Wide opening mouth makes emptying easy.

CORD: Full length (20 ft.) Underwriters' approved cord with unbreakable moulded rubber plug.

Price, Champion No. 14.....\$52.50

HAMILTON BEACH No. 26 "DEEP-CLEAN" CLEANER

With Double Action Floor Nozzle

Double
Action
Floor
Nozzle

PICKS UP LINT, HAIR, THREAD
GETS EMBEDDED DIRT

The No. 26, with its complete set of cleaning tools, has been designed for every "on-the-floor" and "above-the-floor" cleaning job. It cleans almost everything—rugs, carpets, linoleum, bare floors, draperies, upholstery, automobile interiors, lamp shades, etc. Sprays floor polish, paint and other liquids.

Prominent features are:— Double Action Floor Nozzle for thorough rug and carpet cleaning; Suction Regulator, for the safe cleaning of delicate fabrics; Four-Wheel Carriage for easy operation; Locking device for front swivel wheels prevents cleaner from rolling when used on stairways; Swivel Floor and Wall Brush for cleaning under low objects and other hard-to-reach places.

Efficient, heavy duty Hamilton Beach Motor, ball-bearing, with sealed in lubrication provides powerful suction; operates on 110-120 volts DC or AC up to 75 cycles. Radio interference eliminator. Cylinder housing, rolled sheet steel finished in platinum gray baked enamel; other metal parts heavily plated. The No. 26 is quality throughout.

The only floor nozzle with patented full floating brush and Double Action Ridges, plus furniture protector rubber body. Double action suction ridges folds open nap, creating high velocity suction area.

Free floating with rocking motion brush adjusts itself automatically to various rug thicknesses, loosening clinging litter, etc. Rubber bodied nozzle protects furniture, eliminating woodwork marring while cleaning. Swivel joint allows easy cleaning under low chairs, davenport, beds, etc.

List price, No. 26 "Deep-Clean" Cleaner complete with
all Attachments\$72.50

CLEANING TOOLS — FOR SCORES OF HOUSE CLEANING TASKS

- 1 **Double Action Floor Nozzle.** Duplex nozzle for thorough rug cleaning. Rubber body protects furniture. Polished floor plate will not discolor rugs.
- 2 **Floor and Wall Brush.** For tile, bare floors, linoleum and walls. Full rubber mounted—can't mar furniture. Swivel action.
- 3 **Upholstery Nozzle.** For cleaning upholstery, curtains, mattresses, auto interiors, etc. Has suction regulator.
- 4 **Utility Brush.** For all general dusting. Full rubber mounted. Inner guard wall directs suction, keeps bristles in normal position.
- 5 **Radiator Tool.** An efficient tool for cleaning radi-

ators, radios, piano interiors and other hard-to-reach places.

- 6 **Gas Despenser.** Bakelite container holds Expello crystals for repelling moths. Attaches direct to end of cleaner or hose.
- 7 **Sprayer.** For spraying liquid wax or polish on floors, paints, lacquers, insecticides, etc.
- 8 **Extension Tube.** Two 23½-inch gray, baked enamel finish, steel tubes, one straight, one curved. All tools fit either tube.
- 9 **Hose.** Highest grade, 7-foot hose swiveled at both ends. Quick locking device for attaching to cleaner.

FRYRYTE DEEP FRYER

Just the thing for real Southern Fried Chicken — French Fried Onions — Doughnuts — French Fried Potatoes — Fish — Popcorn — and an endless list of other enticing foods.

Mirror-chrome finish. Has removable handle on basket for ease in storing. Special support studs permit fat to drain when basket is raised. The heating element is integrally cast for even heat distribution, no "hot spots" to char the fat or cause smoking, no danger of "shorting out" from fat dripping on the element. Cold zone at the bottom of cast aluminum well catches all food particles. Fat remains in the unit for repeated use. Cover is provided for this purpose.

Thermostatic temperature control, calibrated, 250 to 450 degrees. 110 to 120 volts, A.C. only — 1320 watts. Capacity, 4 lbs. shortening or 4 pints oil. Unit 6¾ inches wide by 11¼ inches long by 7¾ inches high. Net weight, 8 lbs. Packed one unit to a carton. Underwriters approved.

Price, No. F4 Fryryte Deep Fryer.....each \$26.95

Adjustat gives automatic control when used with Thermotape within the range of 20° to 80° F. by simply turning the control knob for the desired temperature wanted. Furnished complete with 6-ft. Neoprene cord, attachment plug and a plastic triple outlet box for connecting one to three lengths of Thermotape (will maintain 3 Thermotape installations at a constant temperature). Packed separately in display box. Standard package, 10 units. Shipping weight 8 lbs. 900 watts, 100 VAC.

Cat. No. TSA935 Adjustat.....price each \$4.65

FLOATING STOCK TANK WATER WARMER

Keeps water from freezing. Easy to use — it's automatic. Just place the float (with heating unit down) on surface of water in any size tank, plug the lead cord into a 110-volt receptacle and the

water will be kept open so stock can drink even when temperatures drop below zero. This unit places 500 watts of heat just below the surface of water where it will be most effective with the least use of electricity. Automatic thermostat control assures lowest operating cost. Equipped with 12 feet of anchor-sealed (water proof) Neoprene cord and plug with grounding connection. The heating unit is attached to the bottom of a heavy-gauge, nickel-plated copper float by spring clip — can be removed from the float for use as an immersion heater. 500 watts. 110 volts A.C.

Packed separately in display carton. Standard package, 5 units. Shipping weight, 13 lbs.

Cat. No. FWG50040 Water

Warmerprice each \$10.95*

ANACONDA SOLDER FITTINGS

Anaconda fittings have smooth inside surfaces and deep cups with adequate shoulders to provide sound, strong solder bonds. The design of these solder fittings is based on the natural law of capillary attraction.

Wrought copper fittings are made in sizes from 3/8 inch to 4 inches inclusive. They are uniformly true to size, of one piece seamless construction and are free from porosity. They are available in elbows, tees, couplings and unions, and a complete range of reduction and adapter combinations.

Cast bronze fittings are available in sizes from 3/8 to 12 inches, in a complete line of elbows, tees, couplings and unions, including all standard reduction and adapter combinations. Cast bronze drainage fittings are also available in sizes from 1 1/4 inch to 8 inches in elbows, tees, couplings, adapters, ferrules, Y-branches, double T-Y's, etc.

The complete line of Anaconda Cast Bronze flared tube fittings for use with soft Anaconda Copper tubes includes elbows, tees, couplings, unions and a full range of reduction and adapter combinations of sizes from 3/8 to 2 inches inclusive.

No. 1726 Cast Bronze Stop and Waste Valve. Copper to copper in standard nominal sizes from 3/8 to 1 inch.

No. 1511 Cast Bronze Flared Tube Tee. Copper to copper in standard nominal sizes from 1/4 inch to 3 inches.

No. 1701 Bronze Solder Coupling. Copper to copper in standard nominal sizes from 1/2 inch to 12 inches.

No. 1607 Wrought Copper 90° Elbow. Copper to copper in standard nominal sizes from 1/4 inch to 4 inches.

ANACONDA COPPER TUBES

Soil, waste and vent lines of copper make good sense — and good business, too. Your own experience with copper tubes for hot and cold water lines tell you why their use for sanitary drainage systems is a natural and logical development.

You'll find that copper tubes mean: (1) Shop fabricated sub-assemblies save time on the job. (2) Long, straight lengths mean fewer connections. (3) Total cost of job is often less than with other materials. (4) Customer satisfaction — provides rust-proof drainage system — reduces possibility of stoppage because the smooth inside surface of copper tubes facilitates quick drainage.

Everything you need for an "All Copper" installation in stock for immediate delivery. Anaconda Type "M" Copper Water Tubes for soil, waste and vent lines — Anaconda Type "K" Copper Water Tubes for underground and interior service — Anaconda Type "L" Copper Water Tubes for interior service — and a complete line of Anaconda Copper Tube Fittings and Accessories.

Anaconda Copper Tubes are made in three wall thicknesses, and in all standard plumbing sizes, for threadless assembly with either solder type or flared tube type fittings. Sizes and weights are given in the accompanying table.

Type K tube is the heaviest and most durable and is offered for all types of water service. It is furnished hard in 20-foot straight lengths and soft in 60 and 100-foot coils.

Type L tube has a slightly thinner wall and is used chiefly for inside plumbing. It is manufactured hard in 20-foot straight lengths and soft in 60 and 100-foot coils.

Type M tube is the lightest of the three and is offered only in the larger sizes used for soil, waste and vent lines. Type M tube is made in straight lengths only from ½ inch to 12 inches for assembly with Anaconda Cast Bronze Solder Drainage Fittings.

 (3 wires)  (4 wires), etc.
-  Feeders. Note: Use heavy lines and designate by number corresponding to listing in Feeder Schedule.
-  Underfloor Duct and Junction Box. Triple System. Note: For double or single systems eliminate one or two lines. This symbol is equally adaptable to auxiliary system layouts.

-  Generator.
-  Motor.
-  Instrument.
-  Power Transformer. (Or draw to scale.)
-  Controller.
-  Isolating Switch.

AUXILIARY SYSTEMS

-  Push Button.
-  Buzzer.
-  Bell.
-  Annunciator.
-  Outside Telephone.
-  Interconnecting Telephone.
-  Telephone Switchboard.
-  Bell Ringing Transformer.
-  Electric Door Opener.
-  Fire Alarm Bell.
-  Fire Alarm Station.
-  City Fire Alarm Station.
-  Fire Alarm Central Station.
-  Automatic Fire Alarm Device.
-  Watchman's Station.
-  Watchman's Central Station.
-  Horn.
-  Nurse's Signal Plug.
-  Maid's Signal Plug.
-  Radio Outlet.
-  Signal Central Station.
-  Interconnection Box.
-  Battery.

Auxiliary System Circuits.

Note: Any line without further designation indicates a 2-Wire System. For a greater number of wires designate with numerals in manner similar to —, 12-No. 18W- $\frac{3}{4}$ " C., or designate by number corresponding to listing in Schedule.

Special Auxiliary Outlets.

Subscription letters refer to notes on plans or detailed description in specifications.

-   

(Symbols in accordance with American Standards Association Standard ASA Z32.9-1943.)

Conduit size based on three conductors in one conduit for three phase A.C. motors and on two conductors in one conduit for direct current and single phase A.C. motors.

NATIONAL ELECTRICAL CODE APPLICATION DATA

TO DETERMINE SWITCH, FUSE OR WIRE SIZE for motor circuits, determine terminal ampere rating of motor either (a) from motor nameplate or (b) from tables on this page.

MOTOR TERMINAL AMPERES AT FULL LOAD†

	185	158	93	79	74	63	536	268	111

* For running protection of motors of 1 horsepower or less, see Section 4322 N.E.C.

† Current in common conductor of 2-phase, 3-wire system will be 1.41 times value given.

‡ For full-load currents of 208 and 200-volt motors, increase the corresponding 220-volt motor full load current by 6 and 10 percent respectively.

* For full-load currents of 208 and 200-volt motors, increase the corresponding 230-volt motor full load current by 10 and 15 percent respectively.

† These values of full-load current are for motors running at speeds usual for belted motors and motors with normal torque characteristics. Motors built for especially low speeds or high torques may require more running current, in which case the nameplate current rating should be used.

ALLOWABLE CURRENT-CARRYING CAPACITIES OF CONDUCTORS IN AMPERES

Not More Than Three Conductors in Raceway or Cable

MORE THAN THREE CONDUCTORS IN A RACEWAY OR CABLE. The table gives the allowable current-carrying capacity for not more than three conductors in a raceway or cable. If the number of conductors in a raceway or cable is from 4 to 6, the allowable current-carrying capacity of each conductor shall be reduced to 80 per cent of the value in the table. If the number of conductors in a raceway or cable is from 7 to 9, the allowable current-carrying capacity of each conductor shall be reduced to 70 per cent of the values in the table.
